*note +
✓ energy project
outline*

Dear Sir:

The Subcommittee on Energy of the House Committee on Science and Astronautics has the responsibility of investigating and reporting on research and development requirements associated with future national energy needs.

One high priority Subcommittee subject is the publication of an annual inventory of ongoing energy research in this country. A copy of last year's inventory may be obtained from the Government Printing Office.* We are now in the process of gathering data for the next publication. The purpose of this letter is to solicit your cooperation and that of others within your organization in this activity.

As in previous years, this work is being carried out by the Information Center Complex at Oak Ridge National Laboratory with support from the National Science Foundation and by the Atomic Energy Commission.

The Inventory will cover all research and development related to energy. Only energy-related R&D with an annual expenditure of at least \$5,000 is to be included. We are interested in research currently under way or concluded after December 31, 1972. A more detailed description of its scope is given in the attached instructions.

The energy survey questionnaire is also enclosed which, when completed will provide us with the needed information. This should be filled out as completely as possible and returned to the Oak Ridge National Laboratory. Instead of completing the questionnaire form, you may wish to submit copies of your standard documentation, if it includes the desired information. A separate questionnaire should be used for each energy R&D activity. If additional copies of the questionnaire are needed, you may either duplicate the one enclosed or request more from Dr. Caton at the address listed on the questionnaire.

* "Inventory of Current Energy Research and Development," Vols. I, II, and III, January, 1974.

Page 2

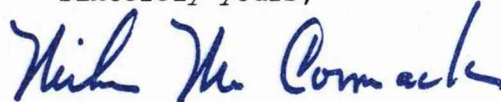

It is not necessary to reveal any specific proprietary descriptive information. Informative general descriptions of the different areas of your research will be adequate.

The expenditure information is especially important because summary tables are prepared of the amount spent in various research areas. Any proprietary expenditure information will be used only in the preparation of these summary tables; amounts cannot be broken out and associated with a specific company, organization, or project.

We would like to have this detailed information as soon as possible and in any event no later than January 15, 1975, sooner if possible. Please send it in the enclosed, self-addressed envelope.

I would like to express my personal thanks and appreciation for any assistance that you can give us in this project.

Sincerely yours,

A handwritten signature in blue ink that reads "Mike McCormack". The signature is written in a cursive, flowing style.

MIKE McCORMACK

Chairman

Subcommittee on Energy

Pacem in Maribus

June 14, 1976

Ms. Carol McCabe
400 S. Burnside #2B
Los Angeles, Ca. 90036

Dear Ms. McCabe:

Your recent note was referred to me.

I am enclosing a copy of the New International Economic Order and the Law of the Sea. The charge is \$10.00 payable to the International Ocean Institute at the above address.

Also enclosed is a Pacem in Maribus Bibliography which, though somewhat out of date, may be useful. There is no charge.

We do not have a research library either at the Center or the Institute. Members may visit the Center anytime. It might be wise to write to Miss Barbara Breene, Assistant Secretary, if you wish to come. Perhaps there would be a meeting that would interest you and she could give you a schedule for meeting around the time you might come.

With best wishes,

Yours sincerely,

Jean de Muller
Assistant to Elisabeth Borgese

Encls.

I wish to order a copy of the "New International Economic Order and the Law of the Sea. In addition, I would be interested in a bibliography of other material you have developed regarding the Law of the Sea.

You may send the copy COD, or bill me.

Do you have a research library? What requirements do you have for members who wish to visit your Center?

Sincerely,

Carol McCabe

Dear Ms. Borgese —

The column just arrived and, as I expected, it is excellent — just what we wanted. I am sure it will add just the right touch to our October issue.

I hope that your LoF S conference is going well. I am sorry that we missed each other last week, but of course there is a standing invitation for you for lunch with the much-admiring staff of Today's Secretary! Please call if you

have an opening this week -- or
whenever you are in town.

We will be sure to send
a number of copies of the
magazine when it is published.
Have a wonderful summer!

Sincerely,
Laura Tenore

23 August 1977

Dear Elisabeth:

Otis Graham passed along this copy of Ocean Science News.

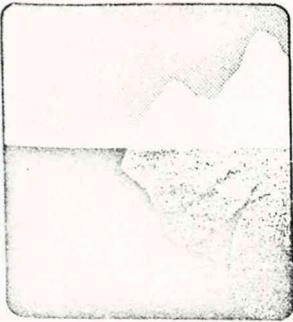

In the light of what seems some quick and negative reaction by U.S. delegation to UNCLOS and the Informal Composite Negotiating Text and actions to match that hostile reaction, we are wondering whether you know of someone who could write a piece on the American delegation's attitude and position throughout the UNCLOS sessions, and especially now.

We feel if we are to do anything along this line, now is the time to do it, before the U.S. position hardens irremediably.

Do you know of anyone who could write a good, objective, analysis of U.S. position?

Sincerely,

Donald McDonald

Dr. Elisabeth Mann Borgese,
International Ocean Institute,
Box 4716,
Santa Barbara, California, 93103

Dear Mrs. Borgese,

Many thanks for your recent missive. I'm delighted to hear that you are in Halifax. I'll make an effort to stop by and see you. I'm doing some work for the Government of Newfoundland and its relatively easy to touch down in Halifax on the way east.

Unfortunately, I have no recent literature of a technical nature on the intelligence of marine mammals that I am sure you do not have yourself. However, I have had underwater encounters with Harp Seals, Beluga Whales, Bowhead Whales and, of course, the Narwhal. Perhaps these can be talked about when we meet.

I hope all goes well with your work. The enclosed is a short article which describes some of the highlights of our recent Arctic expedition.

BEST WISHES
J. B. MacInnis
