### Arts & Science Supreme MacKean Rejoices

The passing of amendments to the Students' Council constitution concerning the Arts and Science Society, the acceptance of a report from the Student Gym Committee, the unanimous approval of a resolution endorsing the C.S.A. petition to the Canadian Government and the unanimous disapproval of the Wurlitzer for Gymnasium dances were the results of a most enthusiastic Student Forum in the Chemistry Theatre, Thursday.

The most popular resolution was: "That this meeting go on record as disapproving of the use of the Wurlitzer at the dances which follow Glee Club Shows and that

We recommend that said Wurlitzer not be used again at these or any dances usually sponsored by the Council of Students, viz.: Munro Day tea dance, and student council dance at or near opening of the autumn

Moved by Lloyd Dalton it was seconded by Bernard Graham in order to prevent "the destruction of the Wurlitzer by a group of stu-ARTS AND SCIENCE-

### "TRUTH ONLY DO WE HONOUR"

Today we call your attention to two great artists of the as he calls it—the way she buries last half century. For they are artists; art, in the widest sense her head as soon as she is confrontof that word, has been their main interest: the art of under- ed with a major problem, refusing standing life and of living richly; the art of increasing human to look at future consequences but knowledge; the art of making human fellowship broader, seizing anything that will clear deeper, firmer. But they have been much more than artists things up for the moment—all this Chap. 24. Moscow Excursion in the generally accepted sense of that title. They have been infuriates him. teachers and prophets. They have looked with insight upon the world around them; they have seen more than most observers; they have acquired more knowledge and have recog- takes no pride in his native London. to be a political racket like Fascism nized need; in the light of their knowledge and wisdom they He infinitely refers to live on the and National Socialism, but for have found themselves with contributions to make to humanity's needs; and they have made them. What they have said has been said clearly, with the objective, yet passionate, concern, and with the embracing insight and perspective of prophets, who see life as a whole with all its parts and manifestations related, and whose attitude towards their fellows is one of understanding, sympathy, and affection.

### Havelock Ellis

Havelock Ellis was eighty years old yesterday. He was born in England, of a seafaring family. A large part of his childhood was spent on the Pacific Ocean. For four years he taught school in New South Wales. He then studied medicine in London, and was, for a short time, a general practitioner. But he soon turned his attention to research and to writing.

The work for which he is best known is Studies in the Psychology of Sex; here are "embodied the first attempts ao present the sex histories of 'normal' people." Like most pioneers who have been significant for human progress, he was misunderstood and ignored. Since his first works appeared, others have carried on the study he initiated; and the acceptability today of his original work is a tribute to the soundness of the attitudes with which he approached the subject: he brought to the study scientific discipline, humane sympathy and insight, freedom from conventional prejudice, and instinctive caution in drawing conclusions.

But this has not been his only contribution. Like a true artist, his interest has been Life; he has contributed writings on many of its aspects: painting, dancing, music, thought, literature, religion; he has been a leader in progressive literary and social movements. He started the Mermaid series of Elizabethan dramatists; he edited the first popular edition of Ibsen's plays for the Scott Library; and it was he who started the Contemporary Science series.

Any student who will look through his general writings will be impressed; he will find the style clear and arresting, had acclaimed the prophet of European unity. and the range of subjects as wide as life itself; he will be illuminating relationships revealed by the bringing together of previously unrelated facts. In the Macdonald Memorial Library there is a copy of Views and Reviews, which is a collection of articles which appeared originally in periodicals, mostly as book reviews; The Dance of Life may be purchased in the Modern Library series. In this latter book, first published when its author was sixty-four years old, Dr. Ellis reveals to us Life, and its more important arts, in the light of hint of why Remy de Gourment has called him "the most advanced man in England" and Olive Schreiner has likened him to Jesus of Nazareth.

Beethoven, and Wagner became known to him; he admired senstive figure, with a strength greater than that of steel, has them, almost worshipped them. He has said: " childhood's days, I had passionately loved art. Music, in nies of his own people and often the indifference of the world, especial, was my daily food; I do not exaggerate in saying that which had formerly recognized with enthusiasm his delicate to me music was as much a necessity of life as bread.'

The same year that Rolland graduated from the Ecole interval received a reply: thrity-eight pages, written in French, individual conscience. and beginning "Cher Frère . . . " In this Tolstoi pointed out "that the pre-condition of every true calling is not love for art as artists to do anything worth doing."

the Ecole Normale. Here he came to know Malwida von August 1914, and he remained there for five years. There, as Meysenbug; she had been the friend of great men: Mazzini, was not possible in the belligerent countries, he could hear the Wagner, Nietsche, Ibsen; and now, in the serenity and wisdom cries coming up from both sides; from there he could send his of her seventy years, she became, the friend, companion, and words of comfort; there, in comparative freedom, he could make guide of Rolland.

of the Modern Lyrical Drama. It was the first discussion of cuted in France. His friends deserted him. Communication music ever presented to the faculty of the Sorbonne. In time, was difficult for his mail was opened, his every move and every as professor, he introduced a course on the history of music. Word spied upon. By all this and worse he was in nowise He wrote several dramas, and took an active part in the embittered; he remained full of love and sorrow for humanity, attempts to establish a People's Theatre; from the first he calling upon the men of intelligence and genius, the artists and championed Dreyfus' innocence, but his interest was in justice, the scientists of all nations, to cease throwing fuel on the

Michel-Ange, and the plays.

"the noblest work of fiction of the twentieth century." It wasto Truth.

# Insanity Fair

It is always fascinating to read book in which predictions are made. Especially so, if some of the predictions come true after the book has been published. Such a book is Douglas Reed's, Insanity Fair. In it, forecasts a German annexation of Austria, a Czechoslovakia deserted by the Allies, and shows up Fascist leanings in many Balkans countries. The picture he paints is not a happy one. Britain and her "ostrichism",

British foreign correspondent he not for Bolshevism, which I guessed Continent. Despite all this he is Russia and the Russians, a sympathy patriotic and idealistic enough to born of that great service they had attempt to persuade the people of rendered my country in the war, for England that even if they are living without them, I thought, we should in Insanity Fair they need not travel have been lost . . through it by means of Stupidity "The desperate longing for peace

conceived in 1889 when Rolland became conscious of himself as a European, with a prophetic mission.

In 1910, although part of Jean-Christophe had already been translated into other languages, its author was unknown. In

During the war he lived in Switzerland, where, as the amazed at the breadth of the man's knowledge, and at the centre of a very small band of international friends, and persecution and vitrolic outpourings from all sides, he issued his manifestoes against hate and the destruction of human freedom and unity. At the same time he was working in the Civil Prisoners' Service of the Red Cross. In 1916 he was awarded the Nobel Prize for literature.

After the war several of his works were published. In 1924 appeared his biography of Mahatma Gandhi. From 1921 to 1933 he was working on The Soul Enchanted, a work, in five his mature reflection. Even a casual reading of these two volumes, comparable only with Jean-Christophe, in which he books will not leave one unaffected; and one may even get some presents a study of a woman, as earlier he had presented a study of a man.

Romain Rolland is great because of the magnitude of his work, and the symphonic character of his writings; he is the artist through whom music makes its first really great impact Last Sunday was his seventy-third birthday. He was born in Burgundy. During childhood and youth Shakespeare, humaine." As Havelock Ellis has said: "This fragile and ... from upheld the cause of human solidarity amid the spiteful calumand sympathetic qualities as an artist."

He is great because of his message that freedom and Normale, Tolstoi's What is to be done? appeared, disparagingly strength for the individual, that the possibility of unswerving dismissed the heroes of his youth, and condemned art. In love, that the ability to recognize truth, all depend upon the despair young Romain wrote to Tolstoi, and after a considerable establishment of the ultimate and supreme authority of the

Romain Rolland is greatest because of the way he has lived life. Although free from illusion, and expecting and dreading but love for mankind. That alone is of value which binds men the havor of the war, he knew and announced what was the together. Those only who love their fellow creatures can hope alternative, the only path for the enrichment of life in Europe. The ignoring of this alternative, though expected, caused him For two years Rolland lived in Rome on a scholarship from great anguish of spirit and mind. He was in Switzerland in his effort to salvage something from the wreckage. He was In June 1895 he presented his doctorate thesis, The Origin abused in Germany, he was misunderstood, condemned, perseflames of hatred. He provided a centre for those few, those For fifteen years, with some friends, he wrote and edited very few, who kept their perspective, who avoided the hatred young men who were wavering, and today it rises above hu-He worked strenuously, in obscurity and solitude, produc- manity to shine like a beacon into the future, to show that it ing his greatest work. Jean-Christophe, which appeared in ten is possible for a man to retain his perspective when all others volumes between 1904 and 1912. Edmund Gosse has called it lose theirs, for him to remain, for ever and in spite of all, loyal

# Dal Cubs Defeat St. Georges Aces

Beating St. George's Aces by two points at the "Y" last week, the Cubs moved into second place in the Intermediate League. While they were fresh the Cubs maintained a zone defence which their opponents couldn't solve and broke from their checks to gain a lead of ten points at half time. In the second half the game became a rough house. The fast-tiring Cubs were disorganized and barely kept in the lead until the end of the game.

Apart from being unused to the floor and in worse condition, the Cubs played better basketball; Stewart and Hutchins at guard were the mainstays of the team, both offensively and defensively.

Line up: Stewart 12, Hutchins 8, Hutton 4, MacKenzie 2, Hatfield 3, Lyall 10; Chairman, James.

# Law Leads League

Law, 30; Arts & Science, 27 Law continued undefeated in In-

terfaculty basketball by winning from Arts and Science 30-27. Less rough house than usual, this was the best game so far. Outstanding for Arts and Science were Fraser, who scored eighteen points-highest individual score in any gameand barrel-chested Craig Smith.

The Law team were all about equal, except for Don Storey, whose two goals in the last minute were the margin of victory. Surprising was Graham Murray, who missed an easy shot at the wrong goal.

Line-ups: Law-Storey 6, Bingham 4, Murray 4, Trites 4, Piercey 8, Hanway 4. A. & S.-Fraser 18, Smith 6, Perlin 1, Tupper 2, Arnell.

# Dalhousie Men Afraid to Fight?

beat Acadia.

# Acadia, 49; Dalhousie, 30

For three years fast, well-practiced teams from Acadia DELEGATEShave beaten Dalhousie at basketball. Last night was no exception. With an almost entirely different team but playing the same system Acadia again gave the Tigers a sound beating.

Instead of the zone defence which they have been prac- bly may pass resolutions on the Our interclass basketball league ticing Dalhousie chose to play man to man and failed to keep got started last Saturday when the their opponents covered.

Freshettes played the Sophs. At the At the first of the game Acadia gained a lead on long shots, end the score was 18-18. It was a which they held until half-time. After their bad start the Industry, The Student and Control good fast game, both teams playing Tigers kept Acadia from increasing their lead and they looked of Society, and Canada's Foreign hard. On the Freshette team were as if they might improve, but in the second half they became R. Milne, A. Childers, D. Simon, M. completely disorganized.

They could not solve Acadia's shifting zone defence. Only take a prepared speech on these Manning, K. Hicks; and the Sophs good long shot on the team Johnnie Martin had an off night so were H. Brownhill, M. Doull, J. that Dalhousie only scored ten field goals the whole game.

When Acadia got the ball they caught Dalhousie up the the smaller groups. For further infloor on fast breaks.

Best game for Dalhousie was played by Art Shainhouse This Saturday the Sophs will play the Junior-Senior team. Since these who checked his man closer than any one else and broke in for games are played on only the half three goals.

## COMMENT ON SPORTS

ed the finals of the league playoffs, the hockey team have yet to win a game. Because practice and trips demanded too much time from studies, the team has not been able to get organized though individually the players compare favourably something at this game, namely, with the rest of the league. Their last trip will be made to New Glasgow on February 3rd, and the last An interesting and amusing sight home game will be at the Arena was to be seen last Monday night next Wednesday.
