DALHOUSIE April 1976 ADVIDENTION ADVIDENTION

Dal gets go-ahead for new phys ed complex

Gale force winds ripped through Halifax St. Patrick's Day creating no small amount of damage to the city and to the university in particular.

The Sir Charles Tupper Medical Building suffered the greatest campus damage when wind tore away the light panels and the surrounding plaster from the canopy at the front entrance to the building. Lights went sailing down College Street and pieces of debris flew by in all directions.

The Tupper has a particularly bad wind problem. As the wind hits the top of the building, it splits in two directions. It not only changes direction, but it gains in velocity as well. These factors combine to create heavy winds around the building at the best of times. The hurricane-like winds on March 17, with gusts of up to 90 miles per hour, were more than the canopy could withstand.

More minor damage at the university involved the smashing of some of the panes of glass in the Biology Greenhouse at the top of the Life Sciences Centre. The glass in the main doors of the Dunn Building was broken too, and the weathervane on top of the Arts and Administration Building was broken off.

Repairs are well underway in the damaged areas of the campus.

High Winds Damage Campus

This was the scene on the afternoon of the storm after the Tupper "wind tunnel" took a beating. (Photo above by W.F. Jensen, Dalhousie Photography; below, by John Donkin, A / V Services).

Two years and seven months after announcing the start of its longawaited athletic complex, Dalhousie finally has been given the go-ahead to build it.

The Supreme Court of Canada has ruled against an appeal by the City of Halifax to deny Dalhousie a building permit for the project, ending more than two years of legal battles.

The controversy began in August 1973 when the university unveiled plans for a five million dollar Sports Complex to be built on the south side of South Street, opposite the present football field. A public meeting was held to make the announcement and approximately 300 local residents attended. A number of them voiced strong objections to the proposal, and shortly after the meeting, a committee of 'neighbours' was formed in an attempt to stop the university from crossing South Street. The citizens stressed that they were not against the idea of a sports centre for the university, but rather that they were against its proposed location. They felt that once the university crossed South Street that that would be the beginning of further expansion in that part of the city. The university insisted that they had no intention of expanding further across South Street. As well, they stated that the property was in fact already university owned and was zoned for general university use. They added that plans for a sports complex had long been in the works and that the South Street properties had been purchased with that plan in mind. The proposed centre was architecturally in keeping with the general area, with the plans calling for a building of an above-street-height of no more than 35 feet. (A number of the facilities were to be below ground.) Arguments ensued about alternative locations, but the closest alternative was in the LeMarchant Street area. This site would cost the university (and indirectly the taxpayer) considerably more money than the South Street location; further properties in the area would have to be acquired by the university; more time would be lost in attempting to purchase these properties; and the South Street residents would still have the practice field in their back yards.

Dalhousie Alumni News

April 1976

The **Dalhousie Alumni News** is the official publication of the Dalhousie Alumni Association. It is published three times a year as a supplement to the **University News** and in the summer in magazine format. It is produced by the Alumni Office, Dalhousie University, Halifax, Nova Scotia with the assistance of the University Graphics Department and is printed by the Dartmouth Free Press.

Alumni Scholarship to Sydney Native

In September 1968, the Dalhousie Alumni Association established a scholarship which consists of the annual income on a gift of \$20,000. The scholarship is awarded to a student who is entering Dalhousie for the first time and who is pursuing a course of studies leading to an undergraduate degree or diploma.

At the end of the first year, provided the student has continued to maintain a high standard of scholarship, the Selection Committee may choose to renew the award on a non-competitive basis until the student has completed his course of study; the Committee

Enrolment Statistics

This year there are 8675 students attending Dalhousie. Of these, 7399 are engaged in full-time study while 1276 (or approximately 15%) are registered as part-time students. may also decide to select a new awardee.

.C.

This year's award goes to Blair Philip Dwyer of Sydney, Nova Scotia. Blair was awarded a Dalhousie Entrance Scholarship upon his early admission to the University. He is enrolled in a Bachelor of Arts program and at Christmas time his marks gave him an 'A' average. Blair comes to Dalhousie from Sydney Academy, where he distinguished himself with an average in excess of 96%. He placed second in a class of 354. Before coming to Dalhousie, Blair participated in the "Reach for the Top" student quiz program, in model parliament and in the French Club.

The largest number of students is found in a BSC program (1980), while 1673 are in a BA program. Commerce accounts for the third largest group with 592 students taking a BCOM. These three groups account for 4245 students, or roughly half the student body.

Trend Toward Health By Allison Berry, University News According to Beazley, well educated, healthy persons know how to take care of themselves and are oble "the deal

"Generally speaking, health education is providing learning opportunities which may influence favorably health knowledge, attitudes, and practices," says Richard Beazley (MPED '72), co-ordinator of Dalhousie's new Bachelor of Science in Health Education degree program, offered within the School of Physical Education.

Mr. Beazley and colleagues Drs. Ed Belzer and Bill Shannon have been featured on several radio and television shows recently. Their topic: health education as an important entity and a major area of responsibility in public education. Dalhousie's four-year course will prepare people specifically for health education roles.

SUBJECT STIFLED

Health education has been compulsory in Nova Scotia elementary and junior high schools since before 1935. Physical education and science teachers were the ones usually "stuck" with the job and they were largely disinterested and unprepared.

"Teaching materials were limited," says Mr. Beazley, who taught in Bridgewater public schools for five years.

"Many teachers took the scientific approach, examining human anatomy and physiology by watering down their university biology notes for the school kids."

It wasn't until 1970 that a revamped health education curriculum guide was developed for elementary schools and in 1974 the junior highs got a new outline - one written by Mr. Beazley who took his Masters at Dal.

Although it's still based on the sciences, the orientation to teaching health education is now behaviorally guided.

HEALTH AND FITNESS

Mr. Beazley sees health education as a continual process with shared responsibilities among the home, the school and the community.

"Personally, I feel health education is learning from every possible opportunity to make wise decisions on matters which affect my health. Health is fitness for living a satisfying life and I consider fitness in terms of physical fitness, emotional and social fitness." According to Beazley, well educated, healthy persons know how to take care of themselves and are able "to deal with their own sexuality, prevent diseases as much as possible, live in a balance with the environment, use drugs wisely, administer first aid, and understand the aging process and what it's like to be an old person".

Someone has to teach health education and Dal's program is educating these teachers. It's designed to do three things: prepare students for a professional life as health educators; provide studies that will personally benefit the students so that they will lead more healthy lives; and, prepare some to pursue graduate studies and research in health education.

COMMUNITY LIAISON

"We don't expect graduates to be experts in all areas of health education, but they'll be engaged in studies that will give them a basic understanding in all areas. Emphasis is in education methodologies which will motivate the teachers to see themselves as facilitators of learning," says Mr. Beazley.

"Dalhousie students will learn how to liaise with community experts and use their expertise to the best advantage. Part of the requirement in the course is interning with schools, public health agencies, service clinics and the like."

During a CBC interview, Mr. Beazley talked about the origin of the new interest in health education. He cited his own years in university in the 50's and 60's when engineers were kings of the campus, and the funding went to science and technology.

SENSITIVITY

"Universities now reflect current interests," commented Mr. Beazley. "Science is still important and technology becoming more so, but the forgotten element of what it is to be human is being brought back - is becoming more important to people."

"Students I associate with at school are more aware of what it is to be human and the problems associated with that, reveals Beazley, there is a need to be knowledgeable about how . to handle these problems..."

"Health education provides learning opportunities in sensitive areas and future health educators need to be sensitive, to have the sense to know what is right for a person at a given time. Teachers need to listen with all their senses."

Dal's own Piano Trio by Allison Berry, University News

There are two professional piano trios at Canadian universities.

Dalhousie University will officially welcome the Dalhousie Piano Trio as its "in-residence" group this fall.

Members of the trio, all established performers, appeared together in many chamber concerts this year at the Dalhousie Arts Centre. They were, in effect, auditioning themselves.

Audiences will remember with enthusiasm Philippe Djokic. He graduated from the Master's program at the Juilliard School of Music in 1974, winning the Fritz Kreisler Award, the highest honour bestowed upon violinists by Juilliard.

Mr. Djokic has won many national awards and competitions and appeared as soloist with orchestras of New York, Detroit, Chicago and North Carolina. He has been an instructor of violin at Princeton University and Dalhousie University, and toured Europe in 1973 as soloist and concertmaster of the Juilliard Chamber Orchestra.

William Tritt was born in Nova Scotia. He has placed first in dozens of Canadian musical competitions and in 1971 was third at the Montreal International Piano competition. Mr. Tritt gave his New York debut recital at Carnegie Recital Hall in 1972.

William Valleau was formerly assistant principal cellist and soloist with the Montreal Symphony. He spent a number of years with major orchestras and chamber ensembles in the United States and has recorded with CBC and on disc.

For five years, Mr. Valleau was cellist with the classical quartet of Montreal and a member of Musica Camerata and for two years was principal cellist of the McGill Chamber Orchestra.

It is Mr. Valleau who is co-ordinating the Dalhousie Piano Trio's series in conjunction with the Dalhousie Cultural Activities staff. He expects the Trio to give three major concerts during the coming season as well as several performances with guest artists from Canada and abroad.

Lynn Stodola who played regularly with the Dalhousie Chamber Soloists this year and is well known for her Juilliard accomplishments and her performances in Chicago and New York will join the group on numerous occasions.

One innovation Mr. Valleau is implementing this year is the opening of dress rehearsals to students. As well, each guest artist who appears with the Trio will give a master class. These will be free to students studying the appropriate instrument, both those at Dalhousie and elsewhere in the Maritimes.

Students will also be presented with the opportunity to audition for two major evening concerts which will be given with the performing faculty organized by Cultural Activities.

Informal noon hour and evening concerts in the Dunn Theatre will continue.

memories and half-forgotten escapades and incidents. Jim will not only direct the film, but he will also supervise and edit the Centurybook (100-year yearbook).

Les Krizsan, Director of Dalhousie's Film Services, is the film director. Les has worked extensively in radio, television, and especially in film; he has made a number of films for the National Film Board, Atlantic Region. In 1974, he won an award at the Columbus (Ohio) Film Festival for his documentary on Sable Island. (This festival is one of the best respected educational film festivals in North America.) Les is presently at work on another film on the Sable Island seals as well as a public relations film for Dalhousie.

Working behind the scenes is Malcolm Cooper (BA '75). Malcolm is a lecturer with the History Department at Dalhousie. He comes highly recommended by the department as a researcher and has proved his patience and dilligence in the amount of material through which he has waded in the past months.

The projected date for the premiere of the film is Fall 1976.●

The Associated Alumni of the Library School will be holding their annual meeting in May in St. John's, Newfoundland during the annual conference of the Atlantic Provinces Library Association.

A reunion for the Library School alumni will be held in Halifax in June of this year on the occasion of the annual conference of the Canadian Library Association.

For complete details on the awards, see University News, pages 12 and 13.

A number of concerts are scheduled for the Dalhousie Trio across Canada and they are expected to perform at Maritime universities throughout the academic year. Their New York debut will be given in late spring, 1977.

Each member of the Trio will carry a teaching load for Dalhousie, one which Mr. Valleau has seen expand in the three years he has been resident in Halifax.

"Certainly I think the exposure to excellent performers has improved the quality of students in the province. The load is automatically increasing as more students are attracted to the benefits of a performing faculty," continued the cellist.

"We are also proposing that a master's program be introduced in a couple of years and an established group of professional performers will be essential to its success."

A special concert with either the National Ballet of Canada or the American Ballet from New York will be worked into the chamber group's series this year.

Painting Presented

Dr. Henry D. Hicks, President of Dalhousie University, was presented with a painting for the Dalhousie Art Gallery by the members of the family of the late Mr. and Mrs. Noa Heinish (Sarah Saffron, Arts '20-'21).

The painting is by 18th century Scottish artist, Sir David Wilkie, and is

entitled, "The Storyteller". It is an oil

on canvas, measuring 23 inches by 20

inches. The painting has recently been

restored in London, England and is in excellent condition. It was a particular favorite of Mr. and Mrs. Heinish and was donated to Dalhousie at their specific request.

Members of the family who attended the presentation were: Mr. and Mrs. Michael Halzel (Cecelia Heinish, '57-'58) and son, Marblehead, Massachusetts; Mrs. Elliott Jacobs, California; and Mrs. Jack Star, Montreal.

The Storyteller.

No Tuition Increase for Dal

The Dalhousie Gazette has reported that, from information they have received, tuitions at most Atlantic universities will rise this coming year. They reported that the tuition at the University of Prince Edward Island will jump by 10%, while the University of New Brunswick will show a 10% - 20% increase. St. Mary's tuition will rise by about \$50, and Mount Saint Vincent's by \$20. It appears that fees at Memorial University of Newfoundland will suffer the largest increase; the student newspaper at Memorial

has reported a hike of from \$200 to \$300.

Here at Dalhousie, however, University President Dr. Henry Hicks says that budgets are being reviewed under the assumption that there will be no tuition increases. He further states that there will be "no academic service cut". Cuts in other areas of the university are being made and will continue. These involve a revamping of the university telephone system and a 'hold the line' approach to hiring new staff.

Notice of Meeting

Notice is hereby given that the Annual Meeting of the Dalhousie Alumni Association will be held in the McInnes Room of the Student Union Building on Monday May 10, 1976, at 8:00 p.m.

A reception at 6:00 p.m. and buffet supper at 6:30 p.m. will precede the Annual Meeting. Our special guests will be representatives of the Class of 1976 and the Reunion Classes of 1926, 1936, and 1951. Buffet tickets at \$5.00 each will be on sale at the door.

Enrolment to Increase

A small enrolment increase at Dalhousie is expected for the academic year 1976-77. The administration feels

that an increase in the area of 3% to 4% can be expected.

cont'd from page 1

Eventually, the citizens appealed to the City of Halifax to rezone the area from general university use to residential use. The City voted on the matter and the decision was to rezone. Dalhousie realized the crying need for the long overdue complex. (The existing facilities at the university were built in 1932, at a time when the student population numbered 700. Today, there are more than 8500 students using these same facilities.)

The University appealed the City's decision to the Supreme Court of Nova Scotia and, as a result, the City was ordered to issue them with a building permit. The City then appealed that decision to the Supreme Court of Canada and on February 27, 1976, the Supreme Court handed down its decision in favour of Dalhousie.

The University Planning Office is busy at work on the project.

Dr. Hicks and members of the Heinish family.

ANNUAL MEETING

The following Alumni are candidates for office for the Dalhousie Alumni Association for 1976

BOARD OF GQVERNORS 1976-1979

- TWO to be elected: 1. G.E.C. "Ted" Brown, DENG'62, BSC'63, BENG-Arch'67 (NSTC)
- 2. Dr. Michael T. Casey, BSC'49, MDCM'53
- 3. George T.H. Cooper, BSC'62, LLB'65, BCL'67 (Oxford)
- 4. John R. Grant, BA'64, LLB'65
- ONE to be elected:
- 1. Mrs. Peter Green (Lorraine E. Kirby), BA'61, MLS (U. of T.)
- 2. Dr. B. Margaret M. Meagher, BA'32, MA'32, LLD'70

BOARD OF DIRECTORS 1976-1978

- SIX to be elected:
- 1. W. Graham Allen, (Arts '25-29)
- 2. James L. Bennet, (Arts '49-50)
- 3. A. Fraser Dewis, BSC'61, BED'64
- 4. Dr. Douglas A. Eisner, DDS'55
- 5. Sylvia J. Fullerton, BSC'55
- 6. Dr. Terrance F. Higgins, MD'70, BSC (SMU)
- 7. Mrs. Ronald MacDonald (Marilyn J. Davies), BA'62, MA'65
- 8. Mrs. J. Thomas MacQuarrie (Janet E. MacGregor), BA'63, BED'66
- 9. D. Merlin Nunn, Q.C., LLB'57, BA, BED (St. F.X.)
- 10. Mrs. M.K. O'Brien (Janet Young), BA'65, BED'66
- 11. Dr. Victor C. Starratt, MDCM'53
- 12. H.A.J. "Gus" Wedderburn, LLB'74, BA, BED (Mt. A.)

DISTRIBUTION OF BALLOTS

Alumni Association states that: "A ballot shall be mailed to each Active Member of the Association not later than three weeks before the date of the Annual Meeting. All members who are not Active members shall be mailed a ballot upon application in writing to the Director of Alumni Affairs, not later than three weeks before the date of the Annual Meeting."

Clause 3.1 of the By-Laws states that: "An Active Member is (1) a Life Member, or before the Annual Meeting.

Clause 8.4 of the By-Laws of the Dalhousie (2) a member who during the preceding or current calendar year has (a) paid such annual dues as may be fixed from time to time by the Board of Directors; or (b) made a donation to the Association or to Dalhousie University under a program of giving approved by the Board of Directors in lieu of annual dues, or (3) a member who is the spouse of an Active Member."

> Completed ballots must be received at the Alumni Office not later than five days

Campus Notes

To Russia with Love

Dalhousie University and the Pushkin Institute in Moscow will co-operate during the next academic year in an intensive Russian language and studies program for Canadian undergraduate students.

The course is open to students from any Canadian university and up to ten will be able to participate, with one or two places reserved from Dalhousie students. To qualify, a student must have the equivalent of two university credits in Russian language with a "B' grade or better.

The course will be made up of two parts. The first term of study will run from September to December of 1976 and will be taken at a Canadian institution. Dalhousie's program will consist of courses from three departments - Russian, Political Science, and History. The second term, running from January to April of 1977, will be given at the Pushkin Institute. This segment will be an immersion type of program in the Russian language.

The entire program is to be administered by Dalhousie.

Good Sport

Second-year Commerce student, Shawn Healey, recently defeated all other Mari-time competitors as he emerged as the best all-round Maritime gymnast in an in-vitational meet hosted by the University of New Brunswick.

Canada Council Awards

A Canada Council Leave Fellowship of \$9000 and a Research Allowance for \$1500 has been awarded to Dalhousie professor, Dr. Peter Aucoin, Ma '66. The award goes toward a study of the policy making of the Canadian government regarding the support and promotion of a STOL (short take-off and landing) air transportation system.

The STOL system is a major program which the Science Council of Canada recommended to the Canadian government in 1970. Dr. Aucoin spent a year as a science advisor to the Science Council, and at that time undertook some of the research required for his upcoming study. He concentrated on the public administration of the planning of such a major program.

In addition to his position at Dalhousie as associate director of the School of Public Administration, Dr. Aucoin is also an associate professor of Political Science.

Dr. William Hare, associate professor with a joint appointment in the departments of education and philosophy at Dalhousie, has been awarded a Canada Council Leave Fellowship to pursue research on the topic of openmindedness.

He will spend his sabbatical year at the department of philosophy, University of Hull, England, where his purpose will be to examine philosophically the nature and value of the trait of intellect known as openmindedness.

More Awards

Dr. Fabrizio Aumento, MCS'62, PHD'65, of the Department of Geology at Dalhousie, has been named one of two recipients of Steacie Fellowships awarded by the National Research Council for 1976-77.

The Steacie Fellowship is awarded annually to an outstanding younger Canadian scientist. This is the first time that it has been awarded to a member of Dalhousie University and only the second time that a geologist has been honoured.

Dr. Aumento will take this opportunity to devote his energies to continuing his investigations on the oceanic crust and its continental equivalents.

Appointments

Professor Donald J. Patton has been appointed Director of Dalhousie's Centre for International Business Studies. The Centre, established in the fall of 1975, provides a two-year graduate-level teaching program with a specialty in international business management.

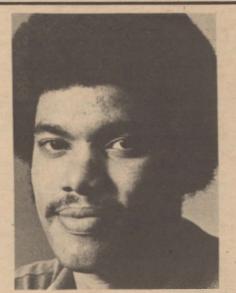

Dr. Patton has done substantial research in the Canadian petroleum and natural gas industry and in the multinational firms in the world petroleum industry. In addition, he has undertaken an investigation into the probable responses of multinational firms to alternative public policy decisions in Canada. He is strongly involved in the market potential for Canadian products abroad and is interested in the level of economic development as a factor influencing the management process.

Law Clippings

In the fall, following the death of law graduate Mary Cleyle (BA'70, LLB'72), the Dalhousie Law School set up the Mary Cleyle Fund. Donations continue to be received by the School with the \$4000 mark having been passed.

The Community Planning Association of Canada, in conjunction with the Dalhousie University Law School's Public Services Committee, organized a series of five workshops on Urban Law for the Layman. Sessions were conducted on Saturday mornings at the Weldon Law Building throughout the month of March.

Topics covered in the workshops dealt with land use law, an analysis of the recently enacted rent control legislation, information on how to form a housing co-operative, and a general session on community development corporations

Gordie Neal

Students Vote

The new President of the Dalhousie Student Union is second-year Health Professions student, Gordon Neal. Anne Gillis, a student in first-year medicine and this year's President of Shirreff Hall, is Union Vice-President.

The Neal/Gillis team ran on a platform which stressed the importance of student housing and student aid. They hope to bring pressure on the university adminis-

The sessions, under the direction of Law Professor Paul Emond, were designed to provide registrants with an understanding of some of the legal ramifications of public control of land, housing, and community associations. They were structured to attract persons who had no legal training but who wanted to assume a greater role in furthering their community and individual interests.

Publications

Dr. Gary D. Bouma, chairman of the Department of Sociology and Anthropology at Dalhousie, and Wilma J. Bouma (MSW'73), social-worker with the Atlantic Child Guidance Centre, have published a book entitled: Fertility Control: Canada's **Lively Social Problem**

"Fertility control" refers to attempts by individuals to keep the number of living children they produce within some desired range.

The book assumes a social/psychological approach and examines the many factors which are involved in motivating in-

tration to increase student housing by building an additional residence or by purchasing apartment buildings and houses. They also plan to deal with the province regarding student aid, in the hope that there will not be any cutbacks in Nova Scotia for the coming academic year.

The student elections were held on February 18, and the new executive assume their duties on May 1, 1976.

dividuals either to have numbers of children or to limit their numbers.

Student Decorated by Governor-General

Bryan D. Maillet of Moncton, a second year engineering student at Dalhousie, was decorated for bravery by the Governor-General in February of this year. In December 1974, Mr. Maillet rescued a three-year-old girl and her grandmother after their van had skid off the road into 12 feet of icy water at Folly Lake, Nova Scotia.

Clippings

Patricia Cameron, a third-year honours music student at Dalhousie, was named the provincial winner of the Nova Scotia Kiwanis Music Festival early this year; she was awarded the Kiwanis Rose Bowl and a Halifax Herald Ltd. scholarship. Miss Cameron will go on to represent the province at the national competition in Toronto later this year. Following gradu-ation from Dalhousie, Miss Cameron hopes to continue her studies in voice in England.

Archivist Armour Goes Sailing

book for University Archivist, Dr. Charles much of which is based on original A. Armour (MSC '58).

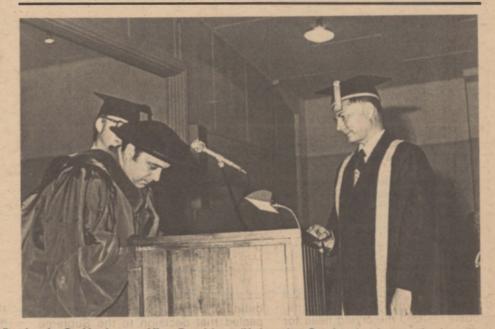

The book is a 223-page, magnificently illustrated Chronicle of the "glorious days of sail". It is a chronological account of the development of the ship building industry in the Maritimes from 1750-1925.

By the end of the 19th century, more than 26 000 vessels had been built and the Maritime provinces emerged as one of the world's leading shipbuilding areas. Ships built in coastal villages of Nova Scotia, New Brunswick and Prince Edward Island were sailed by Maritimers all over the world. In fact, in 1878, the peak year of Canadian ownership, Canada was fifth in the ranks of ship-owning countries in the world.

Sailing Ships of the Maritimes is a first The text of Sailing Ships of the Maritimes, unpublished accounts discovered by Dr. Armour, provides information not only on the vessels, but on owners, builders, crews, and captains and their wives.

> Although Dr. Armour began documenting the material for publication just three years ago, he has spent over 12 years following up ship's records, going through business forms, talking to relatives of those who sailed and searching through museums and archives.

Complementing the text is a collection of photographs by Tom Lackey of old paintings, sketches and prints. The book contains 16 colour plates, and over 100 black and white illustrations.

Dr. Louis G. Vagianos, Vice-President (University Services), shown signing the register after he received a Doctor of Laws Degree from the University of Prince Edward Island. Dr. Vagianos was honoured for his contributions to the development and planning of libraries in general and of other university campus planning and in particular for his contributions to the planning of UPEI's new Robertson Library. 65... Dr. Gerald R. Burns, MD, will be chief of Surgery at the new Dartmouth Hospital, Nova Scotia.

Will You??

Are you one of those people who knows that everyone should have a Will but has not yet got around to having it drawn up? If so, you are not alone.

Or, if you have a Will, how long has it been since you read it over? You might be surprised to find that many things have changed since it was prepared.

A Will should provide for the proper disposition of your estate and it is important that you consult your solicitor when drawing up or changing you Will.

We think this is good advice. We would also like to suggest that after your family has been provided for that you remember Dalhousie in your Will.

If you would like information concerning the correct way to make a bequest to Dalhousie, or if you would like to explore the various tax benefits that may be available through using life insurance and annuities for making charitible donations, write in confidence to: Bruce G. Irwin, Alumni & Fund Office, Dalhousie University, Halifax, Nova Scotia, B3H 4J2.
