

THIRD UN CONFERENCE ON THE LAW OF THE SEA

DRAFT RESOLUTION ON

DEVELOPMENT OF NATIONAL MARINE SCIENCE,
TECHNOLOGY AND OCEAN SERVICE INFRA-
STRUCTURES.

The Third United Nations Conference on the Law of the
Sea

Recognizing that the Convention on the Law of the Sea is intended to establish a new regime for the seas and oceans which will contribute to the realization of a just and equitable international economic order through making provision for the peaceful use of ocean space, the equitable and efficient management and utilization of its resources, and the study, protection and preservation of the marine environment;

Bearing in mind that the new regime must take into account, in particular, the special needs and interests of the developing countries, whether coastal or landlocked;

Aware of the rapid advances being made in the field of marine science and technology, and the need for the developing countries, whether coastal or landlocked, to share in these achievements if the aforementioned goals are to be met;

Convinced that, unless urgent measures are taken, the marine scientific and technological gap between the developed and the developing countries will widen further and thus endanger the very foundations of the new regime;

Believing that optimum utilization of the new opportunities for social and economic development offered

by the new regime will be facilitated through action at the national and international level aimed at strengthening national capabilities in marine science, technology and ocean services, particularly in the developing countries, with a view to ensuring the rapid absorption and efficient application of technology and scientific knowledge available to them;

Considering that national and regional marine scientific and technological centres would be the principal institutions through which States, and in particular, the developing countries, foster and conduct marine scientific research, and receive and disseminate marine technology;

Recognizing the special role of the competent international organizations envisaged by the Convention on the Law of the Sea, especially in relation to the establishment and development of national and regional marine scientific and technological centres;

Noting that present efforts undertaken within the United Nations system in training, education and assistance in the field of marine science and technology and ocean services are far below current requirements and would be particularly inadequate to meet the demands generated through operation of the Convention on the Law of the Sea;

Welcoming recent initiatives within international organizations to promote and coordinate their major international assistance programmes aimed at strengthening marine science infrastructures in developing countries;

(1) Calls upon all Member States to determine appropriate priorities in their development plans for the strengthening of their marine science, technology and ocean services;

- (2) Calls upon the developing countries to establish programmes for the promotion of technical co-operation among themselves in the field of marine science, technology and ocean service development;
- (3) Urges the industrialised countries to assist the developing countries in the preparation and implementation of their marine science, technology and ocean service development programmes;
- (4) Recommends that the World Bank, the Regional Banks; the UNDP and the Interim Fund on Science and Technology and other multilateral funding agencies augment and coordinate their operations for the provision of funds to developing countries for the preparation and implementation of major programmes of assistance in strengthening their marine science, technology and ocean services;
- (5) Recommends that all competent international organizations within the United Nations System expand programmes within their respective fields of competence for assistance to developing countries in the field of marine science technology and ocean services and coordinate their efforts on a systemwide basis in the implementation of such programmes paying particular attention to the special needs of the developing countries whether coastal or landlocked;
- (6) Requests the Secretary General of the United Nations to bring this resolution to the attention of the General Assembly at its 34th Session.

DALHOUSIE UNIVERSITY ARCHIVES DIGITAL SEPARATION SHEET

Separation Date: June 23, 2015

Fonds Title: Elisabeth Mann Borgese

Fonds #: MS-2-744

Box-Folder Number: Box 173, Folder 32

Series: United Nations

Sub-Series: UNCLoS III : publications, drafts, and speeches

File: Miscellaneous loose documents on the Law of the Sea negotiations

Description of item:

File contains two unpublished items:

- (1) "Review of the Sixth Session of the Law of the Sea Conference" by Kazou Sumi
- (2) A proposal by Maxwell Bruce entitled "Advocate for the Unborn."

Reason for separation:
