

THE JAPAN SHIPBUILDING INDUSTRY FOUNDATION

Senpaku Shinko BLDG. 1-15-16, Toranomon, Minato-ku, Tokyo 105 Japan

Ref: IA-1555

Date: June 9, 1988

Dr. Elisabeth Mann Borgese
Chairman
International Ocean Institute
P.O. Box 524
Valletta
Malta

Dear Dr. Borgese:

Thank you for your letter of April 28 and the final report on China training programme which the Japan Shipbuilding Industry Foundation could have an opportunity to cooperate with you through our grants.

However, I have to inform you regarding your new proposal, requesting our financial assistance to your international conference Pacem in Maribus XVI, that the JSIF's Screening Committee was unable to adopt your proposal due to our current priorities in the area of overseas assistance.

I wish you every success your forthcoming international conference.

With best wishes,

Sincerely yours,

佐川 湯平

Yohei Sasakawa
Vice President

Could we please have a copy or two of this in Malta?

Mr. Yohei Sasakawa
Japan Shipbuilding Industry
Foundation
Senpaku Shinko Bldg.
1-15-116 Toronomon, Minato-ku
Tokyo 105, Japan

Dear Mr. Sasakawa:

May I refer to our correspondence of 1987/88. In 1987 I was awarded the Sasakawa Environment Prize -- which was all applied to scholarships to our training programme. That year you generously added another grant of \$50,000 for our training programme in Beijing, China.

Our Institute has gone a long way since that time. We have done a great deal of policy research, published widely, organised four more Pacem in Maribus conferences -- among which one on shipping, ports and harbours, in Rotterdam. The publication of the proceedings of that conference, by Pergamon Press, is imminent, and I shall see to it that you will receive a copy.

Our training programmes are expanding all over the world. We have completed almost 40, and the number of our alumni is nearing 700.

The latest stage of our expansion consists in the establishment of Operational Centres in India, Colombia, Fiji and Senegal, to consolidate our regional training programmes, intensify relations with our alumni, strengthen region-specific research, and organize brief seminars with decision-makers. This development has been made possible by a grant of 2.6 million dollars by the World Bank's Global Environment Facility. The programme is to start next January.

We are now organising a second training programme in China, on the invitation of SOA. It will take place, this time, in Xiamen, at the Third Oceanographic Institution. I have just been in China and arranged all the details.

Dalhousie University

International Ocean
Institute

I.O.I. - Malta

Enclosed please find the syllabus, as agreed between IOI and SOA.

We are very happy with the programme. It has a number of innovative features, such as the weekly round-tables which will involve the whole faculty of the Chinese Oceanographic Institutions; a lot of case studies, and a special programme on data management. SOA is also sending one of its research ships for a cruise for the participants.

The programme will be co-sponsored by the United Nations University.

Could we invite you to co-sponsor the programme? Could we apply, once more for a grant for scholarships? If it could be \$80,000, i.e., 50 percent of the budget, it would help us greatly.

For your information, I am enclosing also some information about our forthcoming conference in Lisbon, which is making a direct input into the UNCED process.

Pacem in Maribus XXI, in 1993, will be in Japan.

With all good wishes,

Sincerely yours,

Elisabeth Mann Borgese
Chairman

Chair, International Ocean Institute
FAX No.: 3586 4706

Date: September 14, 1993

Subject: Cooperation

Dear Mr. Morishima,

Our colleague and friend, Dr. Alicia Barcena, suggested that we should get in touch with you to explore the possibilities of cooperation. Permit me to give you some very succinct information about our institute and its current projects.

The International Ocean Institute (IOI) is a nongovernmental organisation, with headquarters in Malta and an operational Centre in Canada, at Dalhousie University. Our activities consist of policy research, training, conferencing, and publications. Recently we received a quite substantial contribution from the World Bank's Global Environment Facility (GEF) which enabled us to establish four new operational centres, in Fiji (in cooperation with the USP), in India (in cooperation with IIT), in Senegal (in cooperation with the Economic Commission for Africa) and in Colombia (in cooperation with the Jorge Tadeo Lozano University).

Our training programmes, designed particularly for mid-career civil servants from developing countries, are broadly interdisciplinary, covering Law of the Sea, introduction to oceanography, management of living and nonliving resources, coastal management and the management of ports and harbours, marine science policy, technology development and management, national legislation and the building of national infrastructure, regional development and cooperation, sustainable development in small islands, etc. Particular emphasis is laid on the implementation of Agenda 21 as it relates to the seas and oceans and other post-UNCED developments (the UNCED follow-up Conferences between now and 1995). These are intensive, 10-week programmes, comprising 300 classroom hours, field trips,

simulation exercises, and case studies.

We have conducted over forty such programmes, in all parts of the world, at an average rate of four programmes per year. Over the next years, the number of programmes will be doubled.

We always need scholarships for our participants. On the average, each scholarship, for a ten-week programme, costs \$10,000, and this includes air fares, ten weeks of room and board, tuition fees, teaching materials, field trips, medical insurance, and pocket allowance.

As part of our endowment drive, we are now trying to get a number of endowed scholarships, i.e., endowments of \$100,000 each, which would maintain the scholarship in perpetuity.

We would like to discuss the possibilities of endowed or *ad hoc* scholarships with you.

As already mentioned, our activities are not restricted to training programmes, and we shall be glad to provide you with additional information when we meet on Thursday at 16:00. We are looking forward to this meeting.

With all good wishes,

Sincerely yours,

Elisabeth Mann Borgese
Chair

To Ms. Elisabeth Mann Bergere,
From Masako

You have got an appointment with

Mr. Morishima of The

COPY

Earth Environment Foundation

at 16:00 on Thursday 16th.

For his information please send

Fax regarding your project to

3592 - 5090;

(FAX NUMBER)

(Their telephone number is 5251.1533)

This is probably the Foundation that
Ms. Barcena was talking about, for the

president's name is Mr. Kato, and

they have a fund called

"Japan Fund for Global Environment."

DALHOUSIE UNIVERSITY ARCHIVES DIGITAL SEPARATION SHEET

Separation Date: August 11, 2016

Fonds Title: Elisabeth Mann Borgese

Fonds #: MS-2-744

Box-Folder Number: Box 256, Folder 9

Series: Administrative records of the International Ocean Institute

Sub-Series: Correspondence

File: Correspondence with Japanese Non-Governmental Organizations (NGO)

Description of item:

File contains copies of the following speeches from the President of Japan Marine Machinery Development Organization:

Hamada, Noboru. "A Few Proposals on the Ship Technology for the 21st Century." Conference record, 15th Meeting of the US-Japan Marine Facilities Panel, May 1989.

Hamada, Noboru. "Modern Sail-Assisted Commercial Vessels."

Reason for separation:

7 pages removed from digital copy due to copyright concerns.
