## THE FOOTBALL DILEMMA

Since 1960 the Dalhousie Football Team has won only one game in 25 starts. The single win was scored against Acadia in the opening game this year and in the seven games played during the season the Tigers had a total of 261 points scored against them while scoring a mere 46 points against their opponents. Even so, Dalhousie finished in second to last place in the league standings. That the league is unbalanced is obvious. What to do about it is not so obvious.

Dalhousie plays football against six other universities and two service teams in the Atlantic Football Conference. The Tiger's poor record in the league is not due to a lack of determination and effort on the part of the players and coaching staff. In fact, the team should be commended for its fine display of sportsmanship in the face of overwhelming superiority. The reason that Dalhousie does not measure up to the better teams in the league is that these teams recruit players from the United States and Central Canada. Dalhousie does not recruit.

In their overzealous efforts to win games, several of the teams go far afield to recruit first class football players. These imports are more experienced and generally better players than the rank and file who come to university from the Maritimes, where football is played in only a handful of high schools.

This year Dalhousie has come to the crossroads and must decide on a course of action. Lagging interest and dropping attendance points up, all too clearly, the fact that students and alumni are no longer willing to attend football games in which the Dalhousie team is completely outclassed and the final outcome is never in doubt from the opening kick-off to the final gun. Thus the dilemma. Since the other universities are unlikely to stop, or even curtail recruiting, Dalhousie must either recruit or drop out of the league as it is now constituted.

But to understand the dilemma it is necessary to understand what recruiting can mean. At one end of the scale, unlimited recruiting can mean offers of free board and tuition, pure athletic "scholarships", exceptions to entrance and academic requirements. At the other end of the scale it can mean no more than the mailing of a few letters from the athletic department to likely prospects who have the necessary academic requirements. Between the two extremes there are many variations.

To label any university in the present league a practitioner of unlimited recruiting would be unfair and foolhardy without substantiating evidence. However, it is common knowledge that several universities do sanction intensive recruiting programmes and such lopsided scores as 60-0, 77-0, and 90-0 are the result.

Dalhousie cannot continue to compete against other teams on such an unequitable basis. It would be unfortunate if Dalhousie had to drop out of intercollegiate football, but if participation on an equitable basis can only be achieved through unlimited recruiting then the game is not worth the price.

To sacrifice academic standards for football scores is to lose sight of the purpose of a university. Athletics are extra-curricular activities in a university and must of necessity remain subsidiary to academic standards, although there is an acceptable middle-ground to be found within the labyrinth of the dilemma.

In the final analysis, Dalhousie must either recruit or drop out. If the athletic staff can, through limited recruiting secure good players who have adequate entrance requirements, then recruit they should. If, however, good players cannot be secured without bending the academic standards even slightly, then Dalhousie should drop out.

## DR. HICKS' INAUGURATION SCHEDULED FOR FEBRUARY

Dr. Henry Davies Hicks will be installed as the seventh President and second Vice-Chancellor of Dalhousie University on Saturday, February 1, 1964.

Dr. Hicks, who assumed the duties of the presidency in September 1963, following the retirement of Dr. A. E. Kerr, will be formally installed as President and Vice-Chancellor during a colorful ceremony in the Dalhousie Gymnasium at three o'clock on Saturday afternoon.

The highlight of the inauguration ceremonies, will be the formal investiture of Dr. Hicks by the Chairman of the Board of Governors, Donald McInnes, Q.C. During the programme, President Emeritus, Dr. A. E. Kerr will entrust the incoming President with a replica of the University Seal.

On Saturday morning, distinguished scholars from Great Britain, the United States and Canada will take part in a symposium on "The Place of the University in the Modern World". Two distinguished educators have already accepted an invitation to participate in the symposium.

Dr. Edwin N. Griswold, Dean of the Harvard Law School has accepted as has Professor J. P. V. D. Balsdon of Exeter College, Oxford. An eminent scholar and historian, Dr. Balsdon is advisor to the British Government on higher education.

The symposium will be held at 10 a.m. in the University of King's College Gymnasium. Both the symposium and the inauguration ceremonies will be open to the public.

---

## Alumni and Faculty Plan Dinner to Honour New Dalhousie President

The Dalhousie Alumni Association and the Dalhousie Faculty Association will officially welcome Dr. Henry D. Hicks as Dalhousie's newly installed President at a special dinner on February 26, 1964.

Dr. Hicks, who will be inaugurated as President and Vice-Chancellor on February 1st, will be guest of honour at the dinner which is being planned by a committee representing both associations. The dinner will be held in the Commonwealth Room of the Nova Scotian Hotel and a large representation from the Alumni and Faculty Associations is expected to attend.

Although detailed arrangements have not been completed as yet, the committee will be meeting early in the new year to finalize plans for the dinner. Members of the committee are George C. Thompson, Mrs. D. K. Murray, Mrs. H. W. Doane and Professor Mirko A. Usmiani.

Alumni and "Friends of Dalhousie" living outside the Halifax-Dartmouth area who might like to attend the dinner are invited to contact the Dalhousie Alumni Office early in January for further details.

## Sponsor Public Lectures By Distinguished Psychologists

Four distinguished psychologists visited Dalhousie during the fall to speak in a series of public lectures on the "Nature of Modern Psychology". The lecture series was organized and sponsored by the University's Department of Psychology.

Dr. D. O. Hebb (B.A. '25, Dalhousie) of McGill University, gave the first lecture on October 18th on "Brain and Behavior". In his lecture, Dr. Hebb dealt with the latest facts and theories regarding brain function.

Prof. Hebb has suggested that the brain at birth consists of a mass of nerve cells, which are "firing" at random. Originally, a particular pattern of sensory stimulation would activate, by chance, some of these cells and not others.

Through such a firing of a number of the same cells, whenever the same stimulus occurs, patterns of cell activity are formed in the brain.

Extension of such ideas has enabled Prof. Hebb to offer explanations of several disparate situations, such as effects of brain injuries on thoughts, perception of simple forms, early experiences, expectancy and boredom.

Prof. Hebb's achievement has been in offering, for the first time, a bridge across the gap between activity of single nerve cells in the brain and the complicated psychological activities we observe. Prof. Hebb is well-known internationally. He is the only Canadian who has been president of the American Psychological Association.

The lecture series was originally scheduled for the 234 seat auditorium in the Sir James Dunn Science Building, but the "standing room only" audience for the first lecture forced a move of locale to the University of King's College Gymnasium for the remaining three lectures.

The second lecture was given a week later on October 25th by Dr. Ogden R. Lindsley on "New Techniques in the Study of Human Behavior".

Dr. Lindsley is Director of the Behavior Research Laboratory of the Harvard Medical School, where his work has

(Continued on page 7)

## ATHLETICS:

Building  
Storehouses  
of  
Warm  
Memories

KENNETH D. GOWIE  
*Director of Physical  
Education and Athletics*

There is a new feeling about athletics and physical education at Dalhousie University. In the past year some of what has seemed to be a completely apathetic attitude towards this phase of university life has disappeared. Now there is wider participation in a broad spectrum of activities by students and non-student alike. This change has been brought about by a new awareness of the contributions which can be made through a sound program of intercollegiate athletics, inter-faculty athletics, recreational activities, casual participation, and instruction.

The present program is designed to offer opportunities to students in these five broad areas.

In the Intercollegiate Athletic program Dalhousie now participates in Canadian Football, Basketball, Hockey, Track and Field, Swimming, Golf, Volleyball, Tennis, Curling, Soccer, Cross Country, and Skiing. In recent years Dalhousie's win-loss record has left a lot to be desired although the winning of a game or contest is not nearly as important as the quality of participation and the returns to the individual players. Additions to the staff of the department in the persons of Miss Carol Arnold, to give direction to the women's program, Mr. Joseph Rutigliano as Head Football Coach, and Mr. Alan Yarr as Head Basketball Coach have already made significant contributions to individual students and the new spirit on the campus this Fall in our athletic program is in no small measure a direct result of their skills, professional preparation and dedication to their work and to the calibre of this and last year's Freshman classes.

The Interfaculty Athletic program for men is under the direct supervision of the Dalhousie Amateur Athletic Club. Under the leadership of Mr. John MacKeigan a broad programme of sports is being offered to all male students who wish to participate. Eight-man Flag Football, Hockey, Cross Country, Curling, Tennis, Table Tennis, Squash Racquets, Handball, Basketball, Volleyball are among the activities sponsored by the DAAC under the guidance of the Department. Teams from Arts, Science, Meds., Dents., Engineers, Commerce, Law, and Education and Pharmacy compete for an overall Interfaculty Championship Trophy. In the girls' program competition is less formal, but participation in the DGAC Fun Nights each Monday in the Gymnasium is increasing.

Some activities are of an informal voluntary nature. The department has encouraged the founding of a University Badminton Club. This group meets each Tuesday evening with approximately sixty men and women playing each week. The YMCA swimming pool has been rented each Wednesday night and although time is limited a recreational swimming program is available to all students. Each Tuesday evening the Men's Judo Club meets under the direction of Dr. Al Swanzey (Dents, '63) and each Monday evening instruction is made available to any woman student who would like to acquire skills in this sport. A gymnastics club under the direction of Gordon Price, Halifax Recreation Director, will start in the next few weeks.

For casual participation the university has provided a weight-training room where individuals interested in attaining a level of fitness may strive under the direction of members of the physical education staff. Skating opportunities are provided for all students on Tuesday and Thursday evenings and Saturday afternoons. Table tennis, tennis, squash and handball equipment and facilities are available for student use, and whenever the gymnasium is not scheduled for activities all students are encouraged to use the facilities. The Administration have provided caretaker and equipment room staff to enable us to have personnel on duty from 8.00 a.m. to 11.00 p.m. daily, Monday through Saturday.

The physical education and athletic staff are aware of the low level of fitness and skill possessed by the majority of freshman students and at the present time is offering an extensive program of instruction to all students on a voluntary basis. Unfortunately those who would most benefit from such a program refrain from participation because of the lack of prior satisfactory experiences. In spite of adequate time available in their time tables no provision is made for regular classes in physical education activities to give them either the skills which would enable them to participate more broadly in university life, a basic level of fitness which would enable them to approach their tasks with more vigour and vitality, or an attitude towards fitness and athletics of such understanding and appreciation as to be in keeping with its role in our society.

The members of the Department of Athletics and Physical Education, and the Administration are aware of the need for more adequate facilities and leadership for the athletic and physical education programmes. The gymnasium was built in the early "thirties" when the campus population was about four hundred and fifty; Dalhousie lacks a swimming pool for recreational, instructional and competitive swimming. The quarter-mile track was lost, and the football field was made undersized when the Memorial Rink was constructed. All men's and women's outdoor activities - inter-collegiate and interfaculty, competitive and recreational, for games and for practices must be carried out on one inadequate field. The inauguration of a Dalhousie Summer School brings the need for waterfront facilities to provide Maritime activities in a recreational program for the student who will be attending during the summer term. We are confident that all these needs will be met in due course, as monies become available for this important area of student life and experience at Dalhousie. In the meantime every effort is being made to utilize the present facilities to the fullest extent.

Already there is new life on Dalhousie's campus. Our activity program has a greatly increased participation. Students are identifying themselves more closely with athletics as evidenced by their turnout for teams, their support of representative athletics in the Maritime Intercollegiate Athletic Association programme, as spectators, and they are confident that their teams are on the way up. Aside from the returns to those who participate actively in the various sports all students are benefitting from the warm and lasting friendships being made at their Alma Mater. Undergraduate and graduate students, faculty and administration members are all contributing to whatever level of success we have already attained. We are all building storehouses of warm memories to last a lifetime. . . and in the future we will be recalling our shared rejoicing at our wins, and our mutual sorrows that accompanied our defeats.

I must add one more group to those who have been mentioned already as having contributed to the new spirit at Dalhousie: the Alumni. So far our efforts have met with considerable support from many alumni. Your Director, and the Alumni Executive as well as many individuals have given the staff and students much encouragement which has been sincerely appreciated. We do, however, need and solicit your increased and continued interest and support. We hope that in increasing numbers you will identify yourselves with the activities of to-day's and tomorrow's students in their striving for a better Dalhousie.

Ken Gowie, B.A. ('UWO'), M.A. ('NYU'), came to Dalhousie as Director of Physical Education and Athletics in 1962. Prior to that he was Assistant Director of Athletics at Western and Head of the Department at Saskatchewan. During the summer Ken also assumed the duties of Head of Men's Residence at Dalhousie.

# DALHOUSIE FUND REACHES 7.3 MILLION

## Alumni Give \$565,540

Dalhousie University has now reached 45.3% of its objective in its drive for \$16,100,000 to cover capital and non-capital requirements. The Fund Office reports that gifts, grants and other commitments total \$7,334,802.44.

Dr. Henry D. Hicks, Dalhousie President, recently returned from a Western Canadian tour where he remarked that he was impressed by the degree of loyalty evidenced in the cities of Winnipeg, Calgary, Edmonton and Vancouver. Following this tour, Dr. Hicks spoke to the Dalhousie Club of New York.

An all-out effort is being made by almost 1,000 volunteer canvassers to clean up the 1963 effort in all areas of Canada and the U.S.A.

The Student Blitz of local individuals and small business firms in Halifax held on November 1 and 2 was an excellent effort, particularly from the public relations viewpoint. The average gift per prospect was \$3.35, and approximately \$3,000 was added to the Fund total by 200 student canvassers.

Gifts from Halifax firms to date total \$816,455.50 and Halifax individuals have made gifts totalling \$533,951.27. Dalhousie alumni giving has been encouraging too with gifts from all areas in Canada and the United States amounting to \$565,540.32.

Currently, the Fund Office staff are preparing almost 10,000 mailings to unreported alumni, individuals and corporations throughout the complete canvass area.

The needs of Dalhousie until 1966 have been determined by the Board of Governors, Senate, faculty and administration of Dalhousie and the development programme intends: to strengthen teaching and research by providing new and expanded physical facilities and by providing better salaries for an augmented faculty; to enlarge its campus and to provide better housing for students; and to make it possible for deserving undergraduates and graduate students to get an education by increasing scholarships and other financial aid.

Regarding the Fund results to date, officials of the Dalhousie Fund recently commented: "The danger is that people will now sit back contentedly and consider the job done. Nothing could be farther from the truth. We have thus far managed to acquire 45.3% of our capital and non-capital objective. While this is very encouraging, the sobering fact is that \$8,765,198 more is yet to be raised. This is only a good start, a foundation for the job ahead. With our success in 1963 as a springboard, we're after more in '64?"

## Development: A MASTER PLAN FOR DALHOUSIE

"As expansion of Dalhousie's Men's Residence progresses swiftly, steps are being taken to continue the university's building program without delay," Henry D. Hicks, the university's president, said recently.

"The firm of Marshall & Merritt of Montreal has been asked to provide a master plan for development of both Studley campus and Forrest campus," Dr. Hicks added.

At the same time architects have been appointed for the next four buildings required as part of the university's five-year expansion plan. J. Philip Dumaresq and Associates will design the new Medical Building, which is expected to cost in the vicinity of \$5,000,000.

C. D. Davison and Company are charged with planning the extension to the Macdonald Memorial Library, or, if it proves more advantageous, designing a new library building.

Additions to the Arts and Administration Building, which would include the Rebecca Cohen Auditorium, will be planned by C. A. Fowler and Company.

Dalhousie has received a special \$400,000 bequest to be used for the new auditorium. The Dalhousie University Fund Campaign is now well on its way to raising the \$10,000,000 needed to erect the other buildings, as well as an addition to the Chemistry Building, Students' Union Building and swimming pool.

"We are delighted that the architect for the Medical Building has been appointed," said Dr. C. B. Stewart, dean of the Faculty of Medicine. "Now we can go forward as rapidly as possible."

"There is a pressing need for the new building," he said, "as the number of students asking admittance is steadily increasing and will likely grow faster as Newfoundland's new scholarship plan takes effect. It looks already as if next year we shall be turning away well-qualified students, because of lack of space."

## PSYCHOLOGISTS:

(Continued from page 3)

won for him an international reputation. Almost all of this research has been devoted to developing new ways of acquiring and maintaining control of the behavior of psychotic patients and of healthy children and adults.

He is the author of more than 30 papers describing his experiments in this field, and he is the recipient of the Hofheimer Award, an annual research prize given by the American Psychiatric Association for the most outstanding contribution to psychiatry.

The third public lecture was given by Dr. Daniel S. Lehrman of the Institute of Animal Behavior at Rutgers University, who spoke on "Hormone Behavior."

Dr. Lehrman has a distinguished reputation amongst zoologists and experimental psychologists for his research into the ways in which hormones and past experience combine to control behavior. Much of his research has been done with doves, largely because they are convenient animals with which to work if one is interested in this particular set of problems - in the same way as fruit flies are the most suitable animals for experimental genetics and cats for certain branches of neurophysiology.

Dr. Lehrman's more general interests lie in the field of ethology, a rapidly growing area of specialization for zoologists and psychologists which is concerned with the study of behavior as a factor in evolution. Konrad Lorenz is the most famous European working in this field (his book "King Solomon's Ring", is undoubtedly the best popular work ever written on animal behavior) and in many ways Daniel Lehrman is his American counterpart.

The last speaker in the series was Dr. Abram Amsel of the University of Toronto. His subject was, "Psychology of Learning: The Present Outlook".

Dr. Amsel is best known for his theoretical and experimental contributions to the psychology of learning. Adopting the position that certain emotional components are involved in changing environmental conditions, he has successfully integrated many previously disparate facts of learning. For example, he has postulated that an emotional reaction is elicited in an animal when it fails to find reward in a previously rewarded situation. Dr. Amsel has demonstrated that this emotional component of non-reward

can then be conditioned to the situational cues in such a way that "emotion" becomes a normal part of the animal's behavior pattern. Such experiments have helped to explain how inconsistently rewarded behavior patterns become more persistent than consistently rewarded responses.

Working within the framework of a strict scientific behaviorism, Dr. Amsel has been able to make specific deductions that describe what will happen to an organism's responses following different histories of reward and non-reward. Employing ingenious techniques, he and his students have compiled confirmatory evidence for his theoretical position which enables him to account for such phenomena as expectation, frustration, and discrimination learning. More recently, Dr. Amsel has turned his attention to the activity cycles of animals where he has already made a number of valuable contributions. The psychology of learning plays a dominant role in modern psychology and Dr. Amsel is one of the outstanding men in the field.

Attendance at the lectures which reached a maximum of 500 for the second lecture, indicates the growing public interest in psychology. In sponsoring a lecture series of such excellent calibre, the Dalhousie Department of Psychology has done a deed of worthy public service.

## Graduate Studies:

239 OUT OF 1000

Dalhousie's Faculty of Graduate Studies which had an enrollment of 147 students last year, has an enrollment of 239 graduate students and post-doctoral fellows this year. This enrollment however, represents less than one-quarter of the 1,000 acceptable applications received by the University.

Dean W. R. Trost of the Faculty of Graduate Studies, reports that applications were received from practically every non-communist country in the world.

"We had about 1,000 acceptable applications", said Dean Trost, "but limitation of space and money forced us to reject the majority".

About 70 qualified students from the Atlantic Provinces had to be refused due to lack of sufficient funds for scholarships. Dr. Trost foresees a continuing growth of graduate enrollment, keeping pace with the erection of new facilities envisaged

in the University's Five Year Expansion Plan.

In the fall of 1968, Dr. Trost expects a graduate enrollment of 750, consisting of about 250 master students, 250 Ph.D. students, and 250 post-doctoral fellows.

## Men's Residence:

A NEW WING ON THE WAY

Work on the much needed extension to the Dalhousie Men's Residence has begun.

The \$600,000 wing will add 162 beds to the residence and bring the total capacity to 312. There will be four floors in the new wing which will extend from the east side of the present building, parallel to Coburg Road.

## Physiotherapy:

SOMETHING MORE THAN  
A BACK RUB

Within three years the acute shortage of physiotherapists which has existed in the Atlantic Region should be eased to a slight degree.

Fifteen students now are enrolled in the newly created School of Physiotherapy at Dalhousie University. Eight of them come from the Halifax-Dartmouth area, the others hail from the rest of Nova Scotia, New Brunswick and Prince Edward Island.

The girls will graduate with a diploma in physiotherapy after two years of academic study and five months of internship and take positions in hospitals, rehabilitation centres or other agencies where limited or no services formerly existed.

Before that day arrives, these students have a lot of hard work ahead of them. Physiotherapy is far from a snap course and there is a great deal more to it than merely knowing how to rub someone's back.

The curriculum, as outlined by the university, concentrates heavily on academic study in the medical and physical sciences. Practical training begins toward the end of the first year and is increased in the second year of study.

"The physiotherapist is an integral part of the medical team and our course is designed to provide the knowledge and training she will need" explained

(Continued on page 8)

## PHYSIOTHERAPY:

(Continued from page 7)

Dr. Arthur H. Shears, medical director of the school.

For this reason the new school has been included under the university's Faculty of Health Professions, and the length of term is longer than those of other faculties beginning early in September and ending late in May.

Lack of facilities limits registration in the course at present to 15 students each year but officials are hopeful that registration will climb to 35 when facilities become available.

Entrance requirements are somewhat higher than for average university courses. An average of 60 per cent is required and the student must have mathematics, physics and one of chemistry or biology in addition to standard senior matriculation requirements.

Personal qualifications mentioned by the medical director include an interest in helping to treat and rehabilitate persons of all age groups and the ability to be objective without emotional involvement—basically the same qualities required of anyone interested in the healing arts.

Incidentally, students must be able to swim and pass a recognized water safety test. Instruction is provided once a week for all students during the first year.

Dalhousie's School of Physiotherapy is the seventh school to be established in Canada. Others exist at McGill and the Universities of Montreal, Toronto, Manitoba, Alberta and British Columbia.

## Entrance Requirements:

### GRADE XII BY 1965?

A committee of the Senate of Dalhousie is studying the desirability of requiring completion of grade XII for entrance to the university, Dr. Henry D. Hicks, announced recently. The matter is also under study by a committee of the Central Advisory Committee on Education in the Atlantic Provinces.

Some recommendation may be made by the Senate during the coming academic year, said President Hicks. The fullest discussions will be held with other universities and with the Department of Education.

It is very unlikely that any change in entrance requirements would be effective before the fall of 1965 and the general public will be given adequate notice if and when any changes are recommended.

## Research:

### MORE MONEY FOR HOGS THAN FOR HUMANS

A neuro-chemistry centre is being developed in Halifax for detailed study of metabolism in patients with mental disorders (including retardation and emotional troubles), muscular dystrophy, diabetes and eventually other ailments.

Dalhousie University has made space available for this centre in the Public Health Building on University Avenue. Dr. W. A. Cochrane, head of the Department of Paediatrics at the Dalhousie Medical School and chief physician, Department of Medicine, at the Children's Hospital, coordinates the plans.

"I hope we will be able to move into those new rooms in the near future", he says. "The place has been painted, the benches are finished, but we must wait to receive a grant for the necessary equipment. To get these things is not easy, but it is much harder yet to find money for support of full-time scientific personnel. We need technicians and research assistants."

"In the United States," Dr. Cochrane added, "of the funds provided by the federal government for research in the life sciences, 63% is devoted to medical science research. Biology receives 23%; the remaining 14% go to agriculture. Canada reverses the order, gives 63% to agriculture, 15% to biology and 22% for research into medical science.

"It is frequently easier to get money for equipment than for investment in personnel. Yet, if money is invested in the right person, the returns in the long run are much greater than from machines.

"Canada spends only 1% of its gross national product on research, whereas Britain spends 2% and the U.S. 7%. It isn't generally known that 15% of the medical research funds spent in Canada come from the United States. This aid will likely be cut in the near future.

"Medical research is not being adequately supported in Canada. Far great-

er federal and provincial contributions are necessary. Funds must be found to provide for expansion of inadequate research facilities, but also to support young Canadian men and women who wish to enter a career as investigators of human diseases, or as technical assistants in this field."

## Institute of Public Affairs:

### LABOUR, MANAGEMENT AND TAXES

Conferences on taxation, management, and labour relations were presented by the Dalhousie Institute of Public Affairs during the fall.

On October 25-26, the Institute presented, in co-operation with the Canada Tax Foundation, a tax seminar attended by approximately 60 people from Nova Scotia, New Brunswick, and P.E.I. During the seminar, which was opened by Dr. H. E. Read, dean of Faculty of Law, problems concerning sale of assets between affiliated corporations, as occurring in a "metro shuffle" and Excise Tax were discussed.

"Building Your Management Team", was the theme of a one-day seminar for senior management held on November 1st. Philip R. Kelly, personnel and training manager, Port of New York Authority, was the guest speaker at the seminar presented under the auspices of the Institute's Bureau of Industrial Relations.

Mr. Kelly, who is the author of several books and magazine articles, was educated at Rollins College and Harvard Graduate School of Business Administration. His experience includes two years as management consultant to the Turkish government. Presently he is president of the management development forum of New York.

Three of Canada's leading personalities in industry and labour were speakers at the second Joint Labour-Management Conference at Dalhousie, November 18-19. They were Dr. John Deutsch, Chairman of the Economic Council of Canada; Hon. Robert Winters, Chairman of the Board, Rio Algom Mines Ltd. and William Dodge, Executive Vice-President, Canadian Labour Congress.

The conference, which was attended by about 100 delegates was under auspices

of the Institute of Public Affairs' joint labour-management study committee. Dr. Deutsch spoke on "Significance of labour-management co-operation in the development of the national economy: The Nova Scotia agreement". Hon. Robert Winters and William Dodge gave their views on "Labour-management relations today."

## Campus Clippings

Dr. John F. Graham, Head of the Department of Economics and Sociology at Dalhousie, is spending a year at Queens University, Kingston, as Skelton-Clark Research Fellow. While at Queen's he will continue with his research on public finance in a federal country. He will spend the month of March in Vienna, Austria, at the invitation of the Institute for Advanced Study recently established there jointly by the Austrian Government and the Ford Foundation.

"Art, Science and Judgment" was the title of the John Stewart Memorial Lecture delivered by Dr. Ian Macdonald (B.A. '26, M.D.C.M. '30) on November 6th. Sydney-born Dr. Macdonald has earned renown as one of Canada's outstanding clinical teachers, medical consultants and administrators.

His present appointments are: Professor of medicine and director of Postgraduate Medical Education, University of Toronto; chief of service medicine Sunnybrook Hospital; Department of Veterans' Affairs advisor in medicine; senior attending physician Toronto General Hospital. He is a past president of the Academy of Medicine of Toronto.

Three postgraduate students in the Dalhousie Department of Psychiatry have received their certification as psychiatrists. They are Dr. Derek H. Spark, who received his M.D. at Durham University's King's College in England; Dr. Alan Frecker, from Newfoundland, who graduated at Dalhousie; and Dr. Douglas Paulse, a graduate of University of Wilwatersrand, South Africa.

Dr. Spark will return to work at the Nova Scotia Hospital. Doctors Frecker and Paulse go back to the Hospital for Mental and Nervous Diseases, St. John's, Newfoundland.

## CANADA COUNCIL UNIVERSITY CONCERT SERIES UNDERWAY

The first two of the five Canada Council University Concerts have been presented on campus. The Concert Series which is being sponsored jointly by the Canada Council and nine universities, is designed as an opportunity for young Canadian artists to perform before a university audience. The concerts at Dalhousie are being sponsored by the Alumni Association.

The first concert, on November 12th, featured the brilliant young Canadian pianist, Michel Dussault, who gave a splendid introduction to the series. To quote from a review in the Halifax Mail-Star, "He played a demanding programme with skill and energy. He is possessed with great strength, musical and otherwise, yet at the same time he is a pianist with great sensitivity and a musical understanding. His 'Appassionate' was a masterful display of musicianship, grace fired by a comprehensive emotional grasp of the whole."

The only detrimental thing the reviewer, Peter Hawkins, found was that, "Michel Dussault plays with a passionate intensity. . . the same undying intensity gives us an unwelcome sameness to the programme, the recital lacked a variety of approach."

Michel Dussault was followed on December 4th by soprano Fernande Chiochio. While Mr. Hawkins did not feel that her concert lived up to the initial programme, it was enjoyed by the audience. Madame Chiochio presented selections from Purcell, Bellini, Brahms, Faure, Debussy,

Poulenc, Vallerand and Obradors, and was at her best in the seven Spanish Classical Songs by Obradors, ". . . the infectious character of which sparked the singer into communicating some emotion to her audience."

Mr. Hawkins summed up his review, "Canada Council University Concert Series now in its first season, is an excellent idea. It is designed to give young Canadian artists a chance to gain experience by performing in public, something that is essential to their development," and although he felt that the second concert was not up to the quality of the first, Mr. Hawkins concluded, "It should not be regarded as representative of the series as a whole".

Attendance at the concerts has not been nearly as large as the Alumni Association had first expected, but the fall season in Halifax has been crammed with cultural presentations ranging from symphony and ballet to amateur theatrical productions. This has had a definite effect on attendance but expectations are that the remaining three concerts featuring Pierette Lepage, Pianist, on January 9th, Claude Corbeil, Baritone, on January 23rd, and Duo Pach, Violinist and Pianist, on March 5th will be better attended.

Tickets for the Concert Series are \$1.00 each (Student tickets 50c), and are available from the Alumni Office. The concerts are held at 8 p.m. in the University of King's College Gymnasium.

## MONCTON ALUMNI HEAR DR. JAMES ON PSYCHOLOGY

After the Moncton Dinner, the guest speaker, Dr. P. H. R. James, Head of the Department of Psychology at Dalhousie, congratulates the newly elected Branch President, Dr. W. B. Stewart. Looking on are Branch Secretary Bob Radford and Past President Dave MacDonald.

Dr. P. H. R. James, Head of the Department of Psychology, was the guest speaker at the third Annual Dinner of the Moncton branch on November 18th. The meeting was held in the Beaver Curling Club and was attended by a fair size delegation of Dalhousians from the Moncton area.

Dr. James opened his address by pointing out the fundamental differences between psychology and psychiatry, and told the meeting that his Department was primarily concerned with human behaviour and reactions to various situations. Through the use of humans and animals, the psychologist is able to create situations and observe the corresponding reactions. He said that psychology at Dalhousie has greatly expanded in recent years, and that the undergraduate laboratory facilities are rated among the finest in the country.

Branch President, David H. MacDonald, presided at the dinner meeting. Following the invocations given by Dr. Charlie Baxter, the alumni were welcomed to the dinner by President MacDonald. After dinner a Toast to Dalhousie was proposed by Alan Millman and replied to by Alumni Director, Bruce Irwin. The guest speaker was introduced by Bob Radford and thanked by Eric Stephenson.

The evening closed with a brief business meeting during which the following were elected to the executive for the coming year: President - Dr. W. B. Stewart, Vice-President - Hamilton Baird, Secretary - Robert Radford, and Treasurer - Weldon Matthews.

## Tantramar Branch

University President, Dr. Henry D. Hicks, was guest speaker at the third annual banquet of the Tantramar Branch, held in the Fort Cumberland Hotel on October 11th. Dr. Hicks spoke about the rapid growth which Dalhousie has experienced since World War II, and explained the University's five-year expansion programme. This was Dr. Hicks first address to a branch of the Alumni Association since he became President in September.

E. C. Hicks, Q.C., retiring president, presided over the meeting, and G. P. Hennessey introduced Dr. Hicks to the gathering. J. O. Fairbanks, Q.C., proposed the toast to Dalhousie, and this was responded to by Gordon H. Thompson, of Halifax, co-chairman of the Atlantic Gifts Division of the Dalhousie University Fund.

Prior to the dinner an informal reception was held in the lounge.

New officers were elected as follows: President, W. W. Meldrum, Sackville; Past President, E. C. Hicks, Q.C.; First Vice-President, W. Bruce Fullerton, Parrsboro; Second Vice-President, W. D. Hagen, Amherst; Secretary-Treasurer, R. L. Davison, Amherst.

## Medical Alumni Hold Fifth Annual Meeting

The fifth Annual Meeting of the Dalhousie Medical Alumni Association was held during Refresher Course Week in the Lord Nelson Hotel on Tuesday, November 5, 1963. The meeting was preceded by a reception and dinner with the President, Dr. F. Murray Fraser in the chair. A large delegation of alumni, wives and guests attended the meeting and the dance afterward.

At the conclusion of the dinner, the President convened the Annual Meeting and the annual reports of various officers were received. The report of the Nominating Committee was presented and adopted. The election of the following officers was then declared. The officers are:

## EXECUTIVE COMMITTEE

### OFFICERS

**Honorary President**  
Dr. Daniel Murray '03  
Tatamagouche, Nova Scotia

**President**  
Dr. F. Murray Fraser '32  
Halifax, Nova Scotia

**Past President**  
Dr. C. M. Bethune '31  
Halifax, Nova Scotia

**Vice-President**  
Dr. C. L. Gosse '39  
Halifax, Nova Scotia

**Secretary-Treasurer**  
Dr. C. J. W. Beckwith '27  
Halifax, Nova Scotia

### ADDITIONAL MEMBERS OF EXECUTIVE COMMITTEE

Dr. J. R. McCleave '30  
Digby, Nova Scotia

'00

The memory of the late Dr. Thomas Carlyle Hebb, M.A. '01, has been honored by the opening of the Hebb Building, a \$1,300,000 million addition to the physics building at the University of British Columbia. The late Dr. Hebb was the first head of UBC's physics department and a faculty member from 1916 until his death in 1938.

'13

Honourable J. E. Michaud, LL.B., was re-admitted to the Bar of New Brunswick after the 50th anniversary of his original admission. In the intervening half century, Mr. Michaud had moved from his law practice in Edmundston to the House of Commons, thence to the inner cabinet of the late prime minister MacKenzie King and membership in the Privy Council, and later to the judiciary as chief justice of the Queen's Bench Division. He will now be able to resume practice in the provinces.

'16

John P. Martin, B.A., historian of Dartmouth has sent us a clipping from the Dartmouth Free Press in their "70 Years Ago" column. It reads: "In the Dalhousie Gazette for October a contributor is agitating that a telephone be placed in Dalhousie College. The writer points out that such an instrument has recently been installed at Pine Hill College."

'19

Dr. John Sutherland Bonnell, B.A., received the honorary degree of Doctor of Laws from St. Dunstan's University in Charlottetown, recently. He is the only Protestant ever to receive an honorary degree from that University.

'25

Dr. Donald O. Hebb, B.A., received an honorary degree from Northeastern University in November. The occasion was the dedication of Northeastern University's new Life Science Building. He gave the principal Convocation address, his subject being "A Lively Life Science". Dr. Hebb has been associated with McGill University since 1947, and has been the

recipient of numerous professional awards including the Coronation Medal of the Canadian Psychological Association (1953) and the Distinguished Scientific Contribution Award of the American Psychological Association (1961).

Dr. John L. Nickerson, B.A., M.A. '28, Ph.D. '32 (Princeton), a Halifax native, has been appointed director of the Chicago Medical School's new department of biophysics. Since 1956 he has been chairman of the Chicago Medical School's department of physiology. He is president of the American Ballisto-Cardiographic Research Society and has served on various committees of the American Heart Association and has been Associate editor of the American Heart Journal.

'27

Miss Jean Cox, B.A., has recently completed twenty years of service with the Criminal Courts Branch of the Legal Aid Society in New York City, and for dedicated service in Legal Aid has been presented with the Reginald Heber Smith Award. The accompanying citation states in part that "for many years Miss Cox has carried the main burden of the Society's work in the Criminal Courts in New York County. Her devotion to the interest of her clients has been outstanding and her professional competence has won the praise of her associates, judges, prosecutors and other court personnel." The award was made by the National Legal Aid and Defender Association.

'29

Mrs. Ralph Russell (Margaret Ells) B.A., went with a delegation of about 50 women to a convention of Women's International Democratic Federation held in Moscow in June. She was elected leader of the group, and arrangements were made for them to visit several cities, Kiev, Tblisi, and Sochi, with a few days' visit in Poland on their way back. The group were largely members of the Women's International Strike for Peace, which Margaret helped found over two years ago.

Samuel S. Jacobson, B.Com., M.B.A. (Harv.), has been appointed to the Halifax Advisory Board of the Montreal Trust Company. He is President of Kline's Ltd., The Hudson Company Limited, and Chairman of the Public Service Commission.

'33

George C. Thompson, B.Com., LL.B. '36, of Halifax, president of Acadian Lines Limited, was elected vice-president

of the Gray Line Sight Seeing Companies Associated at their last annual meeting held in Colorado Springs. He formerly served on the board of directors.

Professor W. J. Archibald, B.A., M.A. '35, Ph.D. (Univ. Va.) was chairman of the eighth annual meeting of the Canadian Services Colleges advisory board at Royal Roads, Victoria, in November. The Board which was formed in 1958, advises and makes recommendations to the defence minister on all matters pertaining to the Royal Military College, Kingston; Royal Roads, and College Militaire Royal de Saint-John Que.

'36

Harvey L. Webber, LL.B. led the Cape Breton County Unity Appeal to victory in the recent campaign. With an objective of \$175,000, Mr. Webber went over the top for a total of over \$186,000. Mr. Webber is president of Smart Shop, Ltd., a director of Island Investors and is associated with the Cape Breton Tourist Association, C. B. Concert Orchestra, the Sydney Tennis Club and other community activities. He is also a C.B.C. commentator.

'39

Dr. John C. Arnell, B.Sc., M.Sc. '40, Ph.D. '42 (McGill), a former Halifax resident has been appointed scientific adviser to the Chief of Naval Staff. Until recently he held a similar position with the Air Staff. During World War Two he served with the RAF.

'47-'48

Walter A. G. Snook, Sci. & Eng., a graduate of Nova Scotia Technical College and former Halifax planning engineer, has been appointed as director of planning for Halifax County.

'48

Robert D. Willet, B.A., is now personnel Officer with the Fisheries Research Board of Canada. In 1954 he received a B.Comm. degree from Carleton University.

'50

George Henley, MLA, Dip. Pharm., has taken up farming again after 22 years spent in service with the RCAF and later in a career in pharmacy. In 1952 he opened his own drug store in Oxford, and started his political career. In October this year he was elected to the provincial legislature. He will farm with his brother at his old home at Roslin, near Oxford.

Dr. A. S. Wenning, M.D., C.M., has been elected an affiliate fellow of the

American Academy of Paediatrics. The work of the Society is dedicated to the improvement of child health and welfare.

Arnold W. MacKinnon, B.Com., after 13 years of employment with the Federal Government - 9 years with D.B.S., and 4 years with the Dept. National Health and Welfare - has resigned to accept a position with The Hospital Medical Records Institute of Ontario. This Institute was organized early in 1963 under the sponsorship of three Associations, The Ontario Medical Association, Ontario Hospital Association and Ontario Association of Medical Record Librarians. Mr. MacKinnon will be Assistant Director and Statistician.

'52

Capt. Thomas F. Meagher, B.A., of Canso has been appointed camp commandant at headquarters, Eastern Command in Halifax. An officer of the Black Watch, Capt. Meagher formerly was commanding officer of No. 2 Personnel Depot at Camp Gagetown.

'54

Hugh D. Peel, B.A., LL.B. '57, has been posted by the Department of External Affairs to the Canadian Embassy in Spain as Second Secretary and Consul. For the past two years he was Vice-Consul at the Canadian Embassy in Ankara, Turkey.

'56

Allan Berkshire, B.Com., B.A. '57, has been made a partner in the H. R. Doane and Company accounting firm in the New Glasgow Branch. He obtained his C.A. degree in 1958, and went to New Glasgow in 1959 as assistant manager of the firm.

'57

Douglas Pittet, LL.M. '58, Toronto, was recently elected a trustee of the Leaside, Ontario Board of Education.

'58

Richard M. Soberman, B.Sc., has received the Doctor of Science degree in the field of Civil Engineering from Massachusetts Institute of Technology. He received his Master of Science degree from M.I.T. in 1961.

'59

Dr. Alain Frecker, M.D., C.M., of Newfoundland has received his certification as a psychiatrist. He is associated with the Hospital for Mental and Nervous Diseases in St. John's, Nfld.

'60

Daniel MacLennan, LL.B., Port Hawkesbury barrister has been named counsel of the federal government's recently established board of trustees for maritime transportation unions. During his service in Montreal his law practice will be carried on by an associate. He is a native of River Denys and a graduate in Arts of St. Francis Xavier University.

November, 1963, Carole Ann Cassidy, B.A. '62, of Sussex, N. B., to Garth Bent Christie of Amherst, N. S.

November 23, 1963, Gillian Margaret Cobbold of London, England, to Brian Philip Backman, Arts '60-'62, of Halifax, N. S.

November 23, 1963, Ruth Arlene Wilson of Truro, N. S., to George Alistair Sutherland Smith, B.A. '48, LL.B. '53, of Sydney, N. S.

November 9, 1963, Dorothy Anne Gillis of New Glasgow, N. S., to James MacLellan MacConnell, B.A. '61, of Scotsburn, N. S.

October, 1963, Doris Harriett Hill of Halifax, N. S., to Guy William McQuade, M.D. '63, of Saint John, N. B.

December 7, 1963, Ann Ruth Gawley, Sc. '58-'59, of Halifax, N. S., to John Albert Donaldson, of Kingston, Ontario.

Correction—July 6, 1963, Mary Dorothy Bernice Fournier, B.A. '62, of Bathurst, N. B. to Dr. John Edgar Curtis, B.Sc. '58, M.D. '63, of Truro, N. S. (Error in last issue)

To Dr. Roland Saxon, M.D. '63, and Mrs. Saxon at Annapolis, N. S., on November 8, 1963, a son.

To Dr. Clary Townsend, M.D., '59-'63, and Mrs. Townsend at Halifax, N. S., on October 25, 1963, a son.

To Mr. Christopher Banks, Arts '60-'62, and Mrs. Banks at Halifax, N. S., on December 3, 1963, a daughter.

To Mr. Stewart McInnes, B.A. '58, LL.B. '61 and Mrs. McInnes (Eve Smith), B.A. '61, at Halifax, N. S., on November 30, 1963, a son.

To Rev. David Lennerton, B.A. '50, and Mrs. Lennerton (Barbara Bateman),

Sc. '51-'54, at Halifax, N. S., on November 11, 1963, a daughter.

To Mr. James E. Donahoe, LL.B. '57, and Mrs. Donahoe at Halifax, N. S., on October 27, 1963, a son.

To Rev. E. E. Hill, Arts '55-'56, and Mrs. Hill at Liverpool, N. S., on December 3, 1963, a son.

To Dr. G. Ross Langley, M.D., C.M. '57, and Mrs. Langley at Halifax, N. S., on November 24, 1963, a son.

To Dr. J. Douglas McLean, M.D., C.M. '60, and Mrs. McLean at Halifax, N. S., on December 3, 1963, a daughter.

To Mr. and Mrs. M. Halozan (Margaret Griffiths), B.A. '55, at Don Mills, Ontario, on December 19, 1962, twin sons.

To Mr. Gordon Ian Farquhar, B.A. '54, LL.B. '56, and Mrs. Farquhar at London, Ontario, on September 24, 1963, a son.

To Mr. Truman M. Layton, B.Ed. '57, and Mrs. Layton (Vivian Thomson), B.A. '57, B.Ed. '58, at Sackville, N. B., on June 20, 1963, a son.

To Mr. Douglas Pittet, LL.B. '57, LL.M. '58, and Mrs. Pittet at Toronto, Ontario, on August 26, 1963, a son.

To Mr. George E. R. Zinck, B.Com., '62, and Mrs. Zinck at Sydney, N. S., on November 6, 1963, a son.

## In Memoriam

Rev. Hugh M. Upham, B.A. '03, died November 5 at the home of his daughter in Truro. He was born in Halifax 88 years ago and attended Halifax Academy before entering Dalhousie University. He held pastorates in Brookfield, Hants County, Shubenacadie, Mulgrave, Doaktown, N. B., and came to Glenholme in 1940 when he retired. He is survived by four sons and three daughters.

Patrick D. O'Neil, LL.B. '49, B.A. (St. Mary's), died suddenly while driving to the funeral of his brother-in-law in Kelowna, B. C. He was born in Alberta and was 41 at the time of his death. During World War Two he fought in the Tank Corps, after which he studied law at Dalhousie. He is survived by his wife, one daughter and two sons.

Dr. Grace Rice, M.D., C.M. '03, died at her home in Halifax, November 12. After graduation she practised for two years in Northampton, Mass., and did postgraduate work in gynecology and obstetrics at Rotunda Hospital, Dublin. She then came to Halifax where she continued her practice until her retirement 12 years ago. In June 1954, she was awarded a life membership in the Feder-

ation of Medical Women of Canada. The award, one of three, was the first to be awarded since the association was organized in 1924.

Hubert B. Prowse, Med. '16-'17, of Glace Bay, died in Halifax, November 16, at the age of 69. He operated a jewellery store in Glace Bay for over 30 years. Since his retirement a year ago he had been living in Kentville. Born in Charlottetown he graduated from Mount Allison Academy before coming to Dalhousie. He served in the First World War overseas with the army medical corps, and on his return began his own business. Surviving are his wife and one son.

Angus A. MacDonald, a former president of the Nova Scotia Pharmaceutical Society died in Camp Hill Hospital, November 29 after three years illness. He was 71. He was a native of Louisbourg and for some years operated a store at New Waterford. During the Second World War he served overseas as a captain with the RCAMC. He leaves two sons and five daughters.

Dr. John C. Ballem, B.A. '04, died at his home in New Glasgow November 28. Born at Mount Albion, Prince Edward Island, he attended Prince of Wales College and after teaching a few years entered Dalhousie University. He graduated in medicine from McGill University in 1908, and after practising for a short time at Bedeque, P.E.I., he came to New Glasgow where he had practised since. In 1958 he celebrated 50 years in medicine, but continued his practice until September this year. He was 82. He is survived by his wife, two sons and two daughters, Elizabeth, Mrs. J. H. L. Sutherland, B.A. '36; Joan, Mrs. D. A. C. Malcolm, B.A. '41; Dr. C. Miller Ballem, M.D., C.M. '43, and John B. Ballem, B.A. '46, M.A. '48, LL.B. '49.

Cecil Killam, LL.B. '99, died October 2, in Vancouver in his 87th year. He had practised law in Vancouver for over 60 years. Born at Yarmouth he received his M.A. degree at Mount Allison followed by his LL.B. degree from Dalhousie. He later obtained a D.C.L. from George Washington University. His wife and daughter survive.

Not hitherto reported is the death of Frederick Parker Du Vernet, who was killed in a car accident in October, 1962. He was born in Digby in 1908, and attended Dalhousie University in Engineering, '25-'29. For the last several years he had lived in Ottawa.

Mrs. Arthur S. Payzant, formerly Mary P. Payson, died on October 22, 1963, in Bellows Falls, Vermont, where

she and her husband had lived since his retirement from the active ministry in 1949. She was born in Weymouth, received her B.A. from Dalhousie in 1907, married in 1910, lived to attend the fiftieth reunion of her class in 1957 and to pass the fifty-third anniversary of her marriage. In the intervals of her career as the wife of a clergyman, she did some very creditable painting, of which there were several showings, also some lecturing. Burial services were held in Digby, near which she and her husband had spent many vacations in her ancestral home. She is survived by her husband, son, and two grandchildren.

# Rugby Recollections

by

Dr. T. G. Mackenzie, B.A. '04, M.A. '05, B.Eng. '06, LL.D. '57

A Dalhousie alumni inured to seeing their football squad trail the field might be reminded that it was not ever thus. In the first decade of the century, with "rugger" still the top sport in the Maritimes, it was after a period of Wanderer supremacy that a jubilant undergrad could write:

"The god of chance has changed his pants  
And now wears yellow and black."

I played right wing in the forward line in the seasons '03, '04, and '05, during which time we played from Glace Bay to Montreal (M.A.A.A. and Westmount) without a single loss and so called ourselves Champions of Eastern Canada. In that period two matches stand sharply out: a tingling contest with Navy in 1903, and an exhibition game at Harvard in 1905, when we were asked to demonstrate the fine points of English rugby to an American audience fed up with the flood of serious injuries suffered in their hard line-bucking game before the introduction of the forward pass.

Our encounters with the Wanderers were always hotly contested; but our most thrilling match was with Navy. The North Atlantic fleet had come to port, and happened to have on board three noted "internationals", all half-backs. We were much stronger in the scrum, they in the backfield.

With both sides playing cautiously in the first half, we stood three all at half time. But early in the second half a big Navy half-back, just before being run into touch at the 25-yd line, hooked a sensational drop-kick with his left foot, which sailed between the goal posts. Two interceptions by Navy backs followed in quick succession, but without conversion. We found ourselves on the short end of a 3-13 score, with less than twenty minutes to play. The Wanderers-Navy bleacher was delirious with joy, our own silent and depressed.

It was here, during "time out" for an injury, that one of our stalwart forwards took command. He announced, "Boys, this procession has got to stop", and laid down a complete change in tactics. Ignoring our own backfield, and adopting the scrum formations used by the New Zealand "all blacks", either 3-3-2 or 3-2-3 instead of the traditional 4-3-1, we controlled and kept the ball in the scrum, then "screwed" the scrum either left or right, and got away to a group dribble against which the fast Navy backfield had no adequate defense. We crossed their goal line for three touchdowns and converted two of them, winning by 16-13, a most stunning reversal.

For the Harvard game, we had shuffled men about to get two balanced teams, and bets were laid. When the Americans saw us take the field with bare heads, bare knees, and unpadded bodies, they were heard to say "This must be a ladies game". But it was not that. Our two Dalhousie-Halifax teams tore into each other hammer and tongs, and completely failed to display the good points of "rugger". It was in fact a disgraceful exhibition.

Later, the forward pass was brought into the American game, as well as the Canadian game, which has now pretty well supplanted rugby as a major attraction all the way from coast to coast.

## Library Established In Men's Residence

In 1962 a library was established in the Men's Residence, consisting of volumes from the Rev. George Patterson D. D. Travelling Library. Since that time, the library has been moved to more favourable quarters, and a collection of examination papers has been acquired.

The Residence Council would like now to expand the services of the library (a.) in providing a larger, higher quality general interest collection, and (b.) in establishing a reference library for certain undergraduate courses that require extensive outside reading and consequently place a heavy burden on the Main Library and their Reserve System. These courses are English, History, Economics, and Political Science.

The librarian is asking that all Dalhousie Alumni carefully consider the possibility of donating volumes from their personal collections to the Residence Library. They are asked to send a list of authors and titles to Michael R. Giffin, Residence Librarian, 366 Dalhousie Men's Residence, Halifax, N. S.

### CANADA COUNCIL CONCERT SERIES

January 9, 1964 · Pierrette Lepage  
Pianist  
January 23, 1964 · Claude Corbeil  
Baritone  
March 5, 1964 · Duo Pach  
Violinist & Pianist

Concerts at 8 p.m.

In  
King's College Gymnasium
