My Dear Brother

Your most kind and welcome letter rec'd
yesterday and was so glad to hear from
you again also to hear that you are all well
& had two letters from Lillias and from Gert
& Maryann & just finished writing to Lillias
reall LLOYD & haven't any strange news
to tell you every thing is just going about the
same here & am getting sick & tired
of this fooling around here and waiting
patiently for the time to pass so that we can
get back to gods country once again it
makes me so mad to think that a fellow has
got to fool around here on a dollar ten per
day when he could be home making that
much every 6 weeks almost & could swan

When ever I think of it Jaw must have a pretty nice job to
 make forty cents for how that is good money I would wish
 that I could be pulling that truck down just think I will
 have to start all over again when I get back I am
 puzzled to know just what to do first when I get back jaw
 see I am not sure just what time in the year I will be getting
 back if I know for sure I might be able to plan something
 and here I do believe that I would like to start fishing for a
 while I am right Home sick for the water about three
 months since I saw it and that is when I crossed the
 Channel on my way for France I will never forget that
 day I used to look at the water and think of
 the times that I spent on it and then to think just what I
 was up against believe me I would much rather have been
 on some nice little fishing Boat however it is all over and
 I will soon be back with jaw all again and will forget
 that I ever saw this County at all I can picture myself
 pulling in them old faulens with the gaff and about half
 sea sick with all getting a rope ready to tie them I lord
 I cant understand what jaw are doing with jaw self to
 make jaw so big and to weigh so much I will have to
 do some going to catch up with jaw but I will fool jaw
 load my self up with leaden bullets and then get weighed
 thats by the way jaw asked me about that little Scotch

Lassie Well I had a letter from her about one
Month ago and did not answer it yet so you
see I am just taking it Cool as Joshua Young
says I do not think that I will ever get her
that way again so I should want and by the
way how is that little piece of yours got a
muffler on her yet or did you break the black
teeth of I guess you had to throw her to use
the pincers how girl you want to be
careful I told she might take the bit in her
teeth (having done think that I am getting any
worse just the same by times will have to
cut this short expect to hear from you soon
again Give my love to all hope you an all
well as this leaves me feeling like will
write you soon again your ever loving Brother
Weldon
