Waterloo, April 3 1985.

Dear Elisabeth,

I have just returned from Salzburg where I finalized all last details with the Governor of Salzburg for the Aurelio Peccei Tagung which will be organised on October 11 and 12 in Salzburg. First of all, it would be my pleasure if you could accept an invitation to be with us these two days. Also I would very much like to invite you to present the paper on Environment. During the Aurelio Peccei Tagung, we will deal with 5 issues : Peace, Youth and Development, Environment, Science and Technology, Politics and Economics. The objective of this meeting is to put forward and illustrate the state of the world today. Second we will indicate the concrete steps that have to be undertaken prior to the ending of the century. A summary of this meeting will be taken up as an epilogue to the biography of Aurelio, I am preparing at present.

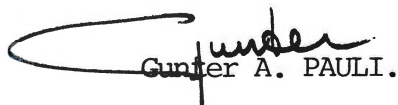

I think you are the most appropriate person to prepare this paper on Environment . The intervention is to be short and concise and will be limited to 20 minutes. I hope this will not require from you excessive preparations.

The usual Salzburg hospitality foresees covering of lodging and transporation. We would very much appreciate though if you make an advanced travel arrangement to limit the cost for transportation. We have quite a few overseas guests and the budget limits imposed are very stringent.

Could you kindly indicate to me if you could accept being with us and presenting your paper on october 11 and 12 and what the budgetary implications would be for us regarding your travel arrangements ?

I look forward to meeting you again by coincidence in an airport or at the Salzburg Conference. I remain, in the mean time,

With best regards,

  
Gunter A. PAULI.
