

# 5% more students

Projections made in 1968 that enrolment at Dalhousie University in the 1970's would reach between 8'000 and 10,000, will be achieved, the president, Dr. Henry D. Hicks, has forecast.

Dr. Hicks, who announced that this year's enrolment had increased five per cent over 1972-73, said the increase was a substantial one in view of the levelling off, or decline in enrolment at some universities in other parts of the country.

Dalhousie's enrolment total of 7,700 this was the figure estimated for 1973-74 at the beginning of the Dalhorizons capital fund-raising program in 1969-70.

"We levelled off last year," said Dr. Hicks, "but enrolment has begun to increase again, although apparently at a slower rate than during the 1960s. Even so, I believe the projections that we made at the beginning of the Dalhorizons program for the decade of the 1970s will be achieved, but on the minimal side rather than the maximum."

Enrolment for the current year, said Dr. Hicks, is approximately 6,565 full-time and 1135 part-time. This compared with 6304 full-time and 1031 part-time in 1973-73. The figures include approximately 250 University of King's College students, who are registered in Dalhousie arts and science courses.

## Dal-Tech: minister agrees with proposal

Provincial Education Minister Dr. William Gillis has directed the University Grants Commission to undertake final negotiations between Dalhousie and Nova Scotia Technical College towards a proposed merger of the two institutions.

The proposal would see the technical college become a part of Dalhousie as a specialized school of engineering and architecture. Preliminary negotiations have been going on for the past 18 months.

Dr. Gillis said he directed the committee after receiving letters from the boards of governors of both institutions requesting government action on the plan.

In general terms, he said, the proposed merger seems to be a "reasonable step" in the future development of engineering in the province.

The education minister said the University Grants Committee has been instructed to report its findings back to the government as soon as possible for final decision by the cabinet.

Committee chairman, Dr. Arthur Murphy, said that the final details are now being worked out and the committee hopes that the merger will come in time for the 1974-75 academic year.

The Association of Professional Engineers of Nova Scotia, meanwhile, has given qualified approval to the proposed integration of N.S. Tech within Dalhousie.

The association has qualified endorsement with a recommendation that the new school of engineering at Dalhousie continues to accept course credits from other degree granting universities.

APENS president, Frank O'Neill, said the association, after months of research and deliberation, also saw the need for an upgrading of existing levels of high school education to accommodate the curriculum envisaged for the new engineering school.

Mr. O'Neill said the association would like a

system whereby adequately qualified students could be taken directly from high school into a "well planned, co-ordinated engineering program at a central location."

Nova Scotia Tech, Mr. O'Neill said, was facing a situation, "mainly its own doing," where the professor-student ratio was unrealistic and enrollment was continuing to drop.

"This creates a less than sound economic situation".

Dr. Malcolm Ross, Professor of English, right, extended greetings and congratulations on behalf of Dalhousie to Dr. John M. Anderson on his formal installation as 10th president of the University of New Brunswick.

# Rezoning before committee

The ward map of the City of Halifax which is published on Pages 6 and 7 was compiled from returns of Dalhousie-sponsored petitions opposing an application to rezone from R-2 to R-1 land owned by the university south of South Street.

A similar map and a letter of explanation was sent to the Mayor and members of City Council by Vice-President W. A. MacKay.

Rezoning of the area in question would prevent Dalhousie from building a physical education, recreation and sports centre on land it owns south of South Street.

Council deferred a decision at its Oct. 25 meeting on the rezoning application after a number of aldermen hinted at a compromise solution.

In his letter of Oct. 24 to City Council, Professor MacKay explained how the university solicited support against the rezoning of university property.

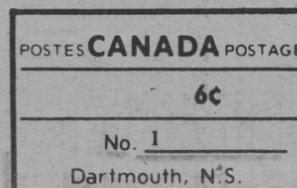

"Petition forms were circulated by the university to alumni whose last reported address was in the City of Halifax, to members of staff in the university and to residents living in the area bounded by Quinpool Road, (the southern half of) Robie Street, and the North West Arm.

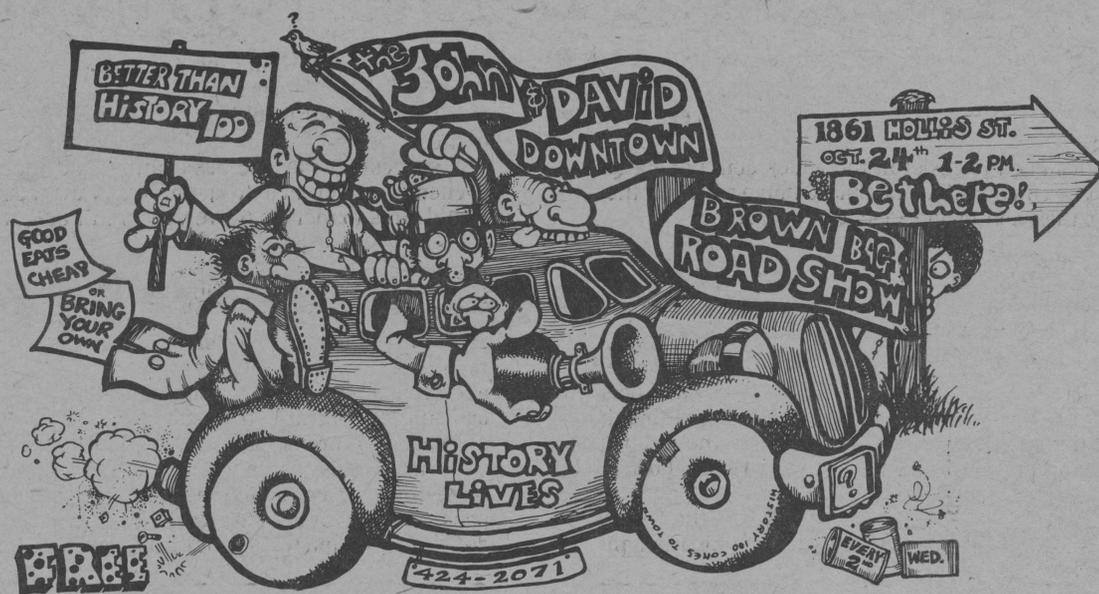

"Alumni, staff and residents were invited to consider the university's proposal for use of the lands lying south of South Street across from Studley field, and if they agreed that the university's proposal was worthy of support, to indicate this by returning a form of petition opposing rezoning of the proposed site (of the physical education centre). In addition, the Student Union arranged for members of the student body opposed to rezoning to indicate this by signing a petition."

More than 1,400 residents (including alumni) returned signed petition slips opposing the rezoning, and more than 1,100 added their names in support of the university.

While the greatest concentration of opposition to rezoning was in Wards 1 and 2 (64.8 per cent of the 2,500 signatures), support for the university also came from the eight other wards.

"We are particularly gratified", said Vice-President MacKay earlier this week, "that as the university's position became clearer, our proposal to use the land south of South Street gained widespread support among owners of property in the area under consideration for rezoning."

## If history's your bag . . .

History is alive and full of fun when a noon-day downtown crowd exchanges words on current topics — over lunch — with two Dalhousie history professors under the banner of the John and David Downtown Brown Bag Road Show.

The innovative discussants are history professors John Godfrey and David Crook who hold court on some current issue or event before writing reaction and comment from the audience.

The lunch is inexpensive and comes in a two-pound brown paper bag. Or bring your own, bag or no bag.

The setting is the top floor of a restored building owned by the Nova Scotia College of Art and Design at 1861 Hollis Street.

The show is a Dalhousie Alumni-sponsored project for alumni and any member of the Halifax community who may be interested in a stimulating hour of lively conversation on contemporary history.

The talk sessions will continue every second Wednesday from 1 to 2 p.m. until the end of the year.

The success rate to date — excellent.

Scott Savage

## Three part opening for Dal Opera

Philip May

The Dalhousie Opera begins its 1973-74 season Nov. 21 in a rather new and unusual fashion.

The performance, which will be repeated Nov. 23 and 24, will actually feature three works of an unusual nature. The first is "Histoire du Soldate" by Igor Stravinsky, followed by Paul Hindemith's "There And Back" and Joseph Horowitz's "Gentlemen's Island."

The Dalhousie Opera has endeavoured over the past three or four years to present a wide and varied program, trying to meet public demand, as well as offering something new.

These productions have run from Mozart to Gilbert and Sullivan with modern works also receiving their share of attention.

"Histoire du Soldate" is a work for chamber orchestra, three dancers, and a narrator, like the other two operas, it will be performed in a rather unusual setting.

It will take place on a small stage mounted on the larger stage of the Rebecca Cohn Auditorium with a 36-foot mirror (surely one of the largest in Canada) taking the place of a scenic backdrop, this mirror reflects both performer and audience giving a dimension of a larger hall and a surrounding audience.

"There And Back" is a 12 minute work, and very different. The actual storyline is only six minutes in length. At that point a learned gentleman informs everyone that the story could, very logically, be given the other way round — back to front.

The characters then proceed to tell the story in reverse, even some of the music is in that order. The set adds to the illusion by completely rotating.

"Gentlemen's Island" is a 30-minute work based on a ballad by W. S. Gilbert, sometimes called "Robinsonade".

It concerns the adventures of two Victorian gentlemen marooned on an extremely small desert island, who are observing the strict demands of Victorianian etiquette of staying within their own areas with no attempt at conversation for the lack of proper introduction. Once again, this large mirror plays a great part in presenting a rather unusual dimension to this opera.

Peter Perina of the Dalhousie Theatre Department is responsible for the set design, based loosely on the ideas of the noted set designer Svaboda. The actual backstage activities of stagehands, dressing rooms, etc., are all revealed in this production.

It is shaping up as a most rewarding experience for not only opera lovers, but all students of the dramatic theatre.

The evening is directed by Scott Savage, with Philip May as producer. Adrian Hoffman will conduct the Histoire du Soldate, and Kenneth Elloway the two operas.

The second production of the Dalhousie Opera season will be in March a performance of "The Marriage of Figaro" by Mozart, directed by Philip May.

## Lionel Lawrence on editorial board

Prof. Lionel Lawrence, chairman of the Dalhousie theatre department, has been named to the editorial advisory board of the Canadian Theatre Review.

The Review, which begins publishing in January, is a new quarterly journal devoted to analyzing theatre activities in Canada.

The journal will carry major essays relating to Canadian theatre as it exists today, historical documentation relating to the Canadian theatre as it existed in the past, and regional essays by leading members of the theatrical community. Each issue will also include a previously unpublished, full-length Canadian script, theatrical reference material and reviews of important new books relating to theatre.

Other members of the advisory board include Newfoundland playwright Michael Cook, Ontario designer Maurice Strike, Ontario and former Quebec director Marion Andre, playwright-professor Mavor Moore of York University, Calgary critic James Portman, Prof. Tom Peacocke of the University of Alberta, Prof. Ann Saddlemeier of the University of Toronto, actor Powys Thomas of Stratford, director Albert Millaire of Montreal, Vancouver critic Peter Hay, Prof. John Brockington of the University of British Columbia and Dean Green of York.

## Vermontian speaks on Wagner opera

Peter Fox Smith, executive director of the Vermont Council of the Arts was a recent resource speaker in the Dalhousie History 100 class.

The purpose of his visit was to introduce students to Richard Wagner through an informal talk supplemented by, and illustrated with, musical examples.

Smith's lecture was a preliminary to a 20-hour marathon listening venture of Wagner's opera, the Ring Cycle.

The Wagnerian immersion or "happening" represented one phase in the students' attempt to look at history through the mood and events of an era (in this case, the mood of dissoluteness which prevailed in the 1880's) as they move by decade through the past 100 years in the course of the History 100 Zero class.

The format for the class is a four-unit topic block for each decade — a lecture which sets the tone; an open informal discussion, an audio-visual presentation, and a happening which attempts to reinforce the other three elements in the package.

Prof. David Crook, who with his colleague John Godfrey lead the History class, said that Smith's visit was in keeping with their policy of relying on external experts to enrich the class program.

Peter Fox Smith taught humanities (philosophy and aesthetics) at the college level for 15 years and in his role as executive director of the Vermont Council of the Arts, is charged with the responsibility for implementing through funding, artistic and cultural activities in the state.

Smith who met with Nova Scotia arts representatives while in Halifax, said that he was surprised to discover while at a state college in an somewhat isolated area of Vermont recently, that the students there were aware of the learning experience taking place in a History 100 class at Dalhousie.

## Two art shows

Kim Ondaatje's "Factory Series," a collection of the Toronto artist's latest paintings and prints opened this week at the Dalhousie Art Gallery.

The collection, circulated by the Confederation Art Gallery and Museum, will run until Nov. 25.

Also at Dalhousie, a series of sketches by Tom Forrestall, well known Dartmouth artist, will be shown in the Little Gallery until Nov. 25.

## Lynk's group provides the link

Michael Lynk

The Community Affairs Secretariat conceived last spring by the Dalhousie Student Council has developed beyond the embryonic stage and is moving towards full maturity.

If the momentum continues, it could be one way of bringing the university and the community closer together.

Michael Lynk, who heads the new post, said that council in creating the secretariat, felt that the university (student and faculty) had perhaps been too insular up to now and hadn't looked at much of the world beyond South and Robie streets.

He sees the secretariat as a means of strengthening university ties with the community and exposing it to the needs not only of the local area, but of the larger community.

### MAKE AVAILABLE

The purpose of the office he feels, is to make the resources and facilities of the university available to social service groups in the community, while at the same time increasing student awareness by giving them a chance to involve themselves in community projects such as day care centres, research projects, community and urban planning, literary and tutoring programs.

Some of the ways to accomplish this, he feels are:

The secretariat has joined two community groups — MOVE and Coalition for Development. "Our purpose here is twofold—to provide them with facilities and to plug students into these groups. In an effort to stimulate interest, a booth is manned in the SUB lobby where questions can be answered and information on the organizational goals and activities of both can be distributed.

"... we also hope to encourage Council to speak out on certain political issues;

"... we are planning teach-ins and workshops with input by knowledgeable resource people;

"... we have been working with the Institute of Public Affairs in an effort to schedule urban forums;

"... and finally, we have suggested to President Hicks that the university consider the feasibility of an extra curricular community committee (similar to one that now operates at Queen's University)." Such a committee could he said, have broad representation from the student body, faculty and Halifax citizenry.

"This would be one way of initiating and developing an ongoing dialogue with the community on current issues."

### CATALYST

The office fulfills another function. It serves as a catalyst for students who wish to initiate volunteer groups or projects, and as a clearing house for groups already established. Among the programs now operating that would like to enlist volunteers are:

NEW OPTIONS, a free school for dropouts;

HALIFAX INTERACTION, which promotes health education and health care delivery through its premedical clinics in addition to its drug crises intervention service;

OUTREACH TUTORING, an individual tutoring and remedial service for children in need of this kind of attention.

ECOLOGY ACTION CENTRE, which works to protect and enhance the city;

VOLUNTEER BUREAU, which attempts to place volunteers in community agencies.

HELP LINE, an information and counselling phone service operating around the clock;

MOVE AND COALITION FOR DEVELOPMENT, two community social action groups.

Mike, who has been involved with Outreach Tutoring, is convinced that students can derive a whole new sense of direction by becoming involved.

"My experience with Outreach has changed my thinking on what I can do individually and what groups can do collectively to bring about change."

## New association formed

A new association entitled Atlantic Provinces Association for Continuing University Education, with representation by those in the field, has been set in motion.

It is designed to assist in the wider communication and closer co-operation of Atlantic universities as they develop their continuing education programs.

The formation of such an association was necessitated by a number of common problems. It has become increasingly apparent that Atlantic universities (and others as well) have been tackling the problem of continuing education piecemeal and in an isolated fashion. Some institutions have focused attention on a particular area, while others have been unaware of their counterparts' efforts resulting in duplication. More important, however is the public's present and future demands for a whole host of education programs for a variety of purposes.

The association hopes that it can provide the needed impetus for increased awareness, communication and

co-operation within, and between, the universities in their respective efforts to provide as many educational opportunities as possible for individuals from all walks of life.

A spokesman for the association said that a comprehensive approach to a university's responsibility would have to include university credit and non-credit courses, professional and vocational development programs, community services, and research programs in the field of continuing education itself.

The association, at its first meeting, agreed that each university has an obligation to the wider community that extends not only to its graduates, but to all age groups who want, and need, additional education or training programs to assist them with their social and economic problems.

To meet this demand, universities will have to recognize that continuing education is a major component in their overall program and that it must be developed around firm policies and objectives.

Officials of the Canadian Association of University Teachers recently visited Dalhousie. Prof. Paul Huber, past-president of the Dalhousie Faculty Association, left, confers with Dr. Don Savage, centre, executive director of the CAUT, and Israel Cinman, CAUT information officer.

## Top specialists for course

Distinguished specialists are on hand for Dalhousie University's Faculty of Medicine's 47th annual refresher course, this week.

The course, which will give attention to chronic respiratory disease, thrombophlebitis and thyroid disease problems, is presented in conjunction with the 120th annual meeting of the Medical Society of Nova Scotia and in co-operation with the Halifax teaching hospitals.

Highlights of the meeting are the John Stewart Memorial Lecture sponsored by the Provincial Medical Board and the class of 1958.

Speakers are respiratory disease specialist, Dr. Ben Vaughan Branscomb of the University of Alabama School of Medicine; vascular investigator, Dr. A. S. Gallus and endocrinologist, Dr. W. C. Nicholas, both from McMaster University. Dalhousie faculty members will also be participating in the daily presentations.

Dr. Branscomb received his medical degree from Duke University in 1947 and was certified in internal medicine in 1956.

He then began an impressive teaching and service career. He was a former director of the pulmonary disease division and assistant dean at the Medical School of Alabama. His present appointments at the university include professor of medicine; professor in the department of continuing medical education;

clinical director for the Spain Rehabilitation Centre; and University of Alabama professor of medicine in emphysema and respiratory disease.

Dr. Branscomb will deliver the annual John Stewart Memorial Lecture. The subject of his address will be Superstitions in Medicine and will be given at 11 a.m., Nov. 6, in Theatre "A" of the Sir Charles Tupper Medical Building.

Dr. Gallus' special interests are the study of venous thromboembolism, as well as thrombosis and hemostasis.

He was born in Hungary but studies in Australia. He graduated from Melbourne University with his M.B.B.S. in 1963 and subsequently received his M.R.A.C.P.

In 1970, Dr. Gallus came to Canada. He is an assistant professor of pathology and medicine at McMaster University and is on staff of the St. Joseph's Hospital in Hamilton, Ontario.

Dr. Nicholas is a native of Antigonish and a 1958 medical graduate from Dalhousie. Following internship and residency training in Halifax and Toronto, he did further work at the Middlesex Hospital in London, England.

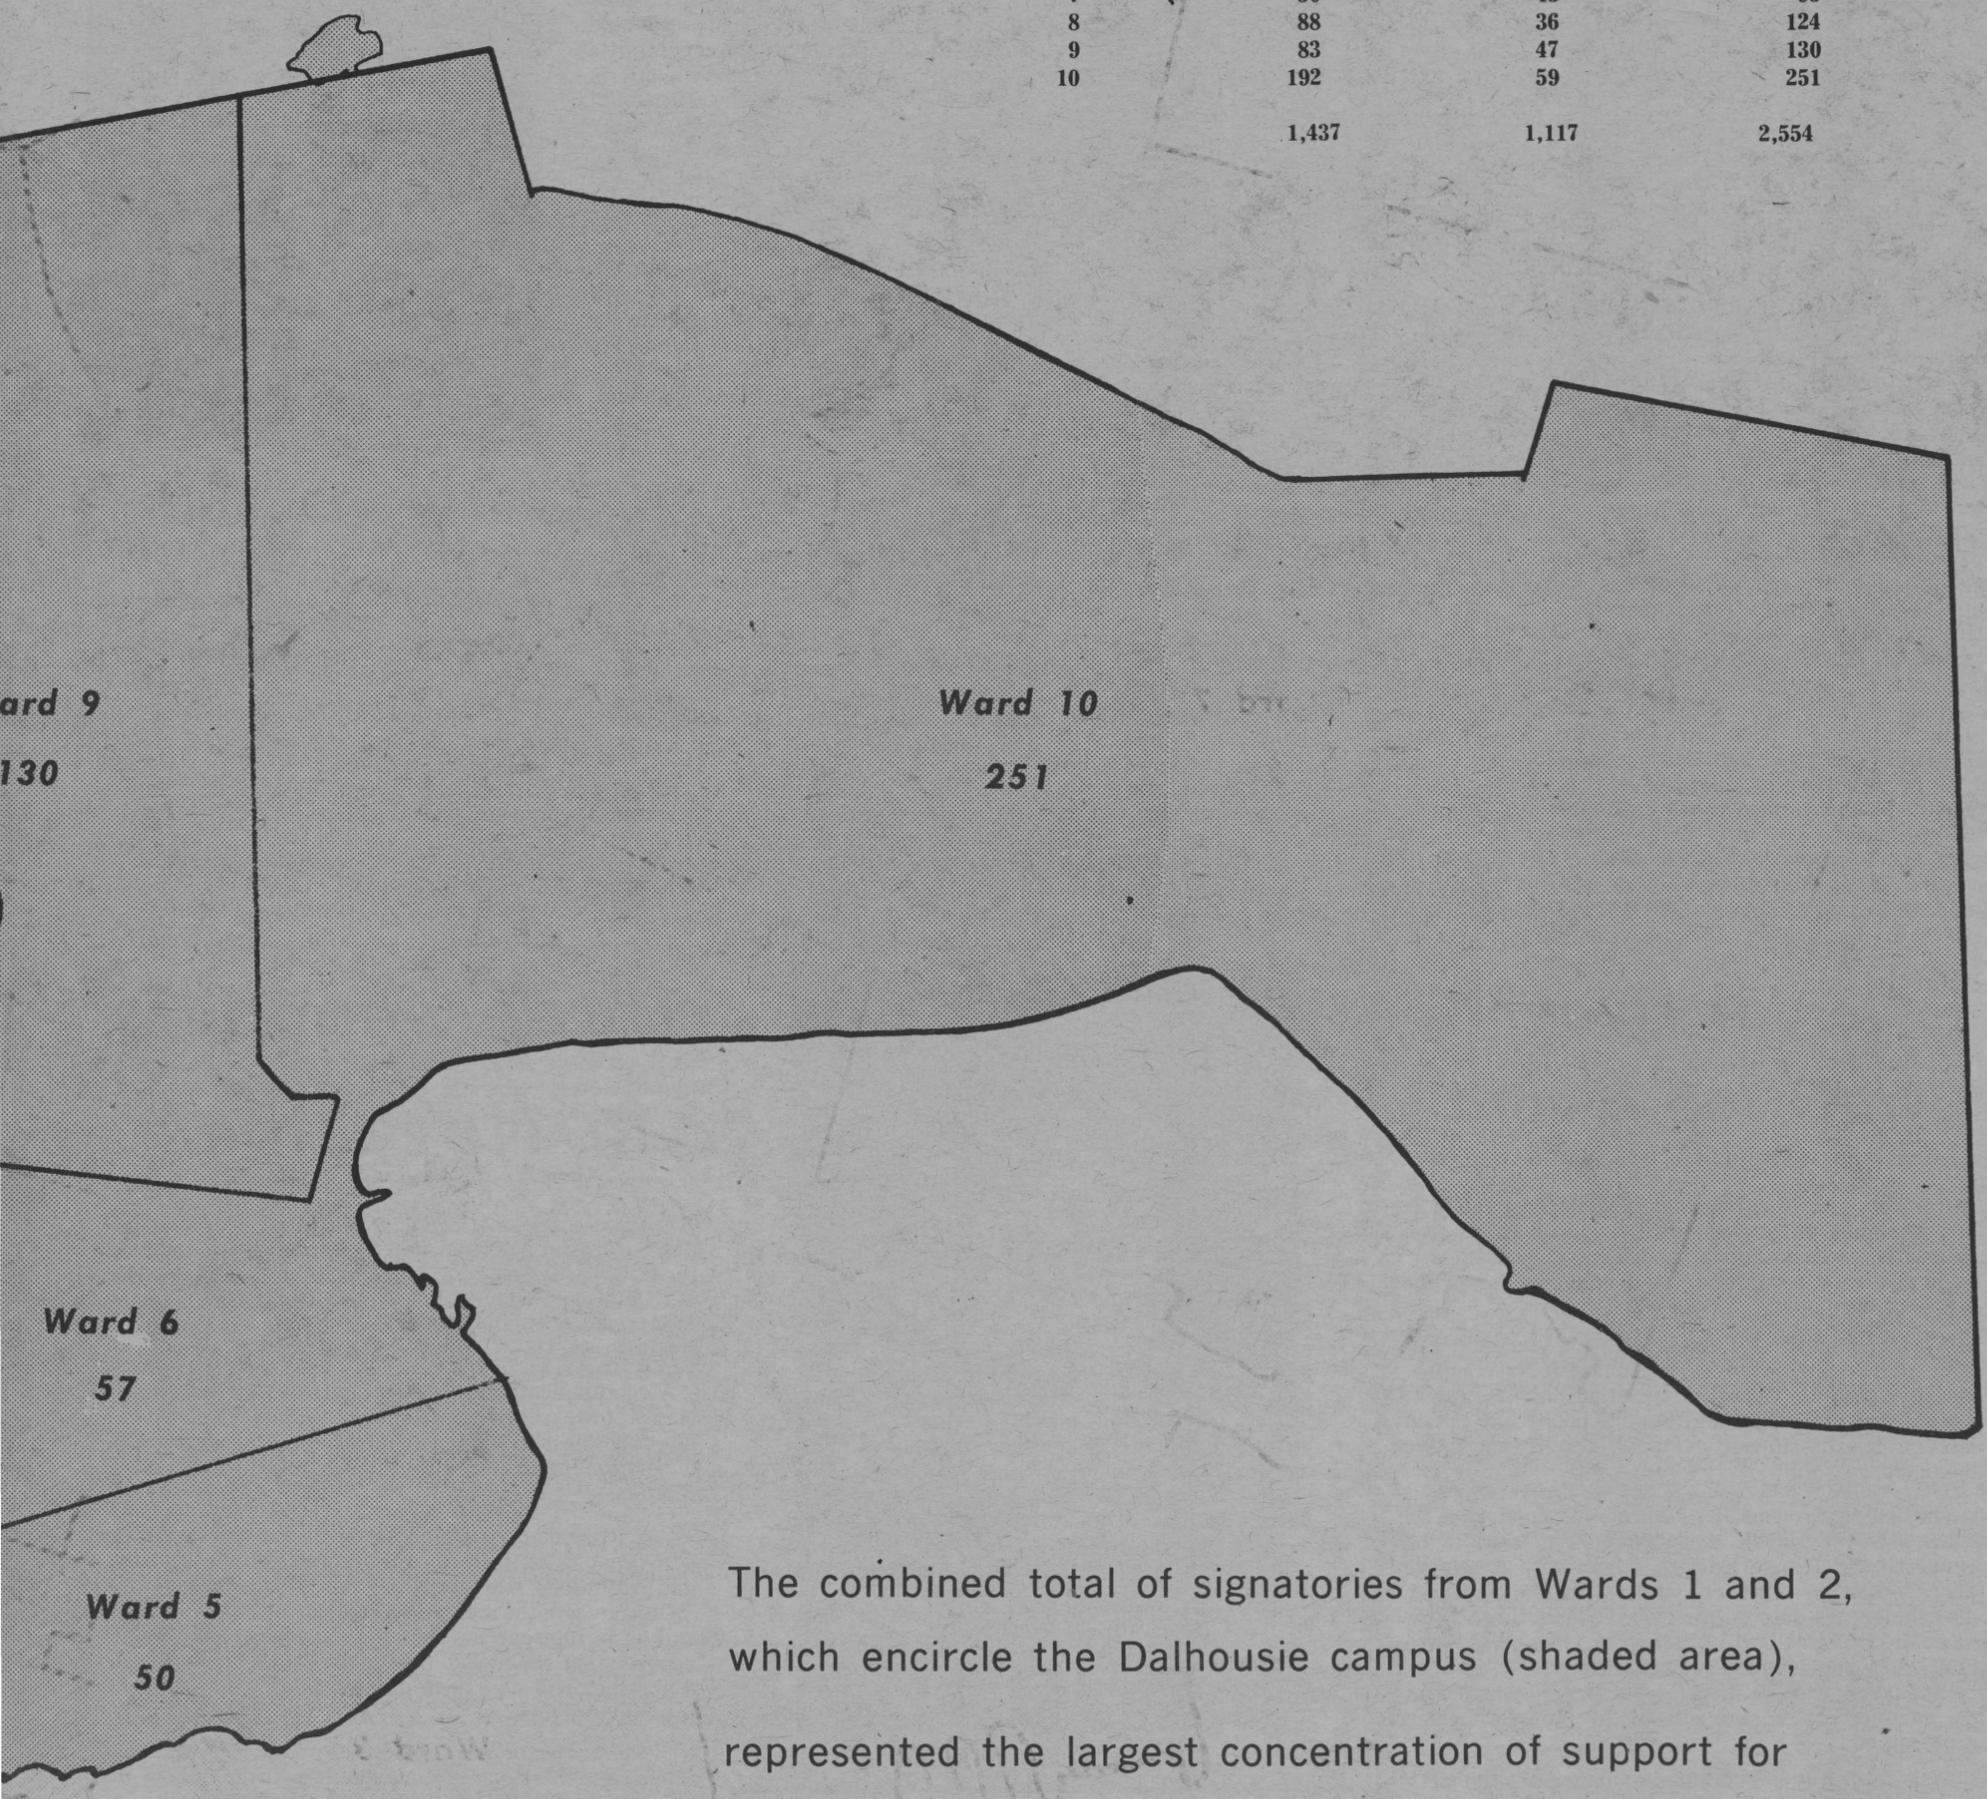

In 1963 he was appointed to the Dalhousie faculty of medicine where he carried on research and teaching duties in the field of endocrinology. He has been head of the section of medicine at McMaster University since 1971.

# Support sources

In support of Dalousie: Petition breakdown by wards

Ward	Residents	Students	Totals
1	318	237	555
2	532	569	1,101
3	40	25	65
4	69	57	126
5	27	23	50
6	38	19	57
7	50	45	95
8	88	36	124
9	83	47	130
10	192	59	251
	1,437	1,117	2,554

The combined total of signatories from Wards 1 and 2, which encircle the Dalhousie campus (shaded area), represented the largest concentration of support for the university -- 64.8 per cent.

## Dr. F. W. Lovely president of Royal College

Dr. Franklyn W. Lovely, head of the oral surgery division in Dalhousie's Faculty of Dentistry, has been elected president of the Royal College of Dentists of Canada for a two-year term.

The college is the qualifying body for all dental specialists in Canada.

Dr. Lovely, a member of the Dalhousie faculty since 1962, was elected to the presidency at the annual meeting of the college in Vancouver.

A native of East Florenceville, N.B., Dr. Lovely was educated at East Florenceville High School, Mount Allison University, the University of Michigan and Dalhousie.

He was graduated with his Doctor of Dental Surgery degree from Dalhousie in 1959, and from then until 1962 served with the Royal Canadian Dental Corps at the Canadian Forces Hospital in Halifax. He was an assistant professor at Dalhousie from 1962 to 1963, a teaching fellow at Michigan from 1963 to 1974, where he obtained his Master of Science degree, and from 1964 until his return to Dalhousie in 1966 resident in oral surgery at Michigan.

Dr. Lovely became an associate professor at Dalhousie in 1966 and professor in 1970. He was elected a Fellow of the Royal College of Dentists on Canada in 1969, and has served on its council since 1970. Last year he was vice-president.

Dr. Lovely is head of the department of dentistry at the Victoria General Hospital, consultant in oral surgery to the Izaak Walton Killam Hospital for Children, Halifax Infirmary, Camp Hill Hospital and the Canadian Forces Hospital. He is president of the Halifax County Dental Society, a councillor of the Canadian Society of Oral Surgeons, and a member of the Nova Scotia Dental Association, the Canadian Dental Association, the

Dr. F. W. Lovely

Canadian Hemophilia Society, the International Association of Oral Surgeons, the Association of Canadian Faculties of Dentistry and the Chalmers J. Lyons Academy of Oral Surgeons.

Dr. Lovely, who has done research work sponsored by the American Cancer Society and by the Medical Research Council of Canada, is the author of a number of articles and reports published in dental and medical journals.

He is married and has three children.

The Royal College of Dentists of Canada has its head office in Toronto, and since it was incorporated in 1965, has conducted examinations for dental specialists in Canada since then. A major objective of the college is to maintain quality control in the dental specialties. Another is to achieve portability of specialties from province to province without the necessity of dental specialists having to write examinations anew if they move to another province. Some provinces now have reciprocal portability agreements.

## Former ambassador diplomat-in-residence

Blanche Margaret Meagher, former ambassador to Sweden and senior diplomat with the Department of External Affairs has been named a Foreign Service Visitor at Dalhousie for the 1973-74 academic year.

Her visit has been made possible through the federal government's academic relations program which is designed to foster mutually beneficial relationships between foreign policy makers, academics and senior students who are particularly interested in and knowledgeable about foreign affairs subjects.

As a diplomat-in-residence she will spend much of her time in the Centre for Foreign Policy Studies. She intends to study, audit some of the courses offered, and during certain lectures and seminars contribute to the extent that she can, of her knowledge of how foreign policy is made and practised.

While in Halifax she also plans to speak to interested groups and visit political science departments at other Atlantic universities.

Miss Meagher joined the Department of External Affairs in 192 and served at its Ottawa headquarters and the Mexican and London offices.

She served as Canadian ambassador to Israel and Austria. From 1962-66 she was named the Canadian representative to the Board of Governors of the International Atomic Energy Agency in Vienna.

Margaret Meagher

She was accredited as Canadian High Commissioner to Kenya and concurrently to Uganda in 1967 before being named Canadian ambassador to Sweden in 1969.

In addition to her assignments in diplomatic missions abroad, Miss Meagher has also served on the Canadian delegations to many United Nations meetings and conferences.

She holds a master's degree from Dalhousie and in 1970 the university awarded her an honorary doctorate.

## Dental student wins top award

A fourth-year dental student at Dalhousie, David T. O'Connell of Charlottetown, P.E.I. was awarded first prize in this year's national table clinic presentation.

He is the first Dalhousie student to have won the competition.

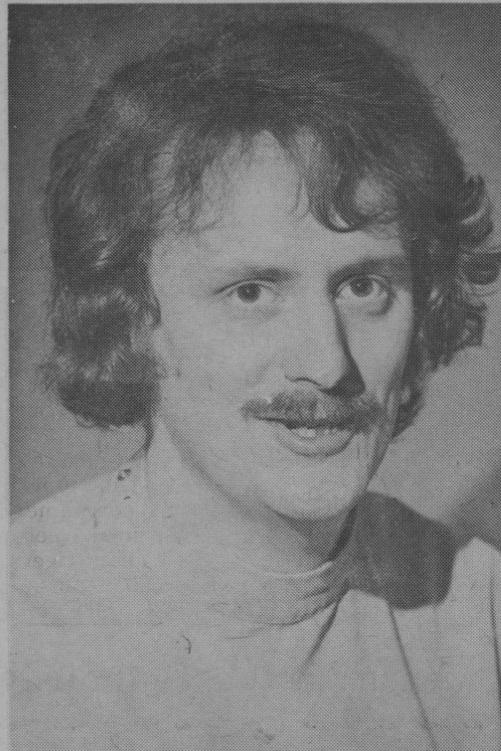

Mr. O'Connell won the competition's technical and clinical application category at the annual convention of the Canadian Dental Association in Vancouver, having won the Dalhousie Dental School competition last spring. His subject was acid etch in restorative dentistry.

The son of Mr. and Mrs. David O'Connell, of New York, Mr. O'Connell was graduated from the University of Prince Edward Island with a science degree. After research work with the federal government, he entered the dental school three years ago. Mr. O'Connell will practice in Prince Edward Island after he graduates next spring.

His presentation at the CDA convention was one of 10, each of the dental schools in Canada being represented.

A table clinic is a table top demonstration of a technique or procedure of dental diagnosis or treatment, and judging is based on content, timeliness, originality, knowledge, skill, clarity of presentation, attractiveness and the demonstrator's personality and department.

The national competition is sponsored through a grant of the Canadian Fund for Dental Education by two dental supply companies in Canada, Dentsply Canada Ltd., and L. D. Caulk Co. of Canada Ltd., and was initiated three years ago. Prior to that Canadian dental students took part in a similar competition in the United States. First prize in each of the two categories (the other is on basic science and research) is \$150.

David T. O'Connell

## Assembly in May

The second Post-College Assembly organized by the Faculty of Dentistry will be held next May.

In addition, the Atlantic Provinces Dental Convention will be held in conjunction with the assembly at Dalhousie.

The assembly dates are: May 12, 13, 14 and 15. Further details will be announced as they become available.

## Three seminars in November

Communications: Leading and Motivating People, and Successful Salesmanship are the subject areas for three management seminars to be offered in November by Dalhousie University's Advanced Management Centre in conjunction with the Atlantic Management Institute.

A communications workshop on Nov. 13 and 14 will lead off the executive development seminars. This two-day meeting will deal with problems associated with understanding attitudes, behaviour and interpersonal relations.

Roy Brookbank, a Dalhousie professor of commerce with broad experience as consultant to private industry and institutions, will serve as resource leader.

Objectives of the motivation seminar on Nov. 20 and 21 will be to improve participants' analytical skills and appreciation of the role that motivation plays. In addition they will gain some insight into their personal leadership styles.

Discussion leaders will be Ronald G. Storey who has extensive experience in management training both in Canada and the United States; and Laird W. Mealiea, a consultant in human relations and counselling. Both lecture on the subject of organizational behaviour at Dalhousie.

A program designed to illustrate new sales techniques, upgrade salesmen's influence on clients and maximize persuasive communication skills, will be the subject of the Nov. 26-27 salesmanship seminar.

Peter Firlotte, a training and development expert and executive vice-president of Kinder, Firlotte and Associates of Toronto; and Alex J. Gregan, authority in sales training techniques and assistant vice-president of Northern Electric, will be on hand as seminar leaders.

# Summer school plans being formulated

Planning for the 1974 joint Dalhousie-Mount Saint Vincent summer sessions is now underway and will conform closely to the pattern set down two years ago when the two universities began a combined program.

In reviewing the 1973 summer sessions, Dr. Tom Parker, director of Dalhousie's summer school reported that in the two combined sessions there was an 18% increase in class enrolment and a 17% increase in student enrolment. One hundred and fifteen classes were offered in 21 disciplines. Of the 112 instructors giving classes, 72 were at the doctoral level and 33 were visiting professors. Their qualifications compared favorably with those teaching during the regular academic term, said Dr. Parker.

Classes which last summer had less than five, or more than 40, students would be closely monitored in the 1974 sessions.

The original proposals put into effect as part of the joint program and designed to improve the quality of service offered to students had proven to be satisfactory he said. Among these were:

- a program projected over a three - year period;
- a projection which offered minimal classes leading to a major in economics, English, French, mathematics and sociology;
- a commitment to offer all courses announced in the program; and
- a service classes offered in some departments.

Highlights of the 1973 program were the Family Life Institute offered at the Mount; math courses conducted by the Canadian Mathematical Congress; a class in comparative education, part of which was conducted at the University of Bristol, England; and a course in English for speakers of French, made possible through the federal government's Second Language Bursary Program.

## Dr. D.A. Eisner elected to council

Dr. Douglas A. Eisner, lecturer in dentistry at Dalhousie University, has been elected to the council of the Royal College of Dentists of Canada.

Dr. Eisner, a Fellow of the college since 1967, was elected to the council at the college's annual meeting in Vancouver.

A native of Montreal, Dr. Eisner was educated at Lawrencetown, Annapolis Country, High School, Acadia, Dalhousie and Toronto universities. He obtained his Doctor of Dental Surgery degree from Dalhousie in 1955 and his Diploma in Orthodontics from the University of Toronto in 1960. He served with the Royal Canadian Dental Corps, from 1955 to 1958, joining the Faculty of Dentistry at Dalhousie in 1961.

Dr. Eisner is a member of local, regional and national dental organizations, and has been president of the Halifax Country Dental Society, the Nova Scotia Dental Association, and is president-elect of the Canadian Association of Orthodontists. This year he was also elected a member of the health council of the Canadian Dental Association. In addition, he is a member of the American Association of Orthodontists, the Northeastern Society of Orthodontists, the Atlantic Orthodontic Society, and the Toronto Orthodontic Study Club.

Joan Selig receives a special award from Jack Gray. At left is Dalhousie physical education student and basketball star Wendy Moore, a member of the 1973 Nova Scotia Canada Games ladies softball team.

## Top athlete honored

The selection of a top athlete in any sport or any geographic area is a difficult task. There are many top flight athletes in Nova Scotia, and in all too many cases they do not receive the plaudits they richly deserve.

Joan Selig, a third year physical education student at Dalhousie, has for a number of years, despite her youthfulness, been a dominant figure on the provincial sports scene.

Jack Gray, president of the Nova Scotia Softball Association, feels Joan is the province's best, and he has singled her out for a special award. In presenting the special John E. Gray Award to Miss Selig, Mr. Gray referred to her "as the finest female athlete he has ever seen in local, provincial and national participation."

And Gray has seen many in his years in amateur sport. For 25 years, president of the Nova Scotia Softball Association, a member of the Halifax Recreation Commission, Central Region sports director, a director of Sport Nova Scotia and sport chairman for the 1969 Canada Games, he is in a position to judge athletic talent. This past year he was selected as the first winner of the Sport Nova Scotia Amateur Sport Executive of the Year Award.

It is somewhat unique that Miss Selig is not even remotely involved with softball, Mr. Gray's number one sport. But Miss Selig is a unique athlete.

She was on the Nova Scotia track and field team in the 1969 Canada Games, a member of the provincial field hockey team for both the 1973 Canada Games and the national championships, and in addition to being an outstanding member of the Dalhousie Tigerettes varsity field hockey and basketball teams, was

selected to represent women's basketball as a delegate at the 1972 Olympic Games in Munich.

In her second year of high school, at Halifax's St. Pat's, she was named the most valuable player for both field hockey and volleyball and was selected as outstanding female athlete. The following year at St. Pat's she was again named outstanding female athlete, as well as most valuable player for basketball and was selected to the Nova Scotia high school all-star basketball team.

Enrolling at Dalhousie in 1971, she was awarded a Federal Government Athletic Grant-In-Aid for basketball and field hockey, and in her first year was named to the Canadian junior field hockey all-star team.

Last season she was a member of Dalhousie teams that captured both the Maritime intercollegiate field hockey and basketball titles. At an invitational intercollegiate basketball tournament at Loyola University, Montreal, she was chosen as the outstanding player.

In presenting the award, Mr. Gray said: "Joan Selig represented the true definition of an amateur and her outstanding performances were indicative of what a dedicated amateur attempts to do and achieve."

Mr. Gray added that his time in amateur sport is slowly running out, "but I can leave knowing that I have recognized this outstanding young athlete."

The award was presented to a closing banquet for the 1973 Nova Scotia junior ladies softball team which represented the province at the Canada Games in Burnaby, B.C.

## Lottery to assist arts, sport

Nova Scotia's non-profit amateur sport, recreation, art and cultural organizations are the direct beneficiaries of a provincially-sanctioned lottery which is being administered jointly by the Nova Scotia Festival of Arts and Sport Nova Scotia.

Known as the Nova Scotia Derby, the lottery will include three 'early bird type draws' culminating in a grand prize draw based on the 1st annual Nova Scotia Derby.

Prizes will total \$50,000, with the holder of the tickets will be sold at \$1.00 each, with 50¢ being retained by the authorized agency.

Provincial Secretary A. Garnet Brown, the minister responsible for administration of the Lottery

Regulations, sanctioned this means as a self-help vehicle for non-profit, amateur sport, recreation, art and cultural organisations, following development of the program and its submission over a year ago by Sport Nova Scotia.

"We feel that many organizations will take this opportunity to raise funds for their projects. Depending on this year's results, they should be able to budget their activities and eliminate a great deal of individual appeals for assistance," says Nova Scotia Derby chairman, R. Cameron Grout.

The Nova Scotia Derby's executive committee is appointed by the boards of directors of both the Nova Scotia Festival of the Arts and Sport Nova Scotia.
