Dr. El-Hafid Tabet-Aoul
77 rue de l'Eglise
75015 Paris
France

Dear Dr. Tabet-Aoul,

Please find enclosed two documents which Elisabeth Mann Borgese wanted you to receive (see attached copy of letter). I apologise for the delay in their being sent, but somehow the fax Elisabeth sent us asking us to do this on her behalf never reached our office. We only discovered the existence of her fax recently, hence the lateness in getting the documents sent.

I do hope the delay hasn't caused any inconvenience.

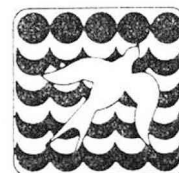

Yours sincerely,

Madeleine Coffen-Smout
Programme Assistant

FAX No.: 1 902 868 2455

Date: May 30, 1994

Subject: Things

Dear Margaret,

Everything fine.

The sculpture arrived without difficulties. Nobody bothered. I hope we can sell it!

Here is a note I wrote to that Mr. Tabbet-Aoul. Could you please mail to him the two documents I indicated in this letter?

I guess that is it for right now.

I changed my ticket so as to spend the night in Washington, with Jane Pratt, World-Bankish...

All the best,

Elisabeth

Dr. El-Hafid Tabet-Aoul
77 Rue de l'Eglise
75015 Paris
France

Dear Dr, Tabet-Aoul,

Thank you for your letter of April 15. Sorry to be a little late in answering: I have been travelling a lot since we met in Addis!

I, too, was quite happy with the African leadership seminar, with regard to attendance, participation and commitment. I think we started something which I hope will develop..

Naturally I am most interested in your work on coastal management in the Mediterranean. Have you seen Adalberto Vallega's work?

I am sending you two documents:

the project on the tourist tax, and

a paper I wrote: trying to rewrite the Barcelona Convention the way it would have to be written after Rio, to cope with "sustainable development." For me, that was a very interesting exercise. What is even more interesting is that it became the basis for a proposal just now launched by Malta at the Tunis meeting of experts.

All the very best,

Yours sincerely,

Elisabeth Mann Borgese

Prof. Elisabeth MANN-BORGSTEN

Dear Madam,

I enjoyed very well to have met you at Addis Ababa and the summer was very interesting.

As I told you, I'm preparing for the coming International Conference on Coastal Change - Brestant - France - Feb. '95 - a lecture on Coastal zone management for the Mediterranean basin. I will be very pleased if I may have some documentation on DSI studies in tourism for this region.

Thank you for all and hoping to meet you soon again.

With my best regards,

FACSIMILE TRANSMISSION

To: Mr. Neil Tagare
Fax No 201 505 9033

From: Elisabeth Mann Borgese
Fax No. 1 902 868 2455

Date: August 13, 1998

Subject: Sustainable Sea-bed Development

Dear Mr. Tagare,

I have just read the excellent article in the current issue of *Sea Technology*, and I feel lucky and honoured to have had the occasion to meet with you personally. Certainly, what you are doing shows the kind of vision that one does not encounter often in the business world -- or anywhere else for that matter.

Now I have some very encouraging news.

After careful consideration, I decided to apply to the Global Environment Facility (World Bank, United Nations Development Programme, and United Nations Environment Programme) for a grant of \$10 million which would be supplemented by another \$10 million from the "Pioneer Investors among the sea-bed mining companies, and another 10 million from "Sponsors," including -- if possible -- undertakings such as yours -- and for the reasons explained in the memo drafted by Dr. Saigal. This total would be for a period of five years. The \$10 million from the GEF would include \$55,000 for the preparatory feasibility study, to be undertaken this year. This is the "pump priming" that is needed.

Actually, the role of the International Ocean Institute would be to act as a catalyst. Once the feasibility study is done, the necessary MOUs are signed, etc., the International Sea-bed Authority would become the executing agency. But a catalyst is needed, and I believe, only the International Ocean Institute can do that job.

To my most pleasant surprise, the GEF responded immediately, and very positively and urged me to come to Washington ASAP. I certainly will be there before the end of the month

I thought it would be useful to keep you updated on the development of this project for which you have been kind enough to show interest.

With all good wishes,

Yours sincerely,

Elwin Mann Borghe

INTERNATIONAL ATOMIC ENERGY AGENCY

INTERNATIONAL CENTRE FOR THEORETICAL PHYSICS
I.C.T.P., P.O. BOX 586, 34100 TRIESTE, ITALY, CABLE: CENTRATOM TRIESTE

RECEIVED NOV 29 1991

Prof. Ines Wesley Tanaskovic
Guest Scientist

19 November 1991

Dear Elisabeth,

I hope that you have not forgotten the rare but so pleasant and fruitful contacts that we had in Trieste at several occasions related to the activities of TWAS and women scientists. Later I had written to you and Alex Kwapong when he was at Dalhousie University having the privilege to work with you.

Presently I am a temporary guest scientist at the ICTP in Trieste where I continue to deal with the United Nations University (UNU) programme on Informatics for development. We are holding an International Conference on Information Technology for Social Purposes at the Univ. of Las Palmas in Grand Canary, end November 1991. I am organizing it and I look forward to achieve good results. I have also some contacts with TWOWS, especially with Lydia Makubu.

However to-day I am writing to you on another matter. My daughter Stanka Tanaskovic has been working for 8 years at the ICTP as program officer for international activities. *Enclosed is her C.V.* Although she likes her job here, she is obliged to look for another job somewhere else. Canada would be an ideal country from many points of view, not the least with regard to the tragic events in our own country, Yugoslavia, which prevent my daughter to return to her home. Meanwhile, and that is prompting her to move out of Trieste, an extremely critical financial situation has occurred at the ICTP, which is threatened to be closed definitely in the near future. Staff might be dismissed anytime. *Un malheur ne vient jamais seul!*

4568 84 337

e/...

We have learned from a friend in Ottawa, who has worked for some time at the UNU Centre in Tokyo (Ms. Misa Gratton, Director of Informatics at Statistics Canada) that the International Ocean Institute (IOI) Office in Halifax is advertising for program officers. Ms. Gratton has given to my daughter their address, so that she will send her application immediately.

Since it is exactly an international centre (ICTP), the place where my daughter has been working for many years, she has ample experience in dealing with international activities. Therefore, the IOI or some similar place would be ideal for her. Of course, she would gratefully accept other positions as well, where she could use her skills and work experiences.

Could you, dear Elisabeth, advise us how best to proceed or eventually support my daughter's efforts to find a job. I trust that you will not misunderstand this plea of mine for help. You are aware, I am sure, of the general difficult situation that we all are in, at the present, in our devastated parts of the old world.

Should you wish to contact me, you will find me at the Microprocessor Laboratory c/o ICTP Trieste, tel. (39-40) 224471.

Thanking you in advance for any answer from you,

With the best personal regards,

Sincerely yours
Ines Wesley

9 January 1992

Professor Ines Wesley Tanaskovic
International Centre for Theoretical Physics
P.O. Box 586
34100 Trieste
Italy

Dear Ines,

I found your letter here on my return from Mauritius...

What is happening in your country absolutely breaks my heart. As you know I was a student and great admirer of the Self-management system of Yugoslavia which, I think, was one of the most interesting and important contributions to the constitutional and political post-World War II evolution. And I have so many friends in Yugoslavia, and know how hard they worked and how devoted they were to their ideas and ideals. To see it all destroyed, and to see us back in 1914 is a nightmare; it is a tragedy; it is insanity. And all that totally useless killing and suffering.

I wish I could help your daughter.

But it is not the IOI, it is ICOD (International Centre for Ocean Development) that is advertising for Programme Officers --and they are all Canadian. Nevertheless, I will give your letter, and your daughter's CV to the new President of ICOD, perhaps he can do something.

In the meantime, I hope the news about the ICTP is no longer as black as it was. My understanding is that the crisis was temporary. So I hope your daughter is still there and can remain there.

All the very best for 1992, and much love,

Yours as ever,

Elisabeth Mann Borgese

Lehr Wargentín.

Pehr Wilhelm Wargentin (1717–1783) var Kungl. Vetenskapsakademiens sekreterare under 34 år från 1749 och förenade detta ämbete med befattningen som akademiens astronom. Wargentins uppgift blev att nästan från grunden bygga upp den unga akademien samt att uppföra och förestå Stockholms observatorium – akademiens första vetenskapliga institution. Han räknas även som en av den svenska befolkningsstatistikens grundare.

Pehr Wilhelm Wargentin (1717–1783) was Secretary General of the Royal Swedish Academy of Sciences for 34 years, from 1749. He combined this office with the position as the Academy's Astronomer. Wargentin's first task was to establish the recently founded Academy and at the same time build and head the Stockholm Observatory – the Academy's first scientific institute. Wargentin is also regarded as being one of the founders of Swedish population statistics.

Sehr verehrte, liebe Elisabeth Mann-Borgese,

darf ich mich in Erinnerung bringen: vor fast zwei Jahren, als ich mit Susi Stehli Ihretwegen nach Holland kam, wurde mir das Geschenk zuteil, Sie kennenlernen zu dürfen - ich zehre noch heute davon!

In diesem Jahr erschien dieses so schöne, lebendige Buch über Sie - ich las es sofort mit größtem Interesse und freute mich, daß auch Nico darin einen Platz einnimmt!

(Inzwischen ist sein Liederzyklus im Druck; bei Herausgabe geht sofort ein Exemplar an Sie.)

Nachdem ich mir die WDR-Fernsehsendung mit Ihnen - Sie wurden in deren Verlauf auch als Klavierlehrerin Ihrer Hunde befragt!!- nicht entgehen ließ, nun zum Filmereignis dieses Jahres, dem Werk über Ihre Familie: es stellt eine filmische Höchstleistung dar ; das Einzigartige an dem Film ~~eben~~ ist Ihr wunderbares Mitwirken darin! Diese Fundamental-Idee, als Krönung Sie "auftreten" zu lassen und Ihr Einverständnis, es zu unternehmen, machen den Film zu einem kostbaren Dokument für Generationen.

Nehmen Sie meine Stimme als eine von vielen, vielen, die Ihnen zutiefst Bewunderung und so uneingeschränkt Sympathie entgegenbringt!

Im Zusammenhang mit dem Filmgeschehen kam mir wieder in den Sinn, daß ich vom Bodensee aus, wo meine Mutter wohnte, Ende der sechziger Jahre einmal Ihre Frau Mutter Katia Mann in Kilchberg zur Tee-Stunde besuchen durfte! So beeindruckend, anregend, zauberhaft bleibt mir dieser Moment in meinem Leben unvergeßlich!

(Ich berge noch heute zwei handschriftliche Postkarten von Ihrer Frau Mutter, die sie mir wegen Terminabsprachen schickte!)-

Weiter darf ich Sie nun wirklich nicht aufhalten- nehmen Sie zum Schluß meine besten Wünsche zum Jahreswechsel

und herzliche Grüße,

C. O. M. A. N

97274 Leinach/Wuerzburg
Germany

Liebe Edith Thauer,

Vielen Dank fuer Ihren lieben Brief, der mich sehr gefreut hat. Es ist natuerlich schoen, dass der Breloer Film solchen Anklang findet!

Auch ich denke oft und gern an den Abend in Tilburg. Es war ein besonders gegluецktes Ereignis, und es war so nett, Ihre Bekanntschaft zu machen.

Susi habe ich seither leider nicht mehr gesehen. Ich bin in Zurich immer nur so ganz kurz. Hoffentlich aber wird es trotzdem einmal klappen. Sie hat mir sehr gut gefallen.

Jetzt freue ich mich auf mein Exemplar des Liederzyklus.

Im Maerz bin ich wieder in Deutschland -- aber nicht in Ihrer Gegend. Ich habe eine Vorlesung in Muenchen am 1. Maerz, und eine weitere in Berlin, am 4. Maerz. Und dann geht es nach Japan.

Den ganzen Februar bin ich in meinem geliebten Engadin, zum Skilaufen. Hoffentlich gibt es bis dahin Schnee dort!

Mit allen guten Wuenschen,

Stets Ihre

Dear Dr. Borgese,

I am a local freelance designer and I'm writing to you on the suggestion from Bobbie Carter at Dal Public Relations. We were discussing the various areas of specialization for design work and I had mentioned my interest in projects that concern the topic of medicine and sciences.

I understand that on occasion you have enlisted the services of outside designers, or you have expressed potential interest, and I would like to ask you to consider me for any future projects. I am hoping to expand my contact with the medical and sciences community in this city, and I have undertaken such design work in the past. To list a few past projects, I have done work in various capacities for:
The Canadian Consensus Conference on High Blood Pressure
Dominion Biologicals
Innovations Magazine (N.S. Dept. of Trade and Technology)
IWK Hopital
VG Hospital Foundation

If you wish to review my portfolio, or if you have any other questions, please do not hesitate to call me at 423-9582.

Sincerely,

A. Martin Thibodeau, B.Des., LGDC

FACSIMILE TRANSMISSION

To: Herr Professor Dr. Joern Thiede
Fax No 49 471 483) 149

From: Elisabeth Mann Borgese
Fax No. 1 902 868 2455

Date: January 16, 1999

Subject: International Ocean Institute

Sehr verehrter Herr Professor,

Vielleicht sind schon Geruechte zu Ihnen gedrungen, ueber Bestrebungen, ein *Operational Centre* unseres Internationalen Ozean Institutes an der Universitaet Bremen auf die Beine zu stellen.

Wir haben solche *Centres* bereits in 10 Laendern (Canada, China, Costa Rica, Fiji, India, Japan, Malta, Romania, Senegal, South Africa) -- und warum eigentlich nicht in der Bundesrepublik? Es waere doch schoen und nuetzlich. Wir haben ein recht umfassendes Programm, was fuer alle Teilnehmer interessant und nuetzlich ist: *training programmes, research programmes, publication programmes, Conferences, leadership seminars, alumni activities, etc.*

Abgesehen von freier Zusammenarbeit, von einer gemeinsamen "Philosophie" - die des *Common Heritage of Mankind* -- inspiriert, sind unsere *Centres* voellig autonom und sollen sich besonders auch lokalen und regionalen Problemen widmen. Alle unsere *Centres* sind in hoch angesehenen nationalen oder regionalen Lehr- und Forschungs-Institutionen untergebracht. Wie Sie sicher schon wissen, sind wir nicht ein ozeanographisches Institut, sondern ein *policy research* Institut, das aber enge Zusammenarbeit mit den ozeanographischen Wissenschaften zur Voraussetzung hat.

Nach Beratung mit Deutschen Kollegen und Behoerden, hat unser Rat beschlossen, unsere Jahreskonferenz, *Pacem in Maribus*, im Jahr 2000 in Hamburg abzuhalten. Die Vorbereitung dieser grossen Konferenz, ueber das Thema, *The Century of the Ocean*, waere die erste Aufgabe des IOI Bremen. Es besteht daher ein gewisser Zeitdruck: Wir muessten wirklich IOI Bremen im ersten Halbjahr auf die Beine stellen, damit es dieser Aufgabe gerecht werden kann

(selbstverstaendlich mit unserer Hilfe und Mitarbeit).

Sehr verehrter Herr Professor, Ihre Mitarbeit an diesem Unternehmen waere fuer uns von groesster Wichtigkeit. Ich wuerde daher gern ein Treffen vorschlagen. Fuer mich waere es am besten am Freitag, den 19. Februar, oder auch am Samstag den 20. Ich wuerde vorschlagen, wir bitten zusaetzlich die folgenden Kollegen zu dieser Besprechung: Nikolaus Gelpke (*Mare* Herausgeber, und ein Mitglied des IOI Governng Boards); Professor. Hempel; Professor Suess; Professor Wolfrum, und den Direktor des Meeresmuseums in Stralsund. Das waere eine sehr repraesentive Gruppe, aber klein genug, dass sie in einem, oder hoechstens zwei Tagen etwas konkretes erreichen kann.

Per Post schicken wir Ihnen nch einige Unterlagen mit Information ueber das IOI. Ich waere Ihnen sehr dankbar fuer eine baldige Antwort.

Mit allen guten Wuenschen, besonders auch noch fuer 1999,

Ihre

Dr. Hubert Thierry
1 Avenue de Budé
1212 Geneva
Switzerland

Dear Dr. Thierry,

I shall be in Geneva next week and shall certainly try to get in touch with you. In the meantime, however, I would like to ask for your advice and, if possible, help in the following matter. Our great mutual friend, René Jean Dupuy encouraged me to do so.

I think you will find all the necessary information about our Institute in the material that will reach you very soon from Malta (where we have our headquarters).

We are now trying to raise an Endowment fund, to insure the independence and continuity of our activities.

We started in Japan -- I think, quite successfully.

Our Endowment plan provides for several segments. The largest one is for our annual conference, Pacem in Maribus, which we would like to see endowed, let us say, like the Pugwash Conference. We need five million dollars for that. A Japanese donor told us he would seriously consider to contribute half this endowment (\$2.5 million) if we could raise the other half from another source or other sources. We are now working on this.

The second big component of the Endowment plan concerns scholarships. To endow a scholarship in perpetuity requires \$100,000. Our ambitious goal is to raise 60 such scholarships (each named after the donor) -- ten for each of our operational centres. Thus far we have two, with the possibility of adding one every year from the funds contributed annually from our Swiss donor.

Now we would start the Endowment drive in Europe and North America as well: I think our efforts should focus on the private sector since most Governments and funding institutions are not in a position to contribute to an endowment. They are project oriented.

Could you give us some good advice as to where to look for scholarship endowment in Europe and North America? How do you like the Endowment Plan -- would you

FACSIMILE TRANSMISSION

To: Joan Thomas
Fax No 876 929 6733

From: Elisabeth Mann Borgese
Fax No. 1 902 868 2455

Date: May 31, 1998

Subject: Seminar

Dear Joan,

We have been out of touch for quite a while.

This is just to confirm that everything is in good order for the seminar on August 24 and 25. I have secured the participation of the best possible experts,

Dr. William Dillon, NOAA, is heading NOAA's methane hydrates project;

Dr. Alexander Malahoff, University of Hawaii, is one of the chief explorers of the deep-sea geology and its minerals;

Mr. Lyle Glowka, of IUCN, Bonn, is one of the best specialists on the genetic resources.

Most certainly quite a few people from the Secretariat will be interested, starting with Mr. Nandan himself, and including Mr. Nii Odunton, Mr. Kaiser de Souza (their geologist) and Mr. Anthony Jones (their biologist). There are also people from the University who should get invitations. Perhaps you could discuss it with Ivan Goodbody.

We are getting the air tickets for the three main speakers, we are putting them up at the Pegasus. On the other hand, if the Government, as co-sponsor of the seminar, would be willing to take care of them while in Jamaica, that would of course be excellent.

I imagine the procedure as follows: The seminar should be conducted on both evenings from 18:00 to 20:00. The first evening would focus on the hydrates and the other nonliving resources.

Some of this discussion should be carried over to the second evening; the genetic resources should have one hour and a half the second evening.

On both evenings, a simple buffet supper, with drinks, and a cash bar, should be served at 20:00. The manager of the Cafeteria of the Conference Centre arranges that beautifully and inexpensively. When we had our last reception there, for the Delegates and the participants of our training programme, the whole thing cost only US\$960, and it was beautifully done. I think there will be more people this time, but certainly the cost will not exceed US\$1,500. I would suggest that we pay for one evening and you pay for the other. Is that an acceptable format?

I think the seminar will make a most useful contribution to the study which some Delegations of the G77 have requested from the Secretariat, and the Secretariat welcomes this contribution.

All the best, and please do let me know whether these proposals are acceptable.

Yours as ever,

My warmest regards to Dr. Ventura and to Minister Hylton and, of course, to Ambassador Don Mills.

To: Rachel Thompson
Fax: 416 203 7837

From: Elisabeth Mann Borgese
Fax: 1 902 868 2455

Date: October 5, 1997

Subject: Your communication of 12 September

Dear Rachel Thompson,

Sorry to be late in answering your letter of 12 September. The fact is: I did not quite know what to do about it.

I see that you are interested in the taxing authority given by the Law of the Sea Convention to the International Sea-bed Authority, but I don't see how I can fit that into the format of your "successful practice" page!

I could give you a success story about our International Ocean Institute, but while the Authority's taxing power sets a very important legal precedent in international law -- the story of the International Sea-bed Authority, alas, is not much of a "success story"! It will have to be seen how "sustainable" that Authority will turn out to be!

We certainly want to help you with your project in any way we can. So please do let me know what we can do.

With all good wishes,

Yours sincerely,

1 Rue Maurice Arnoux
92 120 Montrouge, France

Dear Mr. Tian,

Thanks for your letter of June 22.

Unfortunately neither ICOD nor the International Ocean Institute are able to help you directly.

I have passed your letter on to the Oceanography Department as well as to the Bedford Institute.

I wish you the best of luck.

With all good wishes,

Sincerely yours,

Elisabeth Mann Borgese

July 21, 2000

Professor James Tobin
 Department of Economics
 30 Hillhouse Avenue
 Yale University
 New Haven, CT 06511, USA

Dear Professor Tobin,

First of all, I should like to introduce myself. I am Founder and Hon. Chair of the International Ocean Institute (we now have "Operational Centres" in 12 countries, all hosted by prestigious local institutions). A short description of the IOI is enclosed herewith. For your convenience, I am also enclosing a short CV of mine. I am Professor of Political Science and Adjunct Professor of Law at Dalhousie University.

Next, let me point out that I have long been an admirer of yours and your highly inspirational proposal for the "Tobin Tax."

This concept, I think, is today even more important than it was when you first proposed it. With "globalization," etc. the time for international taxation is inexorably drawing nearer. The World Bank, the United Nations, the developing countries, all are clamouring for "innovative methods to create new and additional funding" for the realization of all the beautiful development & environment plans which are stagnating because of lack of funding. The time has come to look at your proposal again. There is a lot more money in it today than when you first put it forward; and technologies to computerize and control the process have improved thousandfold.

I wonder what you would think about a pilot-scale experimental application of your proposal or some variation of it.

We have been doing a lot of work with the International Sea-bed Authority (in Jamaica), which is responsible for the management of the International Sea-bed Area, beyond the limits of the legal continental shelf. This international area is now being traversed by an incredible number of fibre-optic cables carrying a communications traffic worth -- already today a trillion dollars a year, and likely to double in a short time.

Since the Authority will have to regulate coordinate the laying and repairing and disposal of these cables, or their re-use for permanent deep-sea observatories, whose number is also

growing, it is only fair that the Authority should be compensated for this supervisory activities. If these companies were to pay only 0.001 percent of the value of their transactions, the whole development-environment picture in the world would change. This would indeed be an innovative way to generate new and additional funding to assist poor countries in the effective implementation of the whole UNCLOS/UNCED programme!

This becomes all the more logical and urgent since the United States is going to impose a quite substantial "rent" on the cable companies for permission to pass the cables through the US EEZ. I was told this just now by a senior staff member of NOAA.

With this background information, let me now come to the gist of this letter.

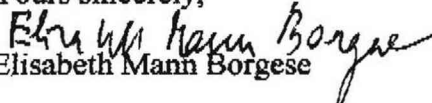

The International Ocean Institute is about to launch a new, very ambitious and exciting project as a contribution to "capacity building" mandated by all the UNCLOS/UNCED Conventions, Agreements and Programmes. This IOIVU will integrate the training programmes of all our Operational Centres as well as the ocean-related programmes of their host institutions, to build an internationally recognized, interdisciplinary Master's degree in ocean affairs and the Law of the Sea, accessible to any qualified student anywhere in the world. Including all this network, which is open-ended -- we welcome other institutions that wish to participate -- we will use combination of high-tech distance-learning technology with internship and traditional on-campus learning. The programme is co-sponsored by the United Nations University, UNESCO/IOC, the World Maritime University (IMO), and the United Nations Peace University in Costa Rica. We are just now entering into a partnership agreement with the Nippon Foundation in Tokyo and plan to have the first students enrolled in September, 2001. We are in the process of preparing a number of "core courses" for delivery "on line." At least one of them will deal with ocean-related economics. It is for this course that we would like to ask you for a videotaped interview or conversation, or, better, a little talk of yours, revisiting your proposal in the new context.

I know how extremely busy you must be. A look at the "Tobin tax" web site makes it quite clear that your proposal is having a "renaissance." It would not take you very much time, however, and it would be absolutely precious for our students worldwide. Could you be so very kind and generous as to do that? The purpose really is to enhance this our common cause.

If you will let me know soon, we would then make all the arrangements.

With all good wishes,

Yours sincerely,

Elisabeth Mann Borgese

Fax: (203) 432-6167

email: james.tobin@yale.edu

Office hours: No office hours, but stop by or phone Pam Baldwin or me, to arrange appointment

Research: In my career as an economist beginning in 1939, I have done research and writing in several fields: macroeconomic theory and policy; money and banking; public finance; consumer behavior; welfare economics; rationing; portfolio selection and asset markets ("q" ratio), economic growth; investment and capital accumulation; inequality and public policy to ameliorate poverty (negative income tax); econometric method ("tobit analysis"); international monetary system ("tobin tax"). At present, I am actively interested in social security and medical care, and in international monetary reform.

Teaching: I am no longer teaching. Over the years, I taught courses in general economic theory, macro theory and policy, economic growth, money, statistics and econometrics. After my retirement in 1988 (then compulsory at age 70) I occasionally taught undergraduate courses and seminars, most recently in spring 1998 on The American Economy in My Lifetime, for which I attach the syllabus [see syllabus].

Dear Dr. ELISABETH Mann

(Ref. your letter March 15, subsequent telegram and fax)

I approached Dr. Noboru Hamada, President, Japan Marine Machinery Development Association developer, sail-assisted ships and most qualified for your panel, but unfortunately his schedule prevents his attendance, though he gave me copy of texts (entitled A FEW PROPOSALS ON THE SHIP TECHNOLOGY FOR THE 21ST CENTURY and MODERN SAIL-ASSISTED COMMERCIAL VESSELS) prepared for other colloquium. I send you by airmail the papers mentioned above I believe useful for your panel discussion. I hope you could accept them for his substitute. Because I approached later shipbuilders where couldn't find anybody available.

Sincerely yours

Dear Mr. Tolentino:

Thank you for your letter of July 12.

Pacem in Maribus XIX is not going to be a course but a conference, like the rest of the series. I am enclosing some information about Pacem in Maribus XVIII so you see the format.

It is very likely that Pacem in Maribus XIX will take place in Lisbon. We will keep you informed.

Our training programmes are another part of our Institute's activities. I am enclosing some information about these programmes as well.

With all good wishes,

Yours sincerely,

*Elisabeth Mann Borgese
Professor*

Dear Dr. Mann Borgese:

We have recently completed a review of our active files and note that our contribution of \$10,000 for the publication of the English proceedings of the conference Pacem in Maribus XVII is still outstanding. Our last note to file indicates that your plan was to submit the manuscript to the publishers in October 1990 and its release was expected by the end of 1990. We would appreciate receiving information as to the present status of the project. In the event the publication has been issued, we would ask you to complete our final report form and forward it to us together with two copies of the book. Another copy of our final report form is enclosed for your convenience.

To ensure proper follow-up procedures, we would request a reply by the middle of July.

Dear Dr. Borgese:

I wanted to let you know how much I enjoyed hearing you on C.B.C. Radio last Friday night. By chance the radio was on and I recognized your name (from the Ocean Yearbook series). It is always interesting to hear about people who lead such wonderfully diverse lives, particularly in this age of rather narrow specialization.

I look forward to reading your book, and hope if you are ever on the west coast of Vancouver Island you will be able to visit the Bamfield Marine Station.

Sincerely,

Leigh-Ann Topfer,

FAXED

FACSIMILE TRANSMISSION

To: Dr. Klaus Töpfer
Executive Director
Fax No 254 2 622 788

From: Elisabeth Mann Borgese
Fax No. 1 902 868 2455

Date: September 10, 1998

Subject: Ref.2921/98 [2507/98]

Dear Dr. Töpfer,

I was delighted to receive your letter dated September 23, and I can assure you that I agree with all the points you made.

No doubt, the effectiveness of a global "ocean assembly" will depend largely on how solid the regional components are. Probably more than anybody else, I have been insisting on the importance of regional organisation as a pillar of the whole system of ocean (and coastal) governance. And what is more, it is at the regional level that we will see most progress and most innovation during the next decade(s). The level of the nation state is rigid. Action at the global level is slowed by the rigidities at the nation state level. There is much more elasticity at the coastal-community and at the regional level, and, of course, innovation there will then affect the whole system.

And most certainly, we need a strategy to use the ongoing process for the revitalization of the Regional Seas Programme as a point of leverage for the proposed UN Ocean Assembly. An important element in this discussion is to find the best way to have the Regional Seas regimes represented and actively participate in the Assembly. One fact that has debilitated the emerging system of ocean governance thus far is the *lack of linkages*, on the one hand, between coastal communities and the regional seas programmes, on the other, between the regional seas programmes and the global level.

I believe that the local-regional gap is beginning to be filled by the institution of the Mediterranean Commission on Sustainable Development, which really is an innovation that

would have been unthinkable even a few years ago! All other Regional Seas programmes should learn from this experience!

But effective linkages between the regional seas and the global level have yet to be designed.

On your third point, I think we should have regional "leadership seminars" within each one of the regional seas programmes, to discuss the whole area of "revitalization" which includes the issue of linkages.

These leadership seminars should include representatives of "stake holders" as well as voluntary organisations, etc. That should respond to your fourth point.

On your fifth point, I have sent the proposal to Patricio Bernal, with the suggestion that the establishment of the "Assembly" would greatly facilitate the work of the ACC Sub-Committee. I have also sent it to Hans Corell, whose recent Oslo speech very much stresses the role the GA must play, but he avoids the question of *time*. It seems to me so obvious that the GA simply does not have the time necessary to do the job. Hence the suggestion of the Committee of the Whole

I think the panel you are suggesting to plan the whole course of action is an excellent idea and should be established just as soon as possible.

In the meantime I have mobilized quite a few delegations and Ministries of Foreign Affairs -- and I do think we can get it done. It is, again, a question of time -- if not this year, then perhaps next year, but it would be so good to use the momentum of the International Year of the Ocean.

We have tried our hands at a pre-pre-pre-draft resolution, which I am attaching. The Legal Advisor to the Foreign Ministry of Sweden, whom I met in Jamaica, suggested a few more points. I am attaching her draft as well.

All the very best, and thanks for your support and encouragement.

Yours sincerely,

Elisabeth Mann Borgese

IOI-Malta

Fax no: (356) 247594

Date: 6 February 1991

Dear Elizabeth,

I am sorry to bother you yet again with financial matters, however, I still need some clarification re payments made between January and December 1990 in order to submit information to local auditors.

1. Payments in 1990 to SAIGAL for Cairo course.

According to fax received from Saigal (attached) the balance owed to him as on 01 Jan '90 for EGYPT COURSE was: US\$ 13,500.

From his statement it results that no payment for Egypt Course was made during 1990.

However, in your letter to Mecky dated 20 April 1990 you refer to US\$ 3000 paid to Saigal. Please confirm:

- . was this payment for Egypt Course? if yes:
- . payment was actually made in 1990 or
- . does it refer to "From IOI Halifax in 1989 for Cairo Course" (as per statement from Saigal)

Also please confirm your agreement to Saigal's statement.

Dier Prof. Borgese,

I would like to remind you about a chance of organizing the new magazin "Ecology and Peace" (may be another name). This idea was stated in Prof. Monin's letter to you 25.04.90.

We shall be able to take part in this organization and to provide this magazin with valuable information, first of all - the results of the scientific expeditions in the World Ocean. Such magazin will excite interest of public opinion. Unfortunately we have no free choice of printing-office and any paper. Will you give us help in this occasion? Probably can we find a sponsor?

Please, can you inform us about possibilities and conditions of participation our scientific workers in Rotterdam School?

I take this opportunity to pass you request of Prof. Monin about his book part fee, if it will be paid. Probably you can send the international bank cheque in this occasion.

Sincerely yours

L.A.Tsymbal

Mr. L.A. Tsymbal
P.P. Shirshov Institute of Oceanology
Academy of Sciences of the USSR
23 Krasikova
117218 Moscow, USSR

Dear Mr. Tsymbal:

Thank you for your letter (without date). It must have crossed with two of mine which I sent to Professor Monin.

I told him that his honorarium would be paid by the publisher in November. I also asked him for a couple of small things I still need from him: a one-paragraph note on him, the way he would like it to appear at the end of the book in the section "contributors to this volume." And I also needed a few bibliographical indications which were missing in his text.

The book, which will be very beautiful, will be published in 1992. Dr. Federico Mayor, Director-General of UNESCO, has agreed to write the Preface.

As to your other question, I am not quite clear. Unfortunately we do not have any funds to contribute for the printing and paper. I think you might ask UNESCO. The magazine "Ecology and Peace" might prepare a special issue for UNCED in 1992. I think that would be very very useful.

I am also not sure to what Rotterdam school you are referring. Do you mean the Erasmus University? the Netherlands Institute for the Law of the Sea (NILOS)? That is in Utrecht.

I myself would be more than happy to collaborate with the magazine. Please do keep me informed how things are proceeding and if and when you need an article.

With all good wishes,

Yours sincerely,

Elisabeth Mann Borgese

Please give my warmest regards to Professor Monin.

Liebe Frau Kollegin!

Heute möchte ich kurz auf unsere, für mich sehr anregenden Gespräche anlässlich der Club of Rome-Jahrestagung im vergangenen Jahr in Wien zurückkommen und Ihnen wie angekündigt einige Sonderdrucke über mein Großforschungsprojekt OLGA (Ozeanische Lagerstätten: Geologisch-Mineralogische Analyse) übersenden. Sie haben in Wien darauf verwiesen, daß mittlerweile die Bergbauindustrie sogar an den rezenten Komplexmassivfulderz-Lagerstätten („Black Smokers“ - „Schwarze Raucher“) der Tiefsee interessiert ist und besonders auf die Bismarck-See (Papua-Neuguinea) verwiesen. Die Entdeckung der dortigen, zum Teil extrem zink- und goldreichen rezenten Komplexmassivsulfiderz-Lagerstätten (z. B. Hydrothermalfeld 1 „Wienerwald“) gelang mir 1990. Verblüffend ist dort auch die an die Schwarzen Raucher gebundene artenreiche hydrothermale Fauna, die zahlreiche neue, bisher unbekannte Arten und auch Gattungen aufweist.

Beigelegt habe ich Ihnen auch die Kopie meines letzten Sonderdruckes meiner Arbeit über Die Evolution der Lagerstätten, in der ich u. a. auch auf Weltvorräte verschiedener Metalle eingegangen bin, was für Sie vielleicht ebenfalls ein bißchen von Interesse ist.

Für heute verbleibe ich in aller Eile mit besten Grüßen

Ihr

Mrs. Rexford G. Tugwell

March 24, 1986

Dear Elizabeth

I was sorry not to be able to attend the joint birthday party. How beautiful they both still look! Isn't it a shame that humans do not wear as well as animals?

However, I am still hoping that one of these days I shall find myself visiting all of you at home. I was sick about missing you when you were here in January. I couldn't change my departure date because the evening before my families had planned a super farewell party. Both Tyler and Frank

have been in Washington again
although Franklin is returning
to Ponona this summer - nice for
me because I shall see a great
deal more of them.

I am still a "dizzy dome" but
I am trying to lead a "normal"
life. I am, as the kids say, "into"
watercolor, taking art courses and
painting like mad. Lots of fun!
I am also taking courses in Greek
history, etc. Last month the
"Center" had a group of seminars on
the Constitution. I went to one but
it was a sorry experience. Donald
McDonald, that supervisor, is
now acting Director and has put his
high school drop out son on the payroll
as editor of the magazine!! What is
about the level of the whole operation.

I think of you often and of
the good times we all had.

Love
Grace

Mr. Denis Tytgat
Director General, "Internal Market &
Industrial Affairs
Commission of the European Economic Community
Brussels, Belgium

Dear Mr. Tytgat:

In the course of the last twelve months, we have done a considerable amount of work on the idea of establishing a Mediterranean Centre for Research and Development in Marine Industrial Technology. I am enclosing the project as it now stands. This was prepared for UNIDO and UNEP, and endorsed by the Government of Malta.

We are now entering a second phase, that is, the elaboration of a technical feasibility study. I am enclosing an outline for this as well, and also two communications received from European industrial organisations. You see that the matter is of a certain interest to members of the EEC.

I was particularly interested in the statement, in Dr. Blissenbach's letter, that the EEC has the intention to spend over 3 billion DM for assistance to the countries bordering the southern Mediterranean during the coming years.

Would it be possible to enlist your cooperation somehow in the elaboration and realisation of this project?

I would be most grateful if you could give this matter your earliest possible attention. In case you find interest in the Commission, our consultant, Dr. Saigal would be happy to come to Brussels and to discuss the matter with the persons concerned.

With all good wishes,

Cordially yours,

Elisabeth Mann Borgese

Herrn Doz. Alfredas Tytmonas
Klaipedos Universitetas
Litauische Thomas Mann Gesellschaft
S. Neris 5
Klaipeda
235800 Republik Litauen
Lithuannia

Sehr geehrter Herr Tytmonas,

(ich hoffe, ich habe Ihren Namen richtig entziffert; das Lesen Ihrer Handschrift hat mich etliche Mühe gekostet -- was auch die Verspätung meiner Antwort entschuldigen soll.)

Sie haben es richtig erraten: Ihr erster Brief hat mich nie erreicht.

Alles, was Sie schreiben, ist hoch interessant, aber lassen Sie mich gleich auf Ihre 6 Punkte zurückkommen:

1. Sehr gern würde ich einmal nach Nidden kommen, aber ich bin wahnsinnig beschäftigt, mit meinen Meeren, und bin nicht sicher, ob ich nächsten September Zeit habe. Wenn nicht nächstes Jahr, vielleicht übernächstes!
2. Leider habe ich gar kein Photomaterial. Das hat entweder Stepanauskas, oder Sie finden es im Archiv in Zürich, oder auch in Golos Haus. -Die Böden waren Holz.Wie die Betten standen, kann ich Ihnen so aus dem Stehgreif nicht sagen. Wenn ich die Zimmer sehe, kann ich mich wahrscheinlich erinnern. Die Zimmer waren sehr einfach, mit lackierten Möbeln, ausgestattet.
3. Ich gebe Ihnen gerne meine Erlaubnis, den Aufsatz aus **Impact** als Brochure zu verkaufen. Allerdings bräuchten Sie, Rechtes wegen, die Erlaubnis von **Impact/Unesco** -- aber man nimmt es heutzutage mit intellectual property nicht so genau, besonders, wenn es sich um einen guten Zweck handelt.

International Ocean Institute

P.O. Box 524
VALLETA, MALTA

Telephone: 236596
Telefax: 247594
Cables: INTEROCEAN
Telex: 1946 OCEANS MW

4. Wenn ich nach Nidden komme, komm ich natürlich auch gern nach Memel, an Ihre neue Universität. die Frage ist eben: Wann. Gerne gebe ich Ihnen meine Erlaubnis, **Das Drama der Meere** zu übersetzen -- besser aus dem Englischen; und Sie bräuchten die Erlaubnis des Verlegers, Harry Abrams in New York. Sie sollten an

Dr. Gottlieb, President
Harry Abrams Publishers
100 Fifth Avenue
New York, N.Y. 10011
USA

FAX 1 212 645 8437

schreiben.

Das Buch ist teuer herzustellen, wegen der vielen Bilder. Es ist auch schon ein bisschen alt. Ich habe ein Neueres, ohne Bilder. Vielleicht ginge das besser. In dem Fall müssten Sie die Erlaubnis vom Verleger Harvest House in Montreal haben -- oder machen Sie's ohne! Ein Vorwort würde ich allenfalls gerne schreiben.

5. Ich lege Ihnen ein kurzes curriculum vitae bei, mit Bibliographie, und ein paar Bildchen. Für Michael wenden Sie Sich am besten an seine Witwe, Frau Gret Mann, 7 Orchard Street, Orinda California.

6. Stefan Mann ist der Sohn von Dr. Frido Mann, der mit einer Tochter des Physikers Werner Heisenberg verheiratet ist. Frido ist der ältere Sohn meines Bruders Michael. Sonst hat sich am Stammbaum weiter nichts geändert, ausser dass meine Tochter Dominica Dr. Ettore Guidi geheiratet und sie ein Adoptiv-Töchterchen namens Marta haben (Aus Columbien).

Das wären Ihre 6 Punkte. Nun kommt noch einer von mir:

Ich habe mich vor kurzem mit einem mir wehr wichtigen politischen Anliegen: das in-Kraft-setzen der grossen Seerechts Konvention von 1982, an Ihren Präsidenten Landsbergis gewendet. Ich lege Ihnen meinen Brief bei, in der Hoffnung, dass Sie Englisch lesen können... In dem Brief steht, Litauen soll

Telex: 1946 OCEANS MW

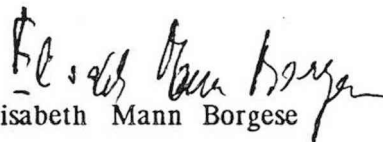

doch bitte diese Konvention ratifizieren. Wir haben jetzt 51 Ratifikationen. Wir brauchen 60. Vor der Befreiung konntet Ihr nicht,; Sie Soviet Union hat nicht ratifiziert. Aber jetzt könnt Ihr! Es wäre eine schöne Geste von Unabhängigkeit und menschlicher Solidarität. Kosten würde es Euch garnichts. Es würde den Umweltschutz in der Ostsee bestärken.

Könnten Sie in dieser Angelegenheit etwas nachschupsen?

Jetzt ist mein Brief schon fast so lang wie Ihrer!

Mit allen guten Wünschen,

Ihre

Lieber Herr Tymonas,

herzlichen Dank für Ihren Brief, das schöne Buch und die faszinierenden Bilder der Niddener Wanderdünen, an die ich mich so sehr genau erinnern kann! Mein Grossvater Alfred Pringsheim erklimm den Gipfel der höchsten Düne an seinem achtzigsten Geburtstag!

Gibt es die Elche noch? Oder hat der tapfere Göring sie alle abgeschossen?

Ich kann Ihnen natürlich viel Material über meine Arbeit schicken, aber Sie müssen ein wenig Geduld haben, im Moment bin ich wahnsinzig beschäftigt. Wir haben wieder einen Kurs hier -- 25 Leute aus Entwicklungsländern, über Seerecht und Meeres-Entwicklung, und das nimmt viel Zeit. Auch muss ich morgen nach New York zur, "Sustainable Development Commission".

Ein bisschen etwas lege ich Ihnen bei. Auch das Programm unseres Political Science Department lass ich Ihnen schicken.

Es ist schade, dass die Ratifizierung der Seerechts Konvention bei Euch stecken geblieben ist. Offensichtlich nicht eine Priorität, und so folgt man eben einfach den Skandinaviern, die ja auch noch nicht ratifiziert haben.

Wir sind aber jetzt bei der Numer 56 angelangt, und die fehlenden vier sind schon identifiziert. Wir werden bestimmt vor Jahresende die Zahl 60 überschreiten, und müssen Ideen für die nächste Phase bereitstellen. Ich lege Ihnen ein kleiner Paper, das ich für den Undersecretary-General der UNO geschrieben habe, mit in diesen Brief.

Ich gratuliere Ihnen zu Ihrer so interessanten Arbeit!

Alles Gute, Stets Ihre
