Pacem in Maribus

April 15, 1978.

Dearest Terry,

The New Scientist is unable to provide the picture of the fish hospital --its publication is too far back, and they don't have it any more.

So I have to rely on your help. once more. Do you think you could get it really quickly? The book is in production now -- and so we are in a great hurry. It would be lovely if we could include the picture (or pictures). It is such an interesting hospital!

The Law of the Sea Conference is on. It got off to a terribly difficult start, but survived the crisis. I think it will be productive.

Love,

*Elroy*

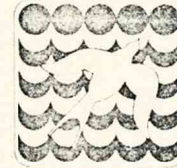

P.S. to save time, you might send the picture directly to Mrs. Margaret Kaplan, Harry Abrams Co. 110 East 59th Street New York, N.Y. 10022.

And, I guess we have not heard from the Japan Marine Products Photo Materials Association. The Japanese pictures are the last ones that are missing!

Dear Terry,

I can hardly believe it myself but the fish farm book is finished! I have just to do the captions for the pictures -- and round up a few additional pictures, very few, five or six.

One of them would be a picture of the Toba Bay Fish Hospital in the Mie Prefecture. The New Scientist carried an article, with a picture, a few years ago. The hospital is a very interesting piece of modern architecture. I have written to The New Scientist, but, of course, I don't know whether they still have the original or negative. So, therefore, to be sure, I am asking you, too. Could you be so very kind to get me a couple of pictures? In color or black and white? Certainly, the exterior, perhaps also an interesting interior? I would be ever so grateful.

Going back to Europe on March 20. When and where shall we next meet? Are you ready for another Pacem in Maribus??? How is your work going?

With much love,

Yours as ever,

Elisabeth Mann Borgese  
Chairman, Planning Council

Dear Elisabeth:

Yes, I agree, we have been out of touch for too long. But I have been thinking about you often and Mr. Arayama has been keeping me informed about the correspondence he has been keeping with you. I was also happy to hear that the fire did not reach your place but sorry to hear that your mother is not too well. Hope she is improving.

You will see from the enclosed that I have a new job now with Microsonics Japan Limited. It is a new company that is in the hardware and software business. We have a worldwide contract with Britannica who have an exclusive right to our product in the educational field. I, too, have been very, very busy setting up this new company. I left TBS-Britannica at the end of September but my work there was a heavy load until the day I left, making it a bit difficult to leave but Yoshida gave me his blessings so it worked out nicely. We will probably do business with TBS-Britannica and also the Year Book Company also so my new job will not be with total strangers.

I am enclosing Xerox copies of the Expense Statements which cover the Yen amount, 123,137 which you have requested in your letter of November 8th. I have copies of the receipts for the statement covering 7/18-20 '75 but I do not have the receipts for 7/22-8/28 statement dtd August 30, '75. The originals were, I believe, handed to you as I only have duplicate copies of statements and whatever copies I have. I hope this will serve to help your purpose.

Let me hear from you time to time. My love to Jean and please tell her I enjoyed working with her. I hope, some day, we can go back to Okinawa and relax in that beautiful water again.

Love,

Teruko T. Arimatsu
