From Gazette Chronicle -Herald Bureau

Dalhousie University president, Dr. Henry D. Hicks, QC, believes no level of government is sufficiently aware of the staggering problems facing Nova Scotia universities due to spiraling enrolments.

He said, for the first time in its history, Dalhousie would be forced this year to refuse admission to qualified students seeking entry to the faculty of arts and science because there was no room for them.

He said the university might also have to revise plans for its \$7,000,000 Sir Charles Tupper Medical Building - designed as Nova Scotia's contribution to Confederation Centennial memments at all levels provided adequately for the increasingly urgent needs of expanding uni-

"It would cost the city a great Of the grants committee re- deal if Dalhousie did not supply port, Dr. Hicks said: "I was essential services, such as the extremely disappointed to find operation of a hospital and public that the committee had com- health clinic.

"Nevertheless, the city fathers, in their wisdom, have seen fit to reduce grants to the university. At least they can't avoid paying the \$500 per year imposed by statute for the transfer to the city by the university of the building which is now City Hall," commented Dr. Hicks.

The university also suffered from an inequitable system employed by the federal government in the allocation of per capita operating grants to universities. Whereas Ontario universities

received \$280 annually per student, Nova Scotia universities were given only \$180. "If Dalin proportion to its student population, rather than to the pro- charge, vincial population, the difference would be \$350,000 more per year. This would virtually solve our

Campus Welcomes 7,000 During Two-Day Open House

Open House Beckons Smokers

A Medicine Demonstrator triumphantly displays a human lung at Open House last Week. The black object beneath the lung is another lung, a lung suffering from the effects of smoking. The Medicine Section of Open House also boasted a human head, and a human torso. It was well attended.

The Dalhousie University Open House far exceeded everyone's expectations, according to Khoo Teng Lek, Manager of the Open House. The Senate and the Student Council both unanimously passed votes of commendation to Khoo Teng Lek and his Committee for their "outstanding and highly suc-

cessful work" on the Open House. Khoo reported that over 5600 people registered during the two days of Open House. "Counting high school students, approximately 7000 people visited the campus during the Open House", he said.

Among the more popular exhibits were those in the Forrest Building, including displays on human anatomy and Embryology. The demonstrations staged by the Psychology and Physics Depart. ments were also well attended.

The Open House was a success mainly because it attracted such large numbers of people, but also because of the enthusiasm shown by the large number of students and Faculty members taking part, Khoo explained, "The quality and originality of the displays are to be commended", he said.

Khoo reported that the Committee had stayed within its budget, according to the figures which have been submitted thus far. He suggested that the next year's Open House Committee be furnished with an office in which to work,

Several letters of congratula. tions have been received from various sources, and all showing enthusiastic response in favor of

the Open House, Khoo added. Khoo refused to take all the praise, or blame, himself. "There were many who worked to make Open House what it was. an occassion when congratulations and praise for Dalhousie flowed freely".

"Though there must have been over six hundred altogether who did their bit, I should like to express my thanks to each one. And it was just because it was such a huge effort that the contribution of each individual was so indispensible", said Khoo.

Regarding fund-raising campaigns, it was felt a degree of correlation between the different universities conducting them would be essential. And that there should be plenty of advance notice given individuals, business firms, corporations and governments, so plans can be prepared as to how much they should give.

That private means of fund raising should not continue is not even considered even though more help might be coming from government sources. The committee says that universities should never become too dependant on any one source of funds, as it could effect academic free-

World Campus News In Brief

Reins tighten in Spain

All over the world, from California to Khartum, students have been in the forefront of those demanding political reform or social change. The crucial role which they often seem to play in toppling unpopular regimes would make any dictator feel justified in limiting student numbers or denying the extension of educational opportunities to all. For in no other section of society is an intimate understanding of political theory so closely allied with the desire and opportunity for action. President Salazar is wise, therefore, to retain for Portugal the distinction of the worst illiteracy rate in Europe. With more students his regime would be endangered, as was shown a month ago when 80 per cent of Lisbon's students came out on strike in protest at the arrest

Students in Lisbon will at least be able to take courage from the fact that the University of Madrid is also in a state of ferment. Though less overtly political than the Portuguese, the Spanish students and (to their credit) some of their professors, essential duplication of effort." have a political motive in seeking to bring their student union under student rather than official control, for universities without independence are but parodies of their name. Student demonstrations are nothing new in the Iberian peninsula (there is no lack of mon library, to serve in addition subjects) but the police seem to have forgotten nothing about violence and brutality in the last twenty-five years. In spite of the non-violent techniques adopted by the demonstrators, hoses and truncheons have been much in evidence. It would be a pity if, while public attention here is fastened on the rights of the inhabitants of Gibraltar, we were to forget the very basic rights

Protest At Yale...

Yale students last week picketed the university's administration building day and night in protest against the denial of tenure to highly popular associate professor of philosophy. Dr. Richard Bernstein, aged 32.

A possible indication that the students' eloquent protest is being given serious consideration came on Thursday, when the university announced that the Committee on Tenure will reconsider Dr. Bernstein's case.

The professor had been denied tenure the second time, although he was recommended for tenure unanimously by the philosophy department. As in most universities, the tenure decision was made by a university-wide committee which consists of deans, the provosts, and faculty members from many departments, including the candidate's own. Recommendations by scholars of the candidate's discipline at other institutions are also required. At Yale, an associate professor must attain tenure if he is to be reappointed.

Whether Yale's Committee on Tenure ruled wisely or not (and the reasons for tenure rulings always remain secret) the students' protest was in the best tradition of undergraduate concern with their academic life. It also reflected the growing feeling among students across the country that their demands for faculty members with a strong interest in teaching - rather than research and publication - are being slighted. Beyond this, the students charged that the tenure committee discriminates against youth, demanding of young professors an accumulation of scholarly experience.

Last month, The Daily Princetonian, that university's undergraduate newspaper, published an 8-page supplement on the issue, "Publish or Perish." The problem, said the introduction, is "that the effectiveness of a professor, ostensibly paid to teach, is more and more judged by how he fills an entirely different role that of scholar and author."

A recent profile of a 35-year old untenured assistant professor of political science at the University of California at Los Angeles in Life Magazine claimed that, despite highly praised classroom and committee work, he cannot hope to get tenure until he completes a book he is working on.

The issue is not easily resolved. Although the students at Yale charged that the "publish or perish" demand was at the bottom of things, they also said that Dr. Bernstein had already published high - caliber works. They complained that the committee stressed quantity of publication over quality. But since the committee's decision is secret, the possibility of other reasons -

sound or silly - remains. Some observers guessed that Dr. Bernstein's frequent, outspoken criticism of certain academic procedures at Yale may have been held against him.

Why not give greater weight to departmental recommendations? One important reason, based on past experience in some institutions, is that too much departmental power over appointments lead to domination by academic cliques, to the exclusion of rival scholarly views and doctrines.

As for students' pressures, popularity alone is not, of course, a sound yardstick, although many popular professors have also been fine teachers and scholars.

Finally, a tenure committee is faced by the grave responsibility to judge candidates not only for what they are and do at the moment, but how well they will wear over the years. The aggregate of its decisions determines to a staggering extent a university's distant future. Tenure decisions can assure an institution's stability and distinction - or create a storehouse of dead wood.

Possibly new answers might be found in efforts to get committees to give more weight to a greater variety of criteria.

Establishment Chosen For Next Year

At a meeting of the Council of the Students' on Monday, March and World Peace. The conference 15, the face of student government at Dalhousie was determined for was not worth attending for the the coming year. The New Council, exercising its power for the following reasons. first time made the following appointments.

Treasurer of the Council of Students	John Young
Members at Large of the Council	Carl Holm
	Joe Macdonald
Editor of the Gazette	
Editor of Pharos	. Dave Archibalo
C.U.S. Chairman	Jos Williams
SUB Committee Chairman	Garv Hurs
	. Eric Jamieson
President of DGDS	George Munroe
Vice-President of DGDS	. Hugh Cowar
Assistant Treasurers	Randy Smith
Assistant ireasurers	Bob Creighton
Recording Secretary of the Council	
Student Housing Commissioner	Fric Hillis
Photography Chairman	Bob Brown
Second Hand Bookstore Manager	Boh Stevens
Rink Canteen Manager	Chris Objension
Rueinage Managar of 1 DCDS	ornio McCounhor
Business Manager of 1. DGDS B	
2. Pharos	
3. Gazette	Jack rabioi

the preimer's waltz

was this the year that was

This was the year that was. The year that the quality of life at the university. What Her-

Yet to us, the "freeze the fees" program was mayed by the timidity of the Council executive

The year is coming to a close. Graduating students are already trading their corduroys for sheepskin. The past seven months have brought disappointments, realities and determination.

Flouting their campaign promises, the federal government offered Canadian students repayable loans instead of scholarships.

Our provincial government donated even more money to Dalhousie, and now proudly displays its enlightenment to thousands of Nova Scotians still barred from their right to an education, but old enough to vote. Our elected benefactors instituted a minimum wage law, and are now providing employment at even better than subsistance wages; among the underpaid are those who should

The government's blatant refusal to place the peoples votes before the peoples good is not new the students, not the government have changed and for the first time have seen the government.

Students have changed their view of themselves, and of their own roles. Last September, three French Universities withdrew from CUS, to join Quebec's classical colleges in UGEQ (Union Generale des Etudiants du Quebec). While our own leaders wasted time, the French continued to prove the effectiveness and the necessity of their syndicalist concept of the "intellectual worker".

English students, trying to imitate Quebec's new wave of student philosophy, have taken the first crucial step in fighting fee increases. At Manitoba, students marched on the legislature; at Toronto, they presented an alternate fee proposal, and at Dalhousie they talked.

The Canadian Union of Students completed ar- reality.

student government at Dalhousie and in Canada,

emerged from its encrusted provincialism and

began to relate much more directly to the stu-

dents, has had the idea that a national student union should behave much like the activist breth-

ern in Europe, Asia and Latin America. Perhaps,

Canada should foregothe riots and the demonstra-

tions, but nonetheress it should strive to have a much greater voice in the direction of the country.

The major goal of many student politicians in

Canada las been to embue in the students a sense

of identity as members of an academic community

and as citizens in the student community of the

world. In a very real way this has happened in

program has failed. All over the country fees are

going up and with the exception of the University

of Alberta no administration and no provincial

government seems willing to wait for the Bladen

a roaring success. For the first time Canadian

students began to consider the question of a rise in

fees as being incompatible with the university as

a community structure where admission and ad-

vancement should be on the basis of ability to

think rather than pay. At the University of Mani-

toba 1500 students demonstrated before the pro-

vincial legislature to obtain their rights. 1500

students who a year or two ago probably couldn't

have been awakened from their daze if the Second

Coming were to have occurred in the heart of

Winnipeg. Yet today these students are aware of

themselves as more than children of their parents

fitting into a certain strata in society - instead

they see themselves, to some extent at least, as

members of the student community, with a sep-

arate role in society. They have a sense of sol-

idarity with other students in Canada and they

are beginning to think seriously of the role of

the student within the university framework. This

type of student syndicalism has penetrated even

Herrndorf at Dalhousie has been one of atmos-

phere. Certainly first time programs such as the

Halifax Winter Carnival, the Homecoming Week-

end, Open House, etc. have meant a real improve-

ment in the life of the student here at Dal, yet

despite this they are rather ephemeral and the

same programs could easily have been replaced

Perhaps the major achievement of Peter

to the outer regions of the Maritimes.

Commission to report.

Many people have said in the past few weeks that it was a shame that the CUS "freeze the fees"

For some years the Canadian Union of Stu-

rangements for their student means survey, and pleaded for a temproary reprieve from rocketing fees, at least until publication of the Bladen Commission Report on Higher Education; Dean Bladen replied with hints that fees may soon have

Yet the student activity has not stopped. While Maritime Universities have at last admitted (three weeks before exams) that fees are rising again, U. of Toronto, and Western Onaario have announced that fees will be held for another year.

We still deny that the booming student population must force the Administrations to stufftheir "customers" into prophelactic sausage skins, stamped "leaders of tomorrow", but are now willing to do something about it. The universities haven't changed; instead their customers have for the first time seen their Universities, and are ready to begin being leaders of themselves,

We will continue to work in our new social role; for a better government, aware of its duty to lead rather than merely represent; for a median between the Universities as a business proposition, and a creative and vital forge for social progress; and finally so that our own re-evaluation of our place in society will be returned by that society accepting the University as an integral and vital part of its own develop-

We haven't been disillusioned into retirement or defeat. Canadian students introverted idealism becoming history; it is being replaced by their new role in society, working harder for their ideals, in a more clearly defined framework of

rndorf did do, which was a radical departure from

the actions of his predecessors, was to profes-

sionalize student government. Herrndorf is a pol-

itician to his fingertips and as such understands

something of the nature of the proper order of

things. That is, he paid attention to little details

such as the seating arrangement of the Council,

the composition of minor committees, the distinc-

tion between capital and operating expenditure,

even the seating plan at the student government

banquet, these things which though small in them-

selves, add up to competency, were his concern.

Because of this he was able to change the basic

power structure in student government away from

one that was administration oriented, with the

Treasurer an employee of the administration, to

one that is student oriented. The Treasurer next

year will be a student, the Business Manager, if

there is one, will be an employee of the students

and responsible to them. This is the essence of

Peter Herrndorf's professionalism and to us, the

over the proposed demonstration over the fee

increase. Despite claims that the timing was bad

it is our opinion that this was an excuse to hide

the basic conservatism, and even reaction, which

is found on last year's executive. Furthermore it

is clear that Herrndorf spent a little too much

time this term worrying about his image and

playing politics, rather than providing the vig-

orous leadership needed to awaken all the students

on this campus to a sense of student identity. He

seemed afraid to beard the conservatives in the

Council, preferring instead to compromise to the

point of extremism with that Burkean orator, Jos.

The South African program was not as activist as

it should have been (and incidentally it will always

be to the shame of this year's Council that they

were the only Council in Canada to consider the

South African resolution and then defeat it) and

thousands of students are still of the opinion that

university is simply a glorified extension of their

high school. Most student leaders failed to reach

, a good number of students and these students re-

sponded fantastically. If the trend continues the

next few years could see Canada become one of

the leading members of the international student

However in balance, most of them did reach

the bulk of their constituents.

And in Canada there were similar problems.

Mind you, not everything is rosy by any

The Gazette was dis-

measure of his achievement.

stretch of the imagination

the religious scents.....

I think it is time someone stepped to the defense of Richard Litz and his editorial, "Christianity and Christians". First, it is basic to realize

that he was replying to a story written by Misses Drew and Hawgood, on the IVCF conference at the University of

He was replying to assertions that "Man has rebelled against the authority of God and rejected his dominion. In doing so he has cut himself off from the only source of peace and harmony, God himself", that "God created man and gave him a unique position, but demands that man in response should accept His authority", that "it is only the Christian God who loved man enough to conquer death and thus allow man's life to be meaningful", that "It was Rev. ohn Stott rector of All Souls Church in London who pointed out that the Christian God is the only real love", etc.

Litz also had to contend with the statement that "In order for death to have meaning there must be an after-life and, admitting the existence of an after-life admits the existence of God",

Thus he had to cut through a mountain of dogma, curiously similar to the dogma which has caused immeasurable religious persecution and suffering since the first centuries AD. He had to cut without too greatly injuring the sensibilities of Dalhousie's and Halifax's religious population, he had to cut the extremes of the IVCF article. And quite rightly, he chose to do so with humour

It seems then Mr. Felderhof's complaint in the last issue of the Gazette, that Litz cynically refutes Christianity and Christian love, at least on the surface, but does not offer anything constructive or positive" was very much misplaced.

How else could he reply to a claim that only Christian love is real love than by saying, "Christian love is that perfect love that exists between Christians of every colour. They do not resort to acts of violence against man of different colour or race. They love everyone. There is no housing problem for students in Halifax" etc.

As Felderhof says, we cannot assume that "the North American or European continent is Christian in the true sense of the word". But perhaps where the religion of Christianity falters, the ethics of Christianity flourishes.

Neither Litz nor anyone else has any complaint about the ethics of Christianity. However, isn't it interesting that where the religion of Christianity is strongest, eg. in the fundamentalist Southern American states, in Halifax, in Spain, so is intolerance and cruelty to heretics most

That is not to say only Christianity is intolerant when sternly practiced. But Christianity is dealt with because at this time it is the prominent religion in our society.

The IVCF Article was an

example of evangelism, an at-

conviction. By its very nature, it was intolerant and should have been spurned by the college student. Its authors raised debatable

tempt to strengthen religious

points and asserted them as the gospel, indeed they are the

To suggest that death has no meaning unless there is an after-life is extreme to say the least. And in any case, what meaning does it have when there is an afterlife. How can one say it has no meaning, if one doesn't know what the meaning is ... I could just as easily say death has no mear. ing unless one ate tomatoes every day...but I wouldn't persecute people who didn't believe me. However, the most astounding assertion of all is that the

only love is Christian love. Indeed, what about the Christian policemen in the South, the Christian Spaniards in the Middle Ages, the Christian Haligonians today, the Christian missionaries bringing salvation to savages who don't want to be saved. For they are the true Christians in the true religious sense.

Unfortunately, for Mr. Felderhof and Misses Hawgood and Drew, the religious sense is the only one.

a fair deal ••••••

affairs.

great deal of discussion concerning a possible raise of the tuition fees. Before we complain of such a proposed increase, we ought to take a long and careful look at our own student finances. Last week it was reported that the Student Council was in debt, and that a considerable proportion of the final estimate was due to the loss suffered by the recent production of "L'il Abner".

Four years ago the Student Council decided that an additional fee of fourteen dollars would enable all student organizations to receive a sum of money at the beginning of the fall term. This grant would permit them to carry out planned activities immediately without suffering severe losses or necessitating fund-raising processes. The following fall the proposed plan was put into effect and we were issued with the Student Athletic Book. At the time, we were informed that this booklet of tickets would admit us free of charge to ALL student activities if we complied with the rules on the back of the book-

The ruling was followed until this year when someone decided that the students would have to pay to see the DGDS MUSICAL. Some of the senoir members of the Council very evidently had short memories with regard to the original plan, and thus we were charged the same admission as the general public - vet the musical still went into debt!

The point of the matter is. that the student paid money at the first of the year and this should have enabled him to attend the musical without further recompense. As matters now stand, all students have paid at least once to attend the production: if the student fees are raised next year they will be paying twice; while those who could afford to go to the musical will be paving three times if they return next year. It sounds like a profitable business - then why are we not making any money? Two years ago, with the conditions approximately the same as they were this year, the students were not charged admission at the door and the musical had a proft for the first time in a number of years!

This does not mean that the annual DGDS production is not

suffer a loss: it is essential to the spirit of the university. However, we allow matters like this to pass unnoticed, yet as soon as the Administration says that an increase in fees might be necessary, we protest vigorously. Before we condemn those who know the financial situation of the university, we ought to take a careful look at our own financial

At the first of the year the Council was proud to announce that it had a surplus larger than any other Canadian university. Less than five months have passed since that statement appeared, and we have incurred a sizeable debt. Those who apportioned the money must have lacked financial foresight. The debt resulted in spite of the fact that there was a larger enrolment this year and more money with which to work. The surplus at the first of the term should have enabled us to see some positive results (with respect to student activities and facilities). The glaring fact of the matter is that each student has received LESS.

What happened to the proposed Student Union Building The freshmen of 1960 were told that they would likely see the commencement of the longawaited SUB during their graduating year or the year following. 1965 has arrived, the SUB is still a dream, and at this rate it will always be a dream.

Undoubtedly the situation has other facets of which we are not aware. The ignorance may stem from the fact that the students simply have not been informed, or it may be the result of the fact that the authors of this article belong to the Forrest Campus, which seems to be deprived of the privilege (?) of receiving the Gazette regularly. We are presenting the problem as we see it in the light of our four previous years at Dalhousie. We are as concerned as everyone else about an increase in the tuition fees for the next and following years. The point is, that if we can allow the Student Council to raise its fees for recreational purposes, then we can certainly allow the Administration to raise the tuition fees for the betterment of our education. After all, is not a higher education the primary reason for which we are here:

the estrangement

It is becoming an unfortunate reality in this University that the distance between the student and the lecturer is increasing by the year. A majority of the undergraduates have no personal contact with their teachers, or for that matter with their university. A majority of these same undergraduates and many members of the faculty function daily under a system of strictly defined obligations. The student is financially obligated to pay set fees for the privilege of attending, and their reward is measured in terms of academic success that epitomizes itself in the form of a degree. The faculty, on the other hand, is obligated to the administration to supply their classes with the systemized knowledge that constitutes a given course. Their reward is measured interms of their ability to do this. As long as this objective system of "obligations" continues, the gap separating the student from the teacher, and both from the institution that they meet in, will undoubtedly broaden. Without the benefit of close personal contact, the university course becomes little more than a correspondence course, and the lecture

little more than an informative recording.

Why, then, does this breach exist? Why has nothing been done about this? The answer may be found in the failure of many connected with the University to manifest a true sense of responsibility beyond that of merely serving their obligations, Let us look at the human components comprising this institution for a clue to the situation.

The student is the largest body and the most basic unit. It is no secret to anyone who has attempted sincerely to achieve some social goal within the institution that this group is infected with an indifference that renders them ineffectual. Where can the essence of this apathy be found? Why are very few of the undergraduates' actions after class not related to the university. It may be found in the absence of personal involvement with an academic spirit that will relate them to the university life. In this absence, the student contentedly follows and serves the minimal requirements of his obligations.

Amongst many members of the faculty, that attitude often appears that extra-classroom involvement with their students does not fall within a teacher's province of responsibility. This is, indeed, a questionable point. They are, admittedly, kept busy with the multi-faceted demands of their profession. No one is denying the outstanding and scholarly contributions that many of these individuals have made to education. But each day, as they face their classes, they must realize that many of the people before them are in their class, not only for a credit, but to obtain the benefit of a superior intellect through communication. To allow a gap to exist between student and teacher is to allow a major impediment to that communication. Cannot the disadvantages of mass education be, to some degree, alleviated by more personal contact? When per-

sonalities replace names, is not the development of an academic involvement more possible?

The crux of the matter may be related to the Administration. This body is, after all, ultimately responsible for the University's level of education on both the national and international stage. They hire the faculty and establish policy. But when has the Administration ever emerged as more than a vague and impersonal motivating force that sits uncommitted behind an office door? Has this body ever expressed an awareness of the problems of apathy of communication? Has it ever made known whether it does or does not know of the lack of personal involvement? Is it aware of the widening gap that is moving the student away from the classroom! If the Administration is a ware of these problems, it has kept them a secret. How much werse must the present situation become before this controlling body demonstrates that it not only knows we are here, but it can also see us in the correct perspective.

an uncomfortable pew

By ZACK JACOBSON

There are some very alarming aspects to the recent events in the racial struggle in the Southern United States. Some of the most brutal violence of the post-war era in North American has been perpetrated upon the people fighting for Negrocivil rights. An orderly march has been broken up with tear gas, following which mounted troopers wearing gas masks rode into the helpless crowd swinging clubs. As this is being written, a white clergyman who has joined the Alabama demonstrators lies near death with a fractured skull suffered when he and two other ministers were attacked by five southern whites. The culprits are in prison, but nobody seriously expects them to receive justice; there is no such thing for those who maim and kill anyone who works for Negro rights in Alabama.

The situation is extremely explosive. An indication of this is the statement of Roy Wilkins, national secretary of the N.A.A.C.P. (who has frequently in the past been criticized by Negroes as being an "Uncle Tom". i.e. one who is too passive with regard to civil rights to be effective). On March 11, Mr. Wilkins pointed out that President Johnson was doing little if anything to stop these outrages, and such things that the Administration is doing are ineffectual and too late. Referring to the tear-gas incident mentioned above, Wilkins asked, "What use is it to club people who are lying on the ground gasping for breath? They are completely out of the action". Then he went on, "There was a real field day there. Well if the President can't do anything, maybe we can have a field day of our own, and we'll see how they (the southern whites) like it!" Of course, it is likely that those words were simply lip service to the political pressures for a strong stand which almost surely must have sprung up within the N.A.A.C.P. Even so, when such a moderate voice as Wilkins cries for blood, the forces which are at large must be formidable.

Where is President Johnson? There can be absolutely no question that he actually approves of the happenings; he has worked long and hard to get the recent civil rights bill approved by the Senate, and all of his actions have indicated unequivocally that he is in favour of the Negro cause. But there is a very real difference between a law and an enforced law. He is ready to send a few thousand marines a few thousand miles away to Viet Nam in order to maintain a questionable war, why cannot he send a few hundred soldiers a few hundered miles in order to maintain a questionable peace? Those troops which are presently in Selma and Birmingham are southerners, acting on the orders of Alabama's Governor George Wallace (a man whose red-necked segregationism is seldom doubted.)

Equality in the broadest sense cannot be attained with the simple achievement of civil rights. The North American Negro has been on the bottom of society for too long for him to permeate it homogeneously the moment he has complete legal equality. There must be at least two generations of Negroes developing under the best possible conditions before they can achieve full economic and social equality. Even now, those Negroes who have reached middle class status are embarassed by the civil rights movement and some even actively try to dissociate themselves from it. It is perhaps disheartening to see that those members of a minority group who actually have "arrived" are loath to see others like them receive the same advantage; but this situation is not incurable, nor is it close in magnitude to the central issue.

..... billy's cup

In line with the increased participation and spending which has become part of the Dalhousie student government scene this year, the Dalhousie Gazette has very graciously offered to award prizes to deserving campus heroes.

The winners can pick up their cups at the Gazette office, They will be left with the Sport's Dept.

BEST ACTOR Frank Hennigar as Dal's Take-over Man.

BEST ACTRESS: Liz Campbell for her performance in Election '65 where she played the surprised winner to perfection. BIGGEST EXTRAVAGANZA The abortive student demonstration BEST KEPT SECRET The \$75.00 tuition hike.

THE REAL SECRET The \$75.00 Residence fee hike.

THE SECRET Have rich parents MOST BUSINESSLIKE ORGANIZATION Halifax Winter Carnival

SMARTEST POLITICIAN: Joe Ghiz (the unknown student) THE GREATEST DEBATOR: Jos Williams (in Council but not

BIGGEST INTERNATIONAL STORY: Harvey L. Shepherd's Vietnam

BIGGEST NATIONAL STORY: The fact that there are two nations BIGGEST LOCAL STORY: Unknown to the Gazette, naturally.

BEST SUPPORTING ROLE: Peter Herrndorf for his untiring

service to the Dal Gazette in saving it from the fiends on Council MOST ENJOYABLE EVENT: The clam-bake during the Homecoming BEST STUDENT: Michel Guite. WORST ARTICLE: This one. (Told you we were serious.)

Finally, the Lalhousie Gazette would like to nominate, as Man of the Year BILL BUNTAIN, our lovable Vice-President. We do so because we feel we owe him something for last term.

by other projects without a noticeable change in Joey's fishy fish-bones

, or even "Freeze the Fees - or Else" with a maximum of emotion and a minimum of thought, are apparently falling over themselves in their efforts to praise Mr. Smallwood for his recent announcement that the Newfoundland government will next year pay first year university students tuition fees.

Some of us are not inclined to wait for the millennium when we shall have free higher education, no doubt along with everything else - We are however, concerned, as Mr. Smallwood, that large numbers of potential university students are prevented from gaining a university education because they cannot meet the costs. In 1964-65, tuition fees in Arts at Memorial

University were \$335 (340 in Science). In 1961-62 the last year for which statistics are available, the average cost of a year at college for a single student living away from home in the Atlantic Provinces was \$1,405. Assume this is still a realistic figure for Newfoundland in 1964-65. Then tuition fees in 1964-65 accounted for less than 25% of a student's total expenditures.

In the light of these figures Mr. Smallwood's plan may perhaps be examined in a clearer perspective. What the plan amounts to is an acrossthe board subsidy of all first year university students in Newfoundland -- at the tax-payers' expense. No attempt is made to discriminate between those who need the subsidy and those who

slogans as "Higher Education is a Right not a Pri- attend university anyway are, in effect, being hanvilege" and "Higher Education should be free for ded a gift of at least \$335, really impecunious students who find that they are still unable to meet the remaining three-quarters of the cost of a year at college (\$1,405-\$335 _- \$1,020) will be no better off than before the tuition abatement. In short, this plan does nothing substantial to achieve what should be the main purpose of government student aid programmes ---the equalization of opportunity for all students to gain a higher education.

over \$200,000.

Those who make it their business to parrot such do not. At the same time that students who would

If the Smallwood government had been seriously determined to attack the problem of equalization of educational opportunity, it would have used the money it will pay in tuition fees to make substantial grants to needy students - in the order of \$1,000 per grant. It is estimated that the average tuition payment next year will amount to \$350 and that the plan will cost the government Suppose 600 students take advantage of the offer. Then the total cost to the Newfoundland government will be \$210,000. It is suggested that this money would be better spent by dividing it among 210 needy students to the extent of \$1,000 per student, than by dissipating it among 600 students.

It is to be hoped that our own Students' Council, in its commendable zeal to secure further provincial government financial aid to university students, will not endorse the Newfoundland plan without first considering the alternative proposed

Inherit the Wind

The events upon which this play modelled, the Scopes "Monkey" Trial, were inherently dramatic; the play which resulted is a dramatic confrontation of ideas and persons.

The King's Glee and Dramatic Society realized this drama on the stage of the King's gym last week in an intense and rewarding production of INHERIT THE WIND, a production that left little to be desired. Major credit for this success must go to the show's director, Blair Dixon. Mr. Dixon somehow coerced his large group of actors into a coherent and unified conception, and the result was a production where everyone acted at least competently, and most people acted extremely well indeed. Before I say anything more about individual actors, I think a few words about the technical side of the production are in order. The King's stage was too small for the kind of set the play demands. Consequently there were a number of long scene changes which broke up the progress of the play's developing action.

witty use of "it ain't necessarily, so" and numerous spirituals as background music during these scenes themselves were ad. about the stage; his movements past three years.

lems must have plagued the pro-ducers, they were all overcome ducers, they were all overcome ing. satisfactorily.

As I have already mentioned. the acting was of a very high calibre. Approximately twenty roles are small but necessary; all were handled well. In contrast to many student productions, all the speaking parts were well done. The leads were also very good, in some cases of an almost profess. ional tone. Walking, highway signs, etc. until the sun comes up and we're balling down Highway 400 then west on 401 — end of ride. Good-bye to trucker at Highway 6. A ride down 6 and another on 403 and I'm in downtown Hamilton at 8.00 Monday morning. . . Tuesday morning, 15 September. Breakfast at Constellation

Hotel unoticed amoung dark-suited young executives - 8.00 and 3.50 and it's 2 miles along Dixon road to 401 - on 401 it's windy and the traffic is heavy; my sign won't stand up and dust keeps blowing when the big rigs pass - finally a Monza from Manitoba containing a student from Western takes me to interchange 54 and out of the heavy traffic. #32 about 10 miles later is a red Chev pickup called "The Big Bopper" and a fat driver from Charlottetown leaves me at Interchange 71 #33 in a little Renaul' wagon from Toronto - likes to talk - expresses the hope that I will not be a bum all my life and a drag on the taxpayers (somewhat bitter about his own \$5000 income tax.) Interchange 92 and I'm by the road again - day is clear and warm and the Ontario Highway Department clover provides a tasty snack - #34 is an IH truck which is driven by Harry who is about 55 and a truckercum-gambler; bets on anything his bookmakers will handle. His favorite expression "Lightning struck the shithouse". #35 lumbers

Milburne. He bought the car when he landed in New York in stinks, the car burns oil, and the trees are becoming beautiful, February for \$300 and has since gone 17,000 miles in it, travelling and it's 500 miles to Halifax - the ride ends in St. Leonard and lecturing on a Canada Council grant at Prescott lunch (on miles from Montreal waiting for #36. 3.00 and I'm heading for Montreal in the company of a Torontonian WASP - unexciting trip except for the spectacle of one school bus with its front fender entangled with the rear of another school bus and about a million excited kids. Montreal, 6.00 - I have missed the by-pass and a bus takes me to St. Lambert. At 8.00 back into hitchhiking territory - #37 is a truck filled with empty bags and voluble French Canadian can understand me (unfortunately) the reverse is not true). 9.30 in St. Hubert #38 is a Mack transport from New Brunswick on its way from Philadelphia this morning - stops at Drummondville to sleep - #39 provides three cups of coffee and a ride to the Chaudiere bridge which is not exactly stable when a big rig crosses it. Street lights shake, I shake, and the whole bridge shakes. #40 soon removes me from the middle of the bridge (I was walking across) - Dave, in a big Olds full of buttons to push offers me a beer - a case of Dow on the back seat. He is just returning from a fishing trip with his general manager - he is also 32 fat and stoned. He lets me out at 2 A.M. in St. Michel - I, full of beer don't notice how cold it is. 2.30 I'm not so full of beer and I notice my predicament - the Etoile Rouge restaurant is closed. The motel-Sur-Mer is dark and the only place open is a lonely phone booth by the road. 4.30; I'm still in the phone booth, running out to stick out my thumb everytime I hear a vehicle approaching - gremlins and the robbies set in - my hands are too cold to write and I hear trucks where no trucks are. 5.00 - the sun beginning to rise. I have been passed by twenty-three trucks and 11 cars in the three hours that I've been stuck here, finally I'm saved by #41. I watch the sun rise from an elderly Pontiac driven by a young fellow from Bathurst (going home from Toronto) who has no front teeth and little English - doze amid patches of delightful conversation. Breakfast at a gas station is a doughnut, a Joe E. Louis, a half-

to a halt at interchange 116 and soon I'm rolling toward Montreal moan, and a special treat from my driver - a 7-UP - at last in a '54 Cadillac with Prof. Russell Ward of the University of my stomach doesn't hurt anymore - I discover that Edmunston and it's 10.30; I'm on the outside of the Mountie depot. Soon #42 the Canada Council) and he heads for Carleton leaving me 120 shuttles me to Grand Falls where I spend an hour and a half getting nowhere - two local rides finally get me to Aroostock Junction so I while away an hour watching SAC bombers going down to land just across the border at Loring - #45 is a '53 Chev from Ontario driven by a young (22) tobacco picker going home from Tillsonburg in the Ontario tabacco region - he is travelling with two friends behind in a '53 Pontiac and has a baby rabbit on the rear seat - a tabacco field rabbit! Outside Hartland we take a wrong turn - his friends are far behind and take the right turn - we come back to the right turn and try to catch them - meanwhile they are far ahead trying to catch us - the suspension on the car is shot and the road is under construction dust comes up through the seat as we bounce and scrape along the Trans- Canada - just as we come over a hill we catch a glimpse of the others but there's also a Mountie parked next to them and we slow down the trunk lid opens. I fix it and we're off again - finally catch them outside of Fredericton and the ride ends across the river from Ormocto - only 300 miles to Halifax and it's 7.00 P.M. #46 comes and 9.00 finds me outside Sussex eating raisins and beginning to feel cold and there are no truck stops — I walk to keep warm hoping for a truck stop — traffic is light and there is forest all around, 17 cars and 8 trucks pass before #48 stops at 11.30 - a guy and his girl driving from Pres Qu'ile to Shubenacadie. I sleep, in the back seat -2.05 A.M. it's the junction of Route 14 and 39 miles to Halifax and I'm walking - it's cold and there are no lights - 3.00 A.M. - a big Mack transport with a load of toilet paper from Saint John stops he passed me outside Moncton - when he saw me again in Shubenacadie he picked me up - 4.00 A.M. - the corner of Lady Hammond road and Robie and the dismal prospect of walking home - no traffic, no hitchhiking — after stop on the side on Preston Street, I'm home — 157 1/2 hours, about \$10.00, and 10 lb. of weight ost from Vancouver.

"On his Sunday radio program, Canada's National Back to the Canada's 1967 Centennial. To lead one himself, the silver-tongued Manning, a radio bible-basher for 34 years, would only have to carry out his long-standing threat to give up politics and - as he tells his friends - joing the Billy Graham Crusade for Christ as a fulltime evangelist. But Manning is also toying with the notion of leading a political revival - by loaving Edmonton to head a new national political movement of the right. So far, the thought is no more than a toy, though Manning's junior colleague, Social Credit's National Leader Robert Thompson, is having a fine time playing

Ten days later, Manning's press secretary informed Hayter the TIME story represented a "scurrilous attack" and added "I would not be permitted to attend Manning's press conferences until TIME had apologized or issued a retraction.'

Replied Hayter to the premier's ultimatum: "In effect, the premier is holding a club over the heads of other newsmen...

However, Hayter just last week, announced in The Gateway that "freedom of the press had triumphed again." Shortly after his first letter to the student newspaper, he was reinstated and once again attending Premier Manning's press conferences.

IN FRANCE STUDENTS ASK

GOVERNMENT FOR SALARIES PARIS (CUP-CPS) - French college students have begun a drive to gain adoption of a national system of salaries for all persons persuing regular university studies.

The National Union of Students, France's largest student organization, is calling for a monthly salary of 450 francs (about \$90) to be paid to every student taking courses toward a degree.

The drive is expected to cumulate in a debate this spring when a Socialist-supported bill will be brought before the National As-

The National union thinks students should be paid to continue their education because their studies constitute "an apprenticeship of the country's social and economic life," It contends student work represents an investment by the nation. The salary system, it argues, would help to democratize French higher education, where sons of industrial workers and farmers seldom continue their studies.

The cost of the proposed system is estimated at \$345 million a year, but the national union says that half this sum could be raised by eliminating scholarships, tax emptions and family students, and subsidies for student restaurants and dormitor-

At the moment officials are is expected to result in a clash hardly conducive to an educational between supporters of scholarships and advocates of salaries.

Under the plastic bubble dome

A Prosaic sun glittered heatlessly upon the scattered iceflows swirling noiselessly within the jagged inlet. From beneath the gently swelling waters the 550 ton bulk of Her Majesty's Royal Sub-marine 'Barnacle' forced its way to the surface.

The thickly knitted crystals of salty seawater rushed down her sides as she settled into the crisp morning air, with only her smooth streamlined lines to identify her as the pride of Her Majesty's Nu-

An officer accompanied the agent to the exterior bridge that soared jaggedly from the hull. He stood watching from the conning tower as the other climbed into the waiting launch. He acknowledged the agent's farewell glance with a disciplined salute and a brisk click of his heel upon the freshly oiled deck. He murmered silent good wishes as he lost his balance, falling smartly through the open hatch to the radar room below.

As he took his first look at the barren Canadian landscape James Annuity, agent on Her Majesty's Secret Service, recalled W's last words to him delivered with the calm deliberation that always punctuated his superior's speech. "Barren landscape, that Canada, 006 3/4" W had said. Now Annuity looked out upon it and was forced to concede that the Canadian landscape was indeed barren. His escort, the strong, rugged-looking Canadian piloting the craft seem-

"Canada's landscape must seem barren," he commented with-

out emotion. "Yes," Annuity returned profoundly. "The barren Canadian does seem landscape."

Berthing the Peterborough-built Martyn at the Ste. Joseph detachment, the two men paused to exchange credentials. The colonial, one Sterling Stalwart, identified himself as a member of Her Majesty's Royal Canadian Mounted Police, affirming his loyalty to the British Crown. Annuity felt somewhat uneasy about the other's unsolicited profession but filed the information in the back of his mind, preferring for the time to make clear his needs to the craggy-featured constable. Within the hour the two had set off across the barren Canadian landscape.

The aurora borealis had already begun flickering above them when the silent policeman brought the vehicle, a maltese-designed Lobb snowmobile, to a halt.

'I'm sorry sir. I'm not permitted to proceed beyond this point. This is the border sir. Foreign territory y'know.' ·What!" Annuity started suddenly. "Russia already?

'No Sir," the other responded, reaching into his parka to withdraw a map, "An American radar installation."

Before the chart was fully opened Annuity's Berreta, 25 had leapt to his hand. The Mountie's face clouded, "Sir?"

'You boys will have to be more subtle than that," he said with quiet self-satisfaction, smoothing the lapels on his dinner parka. wearing that red tunic under there was a dead giveaway," he added smiling at his own pun.

Kicking the Communist out of the vehicle he slipped into his place, looked out masterfully over the foreshortened bonnet and threw the machine into high gear.

doned the erudite Lobb so that he might proceed to his objective on foot. With the sure timing of the experienced hero he realized that it was high time for him to find a naked girl.

Silently he cursed the frigid wind that chilled him to his very bone marrow. Confidently he pushed on across the tundra, seeking her, be she blonde, brunette or redhead. Climbing to the top of a sparkling snowdrift he suddenly felt the familiar closeness.

level has not legislated on a par-

He consulted the page number beneath him, and satisfied that he had gauged properly, rose to prevent the loss of the crease from his

trousers. A change in the tone of the ventilation system told him that the door was slowly being opened. A shadow appeared in the opening. In a moment Annuity had

swept it into his arms and had crushed their mouths together. . . 'Ach du lieber,' the shadow shouted. "I'm not carring vat you vant for Christmas! You ain't gedding it!" Annuity jumped back, cursing the unexpected turn of events. In

the brief interval his quick mind considered and rejected thirtyseven alternate plans. As he began to postulate the thirty-eighth there was a flash of metal in the passage which he instantaneously recognized as fifth degree temper Sheffield stainless steel.

'It's about time you got here, you little elf," he said brushing his hair into place as the furor died down.

"I'm sorry James," the scantily-clad female replied. "I was

"No matter, let's get out of here."

The odds were heavily in favour of the enemy, for they were playing on his own ground, but Annuity had never been one to be awed

With lungs bursting and screaming for air they had swum the length of the ice cold underground river.

With the stench of their scorched flesh in their nostrils they had

crawled through the scalding pipes of the heating system. With hearts pounding and nerves taut beyong endurance, they had lain still as the deadly killer spiders had passed over their

In spite of everything they had managed to send off the vital communique to Her Majesty's Royal Submarine Carbuncle, sister ship to the "Barnacle". Annuity knew that it was merely a matter of pages before "Carbuncle's medium yield tactical nuclear tipped torpedoes ended forever SCRAM's illicit traffic. There still remained time for he and Bunney to undergo another sadistic trial to their pain thresholds. So

. . . With hoor-glazed eyes they met with the sub-human machine-men monsters.

As the long artetic night fell the heavens in all their electric splendour suddenly faded dim before the manlight below. The polar cap resounded with a staccatto series of detonations. Beneath the column of atomic fire an evil empire was forever cleansed from the face of the earth, and the eternal sea settled back from its momentary feverpitch of boiling agitation.

Within the plastic bubble James Annuity and Bunney Hare were toe preoccupied to notice the arrival of a third party.

Whoa King! Whoa you huskies!" A broad shouldered, seriouslooking man stepped from the runners of His Eaton's of Canada sled. Unfolding an official document he stepped into the dome. "James

'Ge'lost!" Annuity ventured over his shoulder. "G'way!" 'James Annuity." the deep voice persisted, "I arrest you in the name of the Crown.'

'Hanh?' Annuity said, stunned. "Wassassabawah? What are you, illiterate? Aincha never heard of the double-0?"

James Annuity," the other went on. "You are charged under the Lord's Day Alliance with indecent exposure in a public place, to wit, a territory of the Dominion. Further you are charged under the criminal code with contributing to the delinquency of a minor, to wit, one Miss Bunney Hare,

In bored affirmation of his double-0 status he reached for his The crystal night had faded again into daylight as Annuity aban- nutiv of Herr W's office. Velcome to our liddle Valhalla. You are Berreta, only to find it under the firm heel of the officer. . . . charged with carnel knowledge of a minor, and finally

with defamation of character."

Whose character?" Annuity exploded, defensively. Her Majesty's Royal Canadian landscape, sir."

'Kill this comic will you Bunney!

Shut-up beatle-brain," the girl snapped. "I think the Sergeant is cute. What's your name Sergeant?" · Preston, Miss.'

'Do_call me Bunney, Sergeant. My what a lovely dog!"

Nova Scotia Lawyer suggest constitution...

PEACE, ORDER, AND GOOD GOVERNMENT — A NEW CONSTITUTION FOR CANADA, by Peter J. T. O'Hearn; MacMillan;

Mr. O'Hearn, a prominent Nova Scotia lawyer, undertakes the dangerous task of writing and defending according to his tastes and principles a new constitution for Canada.

Unfortunately his legal erudition is not equalled by his understanding of political processes.

This is best illustrated in his justification for his Article on Impeachment. After pointing out that the last successful impeachment in Great Britain took place in 1806, he explains the disadvantages of that process but notes that it is used (with singular lack of success) in the United States and concludes that we should follow the American model because of our "federal form of government''.

He ignores the fact that the best form of control over the wrongdoings of public officers is political and judicial. It was the possibility of a non-confidence vote that forced the recent resignations of the Liberal ministers' assistants, not any threat of impeachment.

He also seems to be under the impression that we have some sort of "independent legislative, executive, and judicial branches of . . . government". While there are some political scientists who would argue that the legislature is the basic control on the executive and others who maintain that the executive completely dominates the legislature, there are very few who would assert that they are independent of each other.

The whole format of his book virtually dooms it to failure from the beginning. He frankly admits that his is not a legal treatise but "propaganda in favour of certain specific reforms". But he forgets the first rule of the propagandist, namely to pick out a few serious problems and concentrate on

them. Instead of this Mr. O'Hearn government even when another attempts to correct virtually every problem a Constitution could possibly be faced with and at the same time answer virtually every question that might occur to a layman. The result may be fine for the UC Lit or SAC Constitution Committees, but is a little long for non-purists.

But this meticulous style has its advantages. The book is well annotated and indexed. Its plan is logical, proceeding from background information to the text of the proposed "Articles of Confederation" to a section by section justification of the text, thence to practical plans for getting the Articles or something like them adopted. (A Constitutional Association will be for-

Little that is new is included in the Articles. There is a conservative bill of rights guaranteeing every man the right to keepfirearms and assuring us that religious freedom "shall not prevent public Homage to Almighty God, the setting apart of the Lord's Day, or governmental Favour and Support for religious and moral Principles and Activities ... "So much for pacifists and atheists.

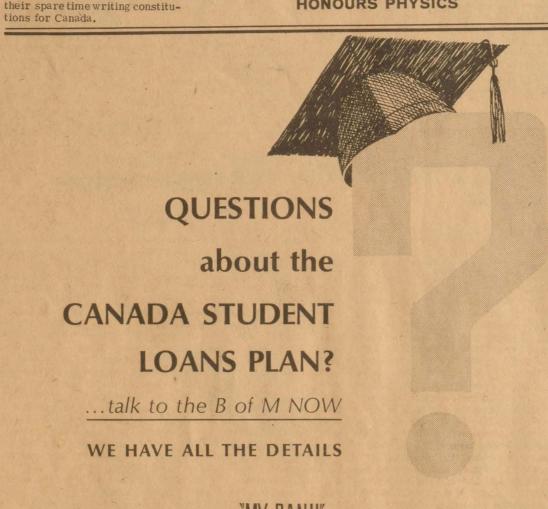

There are a few other tidbits like the establishment of a "Censor-General" (to take the census) and a Federal Council to regulate Dominion-provincial financial arrangements. But his main proposal seems to have a great deal of merit. He suggests that the present division of powers between Ottawa and the Provinces be abandoned in favour of a system of dominant powers. Any government would then be empowered to legislate on any matter and the legislation would be inoperative only if it conflicted with a specific act of another jurisdiction whose power was dominant in that field. This would allow delegation of powers and

Dalhousie to expend \$16-million on building program

New Law Building

Lawmen to double ranks; New school, Autumn'66

announced by W. A. MacKay,

Dean of the Faculty of Law. Dean MacKay said that preliminary plans for the building, which would cost about \$1,000,-000, had been approved by the Board of Governors and have been submitted to civic authorities. If the city's approval is given, tenders will be called by May 1 and construction will begin as soon as possible after that date. Completion date is July,

The building will be located on the north side of University Avenue between Henry and Edward

This is a very important step forward for Canada's oldest law school", said Dean MacKay. "For the first time we will have really adequate facilities and can keep pace with the changing demands of legal education.

"The new law school building will be equal to any in Canada and better than most. It will permit us to accept more students and at the same time to improve the quality of our teaching and research program.

"I have no doubt that we will be able to better serve our students, this region and the country as a whole, than we could with our crowded facilities in the
