Dear Dr. Raddall:

On behalf of Parks Canada, I would like to express our thanks for the contribution you have made to James Morrison's history of Kejimikujik National Park and the surrounding area.

The completed work will be turned over to the Park Superintendent shortly and we hope you will soon see concrete results from your input, either in the form of interpretive displays or in some published format.

Parks Canada has only recently begun to promote human as well as natural resources in our National Parks. In the Atlantic Region, the history of Kejimikujik National Park is our first major effort in that direction, hence your contribution is that much more appreciated.

Yours sincerely,

P. A. Thomson
Director,
Atlantic Region.
