Madras 4th Jan. 1799

My dear Sir,

According to my promise I
take the liberty of writing to you to inform
you that I put the Memorandum
which I made at your house in Calcutta
concerning the Teneth Sector & Woolwich
foundry into Mr. Kindersley's hands, if
Mr. Kindersley cannot get on in the business
which I think will not be the case I intend
writing myself to Lord Clive to dispose of
them for you I will get you most likely
one thousand Pagodas each instead of 600
at all events and them round conveyed
to me by the first opportunity if you

Wm
Dunwiddie
as
William Tucker Esq
Calcutta

choose to trust them in my hands &
at the same time insure them for one
thousand pagodas each. I spoke to D. Anderson
concerning them & several other people
& they all seem to think that the Gov^t
will take them, I intend speaking to
Gen^l Ross the Chief Engineer the first
time I see him —————

The little Electrical machine
you may send round at the same
time with a few ^{of the} apparatus & a good
telescope & microscope for me & I will
settle with you here after —————

I think you may be

preparing to come around here yourself
I shall have my Rooms ready for you
to live in they will not be large enough
to hold all your iron chimney, but you
may hire a Godown for that & if you
will write round by return of Dauch
or by the first ship how you mean
to do it you will oblige yourself
very truly

John Turing

P S I am getting quite stout
